

Magnus - Self-irrigating Mobile Living Wall Kits

A complete kit to help you create a mobile 'living wall' of plants over a metre tall

Magnus - Self-irrigating Mobile Living Wall Kits

Create a beautiful green 'living wall' in your home or on your patio or balcony with this easy-to-use kit.

This 'next generation' planter comes complete with an integrated water reservoir from which water is 'wicked' into the soil above.

This reduces the risk of over-watering as the plants only draw up water when it is needed.

To support your plants' growth to their full height there is a twin height trellis that mounts securely into the base - start with the trellis at 60cm in height and extend it to 117cm as the plants grow to create the 'living wall' effect.

Available in two sizes - 1000mm and 800mm long, and two colours - Anthracite Grey and Stone Grey
