

# installation procedure

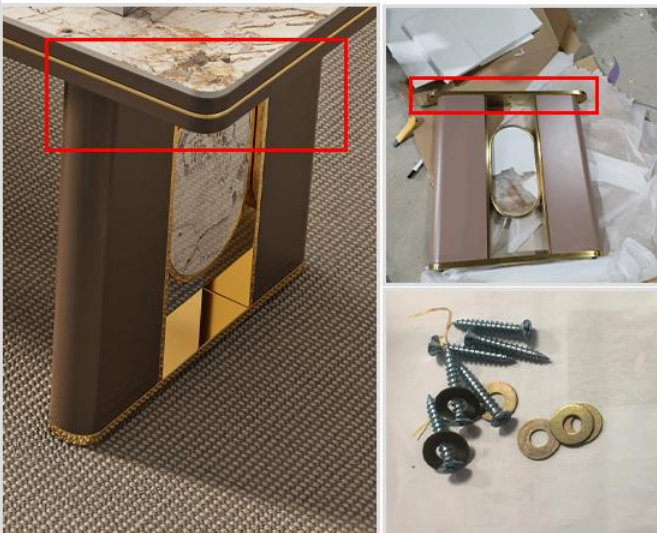

The installation mainly consists of four parts.

**Parts list:** screws, flat washers, L-shaped angle brackets, tea set, water preparation bucket, tea tray, electric tea kettle base, socket.

## step1

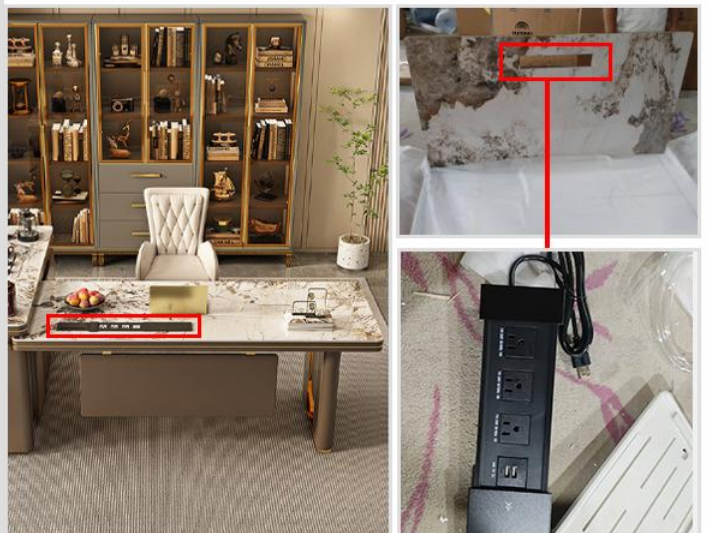

Install the table legs.

Take out the table leg components, the screws with foot pads, and the flat washers. Align them with the corresponding mounting area on the bottom of the tabletop, then tighten the screws. Just make sure there's no looseness.

## step2

Install the desktop embedded power strip

Align the power strip with the mounting slot on the tabletop, route the power cord of the power strip through the cable hole under the tabletop, and adjust the position so that it is flush with the surface of the tabletop.

## step3

### Front Table Baffle Installation Steps

Take out the front baffle and L-shaped brackets, align the front baffle with the mounting position under the tabletop, then tighten the brackets to the baffle and the tabletop using screws.

## step4

### Side Cabinet Installation

1.The location for placing the tea tray

2.Placement area for the electric tea kettle base.

Position the side cabinet beside the tabletop, aligning with pre-drilled screw holes. Secure with screws, then confirm alignment with the tabletop edge. Installation complete.

3.Place for storing water buckets
