

# ASSEMBLY AND INSTALLATION INSTRUCTIONS

**WARNING:** TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

## Installation Steps

### Part A: Electrical Connection of the Fan Motor and Receiver

1. Connect the fan's wires to the receiver's corresponding wires using the wire nut.
2. Connect the light fixture's wires to the receiver's corresponding wires using the wire nut.

### Part B: Connecting the Receiver to the Household Junction Box Wires

#### 1. Red Wire (L) to Household Black Wire:

Connect the receiver's red wire (L) to the household black wire using a wire nut, and tighten securely.

#### 2. Black Wire (N) to Household White Wire:

Connect the receiver's black wire (N) to the household white wire using a wire nut, and tighten securely.

#### 3. Mounting Bracket Ground Wire to Household Ground Wire:

Connect the ground wire on the mounting bracket to the household ground wire using a wire nut, and tighten securely.

**WARNING:** To avoid possible electrical Shock turn the electricity off at the main fuse box before wiring. If you feel you do not have enough electrical wiring knowledge or experience, contact a licensed electrician.

**WARNING:** Check to see that all connections are tight, including ground, and that no bare wire is visible at the connect Terminal blocks, except for the ground wire.

**CAUTION:** Do not use with a wall light dimmer switch

**NOTE:** The fan must be installed at a maximum distance of 20 ft. from the remote control for proper signal transmission between the remote control and the fan's receiving unit.
