

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1. Tilt the two middle glass panels and align them vertically with the mounting slots on the fixture arms, ensuring they are perpendicular to the threaded rods.
 - 2-3. Secure the bottom glass panels by sliding the four-claw brackets over the lower threaded rods, then lock them in place with the decorative round finials.
 - 4-5. Secure the top glass panels by sliding the claw brackets over the upper threaded rods, then fasten them with the suspension downrods.
 - 6-7. Assemble the suspension rods and swivel connectors to achieve the desired hanging height. Tighten all connections securely.
 - 8-9. Bend the swivel connectors to 90-degree angles and align them uniformly. Attach the canopy to the connector studs.
 - 10-13. Place flat washers, ground wire (either side), and threaded washers sequentially. Secure with nuts and ensure all connections are tight.
 - 14-15. Mount the mounting plate to the junction box using the provided screws.
 16. Pull power supply wires from the junction box. Use wire connectors to connect the black (hot) wire to the black wire, the white (neutral) wire to the white wire,
 17. Secure fixture ground wire to the mounting plate using the green grounding screw. Connect supply ground wire using wire connector. Carefully tuck all wires into junction box.
 18. Secure the canopy (9) to the mounting plate using the provided decorative nuts (18).
 19. Tilt the two side glass panels and align them vertically with the mounting slots on the fixture arms, ensuring they are perpendicular to the threaded rods.
 - 20-21. Secure the top glass panels by sliding the claw brackets over the threaded rod, then lock them with the decorative round finials.
 22. Install the light bulb (not included). Do not exceed the maximum wattage marked on the socket.
- Installation is complete.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
