

First, take out the accessories we received.

Put 3 packs of filter media into the filter tank

The filter material can be placed at will.

Put on filter cotton

Put on filter cotton

Put on filter cotton

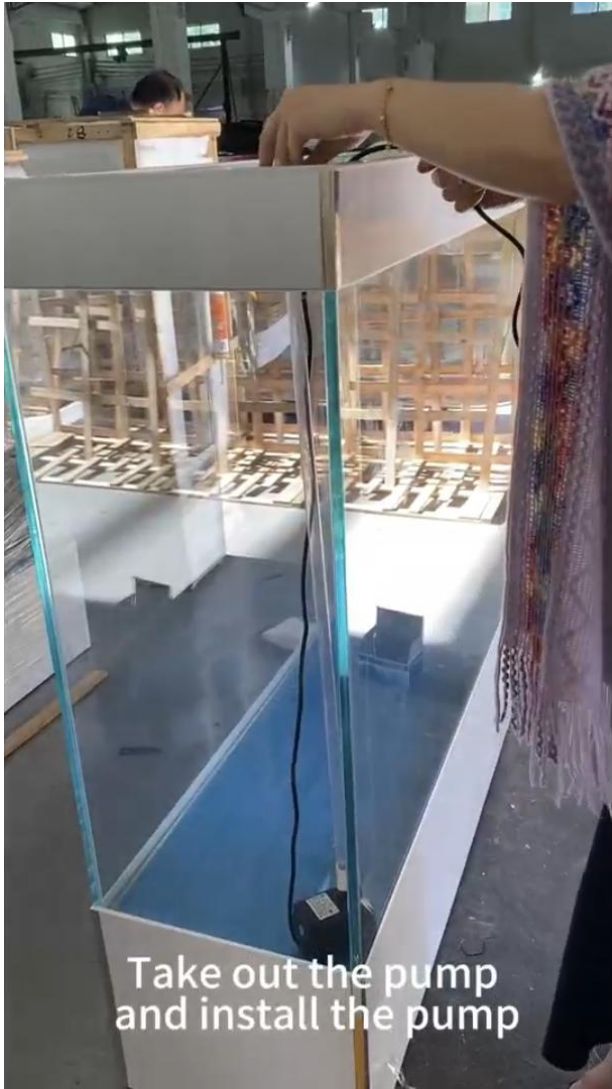

Take out the pump
and install the pump

Take out the pump
and install the pump

Take out the pump
and install the pump

Just take out the heating stick and suck it on the fish tank.

Just take out the heating stick and suck it on the fish tank.

Just take out the heating stick and suck it on the fish tank.

Then install the air pump

Then install the air pump

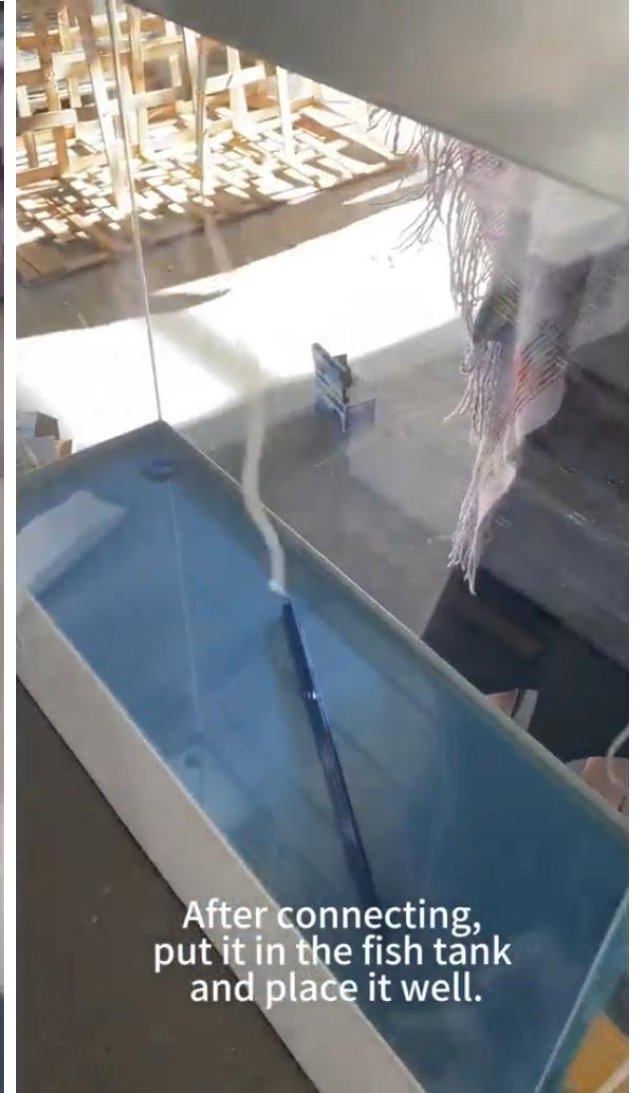

Connect the trachea to the air pump. Connect the other end to the blue bubble strip

Connect the trachea to the air pump. Connect the other end to the blue bubble strip

After connecting, put it in the fish tank and place it well.

After connecting, put it in the fish tank and place it well.

The air pump cannot touch the water. Put it on top of the fish tank.

And finally, the bar columns.

And finally, the bar columns.
