

# Fireplace Mantel Instruction Manual

Important: wood mantels are considered a combustible material, so heat clearances must be adhered to. Before installing, check your local building codes and the manufacturer's instructions for your specific fireplace insert or stove. Upon receiving your mantel, you may notice the smell of lacquer or stain. This is not a defect, and will not inhibit the installation process. But if it concerns you, simply remove the packaging and set the mantel in a space protected from sun and water (ex. garage) for 48 hours to allow the smell to dissipate.
