Self-Cleaning Litter Box

Before we start:

Congratulations on your new Pawstastic Smart Self-Cleaning Litter Box! Before you dive in, please keep the following tips in mind to ensure a smooth transition for your feline friend:

Some cats need time to adjust

While many cats adapt quickly to their new litter box, some may need a little extra time. To help ease the transition:

- Place the new Pawstastic Smart Self-Cleaning Litter Box next to your cat's current litter box

(trust us, you'll be able to get rid of the old one soon).

- Let the old litter box get dirty. Most cats prefer a cleaner litter box and will soon be drawn to the fresh crystal litter.

Staying connected with your cat is easier than eve.

Set up your new litter box

01. Install waste drawer

(Fig. 1)

(Fig. 2)

- Pull out the waste bin and lay the garbage bag flat, then insert the drawstring into the drawstring box at the front end (Fig. 1) Please make sure the waste bin is positioned correctly.
- When cleaning the feces, first open the drawstring box and pull out the drawstring to securely seal the garbage bag, and then access the waste collection chamber (Fig. 2)

02. Add cat litter

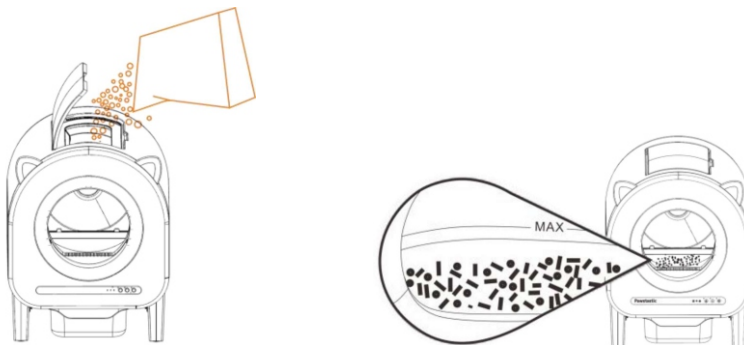

Pour the cat litter through the dump port.

We recommend using clumping bentonite cat litter.

- Avoid using pellet cat litter with a grain diameter exceeding 3mm or a length exceeding 10mm, as this may lead to unnecessary litter waste.

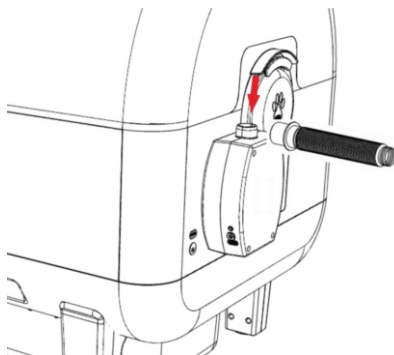

Litter MAX line

- Ensure that the amount of cat litter does not exceed the MAX line

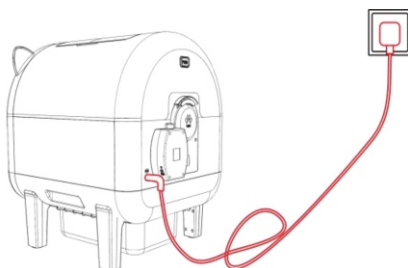

03. Air duct connection and installation:

- (1) Remove the rubber plug from the device's body ventilation duct interface.
- (2) Align the outer interface protrusion of the ventilation duct with the duct socket on the device and insert it.
- (3) After inserting, rotate clockwise to lock the ventilation duct securely.
- (4) Rotate the ventilation duct counterclockwise to release it from the locking position and remove the duct.

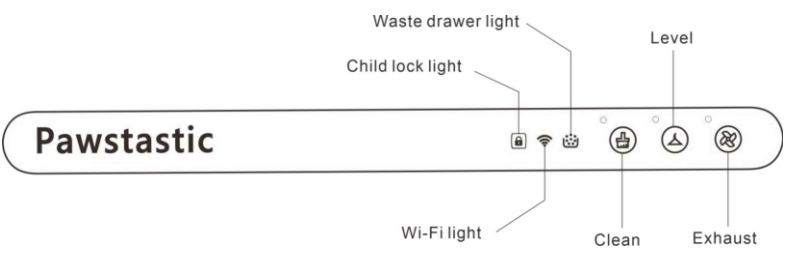

04. Plug in

Take out the power adapter, insert it into the power port on the back of the main unit, and then insert the plug into the power socket.

Control panel lights and buttons

The lights and buttons on the litter box control panel show the system status and allow you to control certain litter box functions:

Button	Meaning
	Short press: Clean Long press: Lock/unlock
	Short press: Smooth the cat litter Long press: Replace the cat litter
	Short press: Turn on/off the exhaust Long press: Reset the device, the device is disconnected from the network
