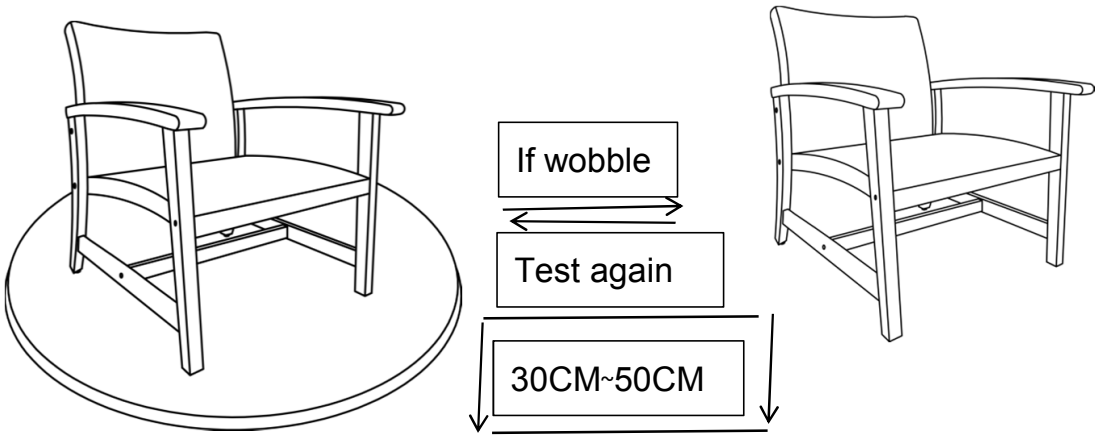
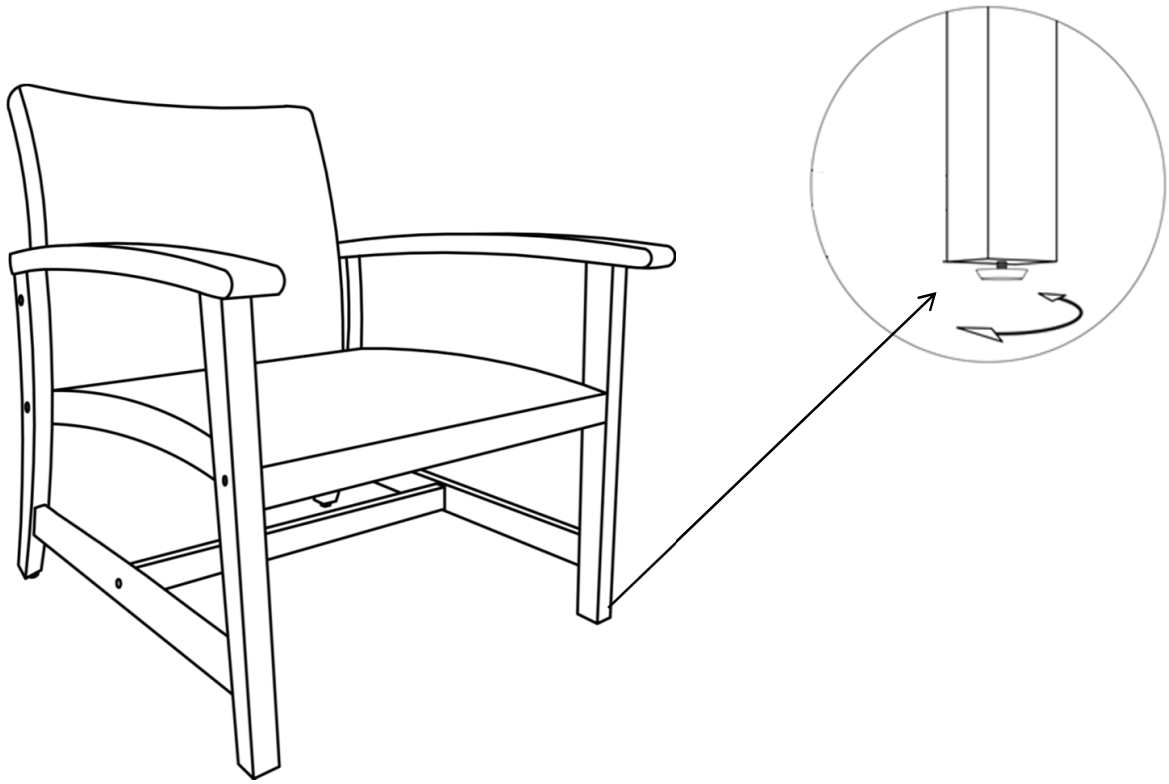
Step 6



Place the Chair right side up on a LEVEL SURFACE to see if it wobbles.
If it wobbles, lift the Chair to some 30cm to 50cm height from the ground.
Keep your feet and toes well away from the drop zone.
Drop the Chair freely and vertically with the four legs, hitting the ground, at the same time.
This Drop Test will help to ensure that all the Bolts, Screws and gaps all reach full alignment status.
Test again for evenness on a LEVEL SURFACE.
If no wobbles are found, proceed to tighten all the Screws, and Bolts.
CAUTION: When tightening the Screws, and Bolts tighten sequentially. DO NOT tighten any Bolt, or Screw fully and then move towards the next one. This could cause the frame to warp.
If there are still wobbles, loosen the Screws and Bolts and execute this same drop tests.
If the Chair is not stable, it could lead to damage to the product.

Step 7



Your Chair is ready for use.
Please use adjustable foot for uneven floors.
