

# ASSEMBLY AND INSTALLATION INSTRUCTIONS

**WARNING:** TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

## Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

## Step-by-Step Installation:

Step 1: Loosen the quick link hook to set the desired height of the suspension chain and the power cord.

Step 2: Thread the Main Wire

• Thread the main wire through the extra-large square frame and the suspension ring.

• Secure the ring tightly onto the lamp body's threaded section.

Note: Ensure lamp holders are oriented to prevent contact with structural components on the extra-large frame.

Step 3: Align the 300mm square rods with the holes on the small frame (100×100) and secure with short screws.

Step 4: Align the 205mm square rods with the holes on the medium frame (226×226) and secure with short screws.

Step 5: Align the 100mm square rods with the holes on the large frame (366×366) and secure with short screws.

Step 6: Use long screws to secure the small frame (100×100) to the extra-large frame (488×488) through the innermost row of holes.

Step 7: Use long screws to secure the medium frame (226×226) to the extra-large frame (488×488) through the middle row of holes.

Step 8: Use long screws to secure the large frame (366×366) to the extra-large frame (488×488) through the outermost row of holes.

Step 9: Adjust the lamp heads to their proper positions, ensuring no obstruction by framework components.

Step 10: Secure the mounting plate to a UL-listed junction box using provided screws.

Step 11: Connect the fixture wires to the supply wires using wire connectors.

• Note: Connect the black (hot) wire to the black wire, the white (neutral) wire to the white wire, and the ground wire to the grounding terminal.

• Ensure no exposed conductors remain outside wire connectors or outside the junction box.

Step 12: Secure the canopy to the mounting plate using metal ring.

Step 13: Install the bulbs into the lamp sockets. (Bulb Not Included)

Step 14: Hang the glass panels onto the fixture frame.

Step 15: Turn on the power and check if the bulbs are functioning properly.

Installation is now complete.

## Safety Instructions:

**To avoid fire, shock, and serious personal injury, follow all instructions carefully.**

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
