

The AIRE lighting collection blends technology and sustainability. The shade is made of recycled PETG and has a transparent, textured finish. The 3D - printed shapes are like air bubbles that fill the space, giving it personality and elegance. Thanks to the crystalline appearance and surface texture, the light is magically diffused through the shade. The Aire 450 luminaire can be used individually or with other luminaires from the collection to create unique light compositions.

General characteristics

Fixation	Ceiling
voltage	120V
Hertz	60Hz
Cable length	0.03 ft
Max. Power	20W

Material

Body/Structure	Steel
Screen	Recycled PETG

Finish

Body/Structure	White
Screen	Translucent
Location	Dry locations only
US Certification	Fijas cETLus

Lighting characteristics

Light source included	No
Light source	E26 LED
