

FLUSH MOUNT

INSTALLATION INSTRUCTION

Please read the product instructions carefully and ensure that all the required tools and accessories are available before installation.

CAUTION:

1. To avoid the risk of fire, DO NOT exceed the recommend wattage.
2. Before installation, make sure the power supply is TURNED OFF and remains off until installation is complete.
3. Double-check all the connections and make sure everything is securely fastened before lighting.

INSTALLATION STEPS:

Rated 80-240V, built-in LED 15W*2

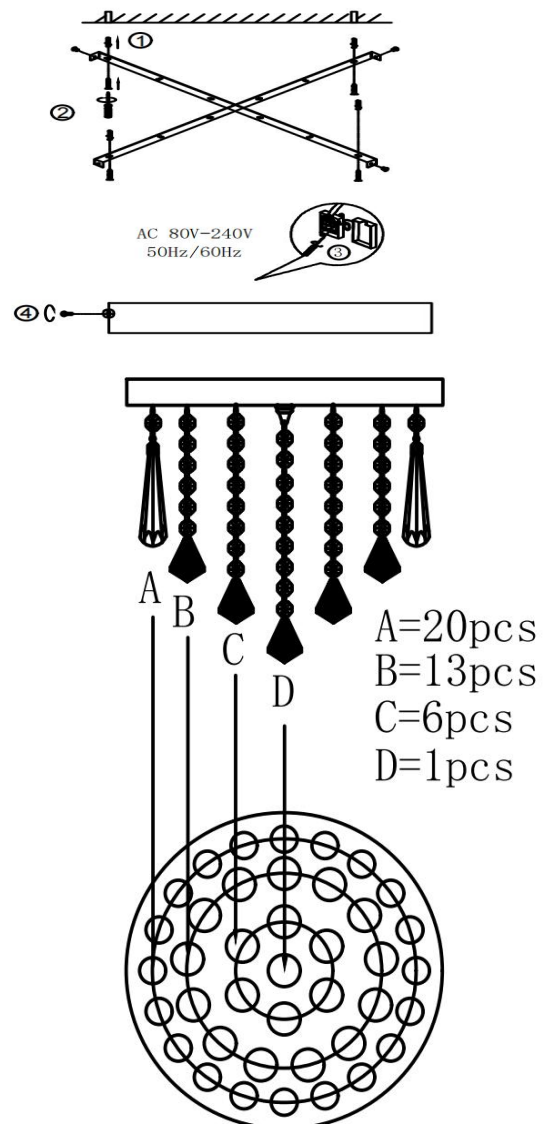

Step 1: Remove the mounting bracket from the canopy. Attach mounting bracket to junction box with screws.①②

Step 2: Connect the wires respectively. The red one is Live wire (L), and the blue is Neutral wire (N).③

Step 3: Attach the canopy to the mounting bracket with screws.④

Step 4: Attach the crystal strands correspondingly to the loops on the fixture. Connect the crystal strands from inner to outer, the Longest Strand (D) for innermost, the Shortest (A) for outermost, etc.

Step 5: Switch on the light to verify proper installation and functionality.

Maintenance:

1. Turn off the power supply before cleaning.
2. Regularly clean the light fixture using a soft cloth and mild cleaning solution.

Avoid using corrosive cleaning products.

3. Regularly check the connections and tighten if necessary.
4. Avoid exposing the light fixture to direct sunlight or extreme temperatures, as this can cause discoloration or damage to the crystal accessories.
5. If the fixture is being moved or transported, make sure to securely pack and protect the crystal accessories to prevent damage during transportation.
