

ASSEMBLY INSTRUCTIONS

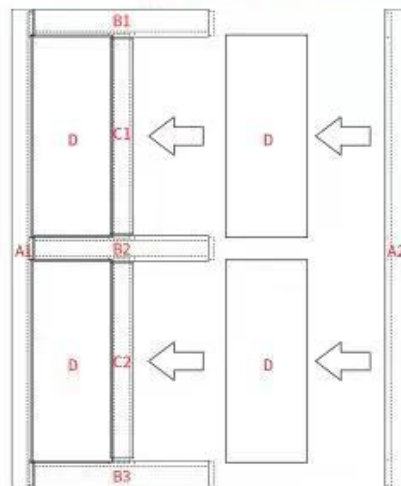

1. Find the corresponding parts in below picture after open the package, start the assembly after sort all parts out.

2. Find A1, insert B1, B2, B3 into the corresponding grooves of A1 in order, then put the D board into the grooves on both sides of the B board and slide it to the left, and then put the C1, C2 boards in the same way.

3. Continuing with the method of the previous step, put the D board into the grooves on both sides of the B board and slide it to the left, and then install A2, paying attention to align the tongues of the B board.

4. After completing the above steps, put the screw F into the screw holes on the sides of A1 and A2, tighten it with a screwdriver, and finally put it into the E board as shown in the below picture, and fix it with the screw G to complete the installation.
