Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

1. Loosen the hanging ring (F) to separate the round plate (G) from the metal box (H).
 2. Secure the curved pipe to the fixture body by tightening screw (N). (Pull excess cord back through the pipe.)
 3. Loosen the pre-installed nut on the curved pipe (I), align it with the mounting holes on the metal box (H), and tighten the nut.
 4. Secure the round plate (G) to the fixture body (H) by tightening the hanging ring (F).
 5. Unscrew the mounting plate (A) from the suspension chain (C).
 6. Secure the mounting plate (A) to a UL-listed junction box using screws (CC or DD, select appropriate length) and washers (BB).
 7. Adjust the chain length, then thread the cord sequentially through components F, E, D, B, and C. Attach the quick link (E) to the ring (F).
 8. Secure the suspension chain (C) to the mounting plate (A).
 9. Wiring Connections
 - Use wire connectors (AA) to connect the fixture's positive wire, negative wire to the corresponding wires from the junction box. Connect the ground wires to the grounding terminal.
 - Ensure no exposed conductors remain outside wire connectors or outside the junction box.
 10. Secure the canopy (B) to the mounting plate (A) by tightening component (D).
 11. Secure the glass shade (L) to the fixture body (M) using a socket cover to tighten ring (K).
 12. Install light bulb (bulb not included). Do not exceed maximum wattage.
- Installation is complete.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
