Tip 2

Due to the natural properties of down, it may be slow to bounce back after prolonged sitting. Moderately patting can restore the fluffiness and maintain a comfortable sitting feeling.

To restore fluffiness and maintain comfortable seating, gently pat and fluff the cushions as needed:

- **When to fluff:** When cushions feel less resilient or appear flat.
- **How to fluff:** Use a cupped hand to gently pat the sides, front, and back of the cushion with moderate pressure. Repeat as needed. Avoid using excessive force.

Fabric Down Sofa Care Guide

Air-Drying Care: Refresh with Moderate Sunlight

- If the sofa is consistently exposed to humid conditions, it may develop mold or odors. On sunny days, air-dry it outdoors once a month (or every 2–3 months in dry climates). Avoid excessive sun exposure to prevent fabric fading and down fiber damage.
- Limit sun exposure to 2–3 hours. Gently pat the surface during air-drying to help fluff the down. Avoid prolonged exposure (over 4 hours), which may cause fabric stiffness or down clumping.

Cleaning Care: Keep Your Sofa Fresh

- If the sofa cover is removable (check product specifications—some designs are non-removable), machine wash it on a gentle cycle using a mild detergent in cold water (below 86°F). Do not spin-dry; however, a short dehydration cycle of 1–2 minutes is acceptable. Reattach the cover promptly after drying to prevent fabric shrinkage.

By following these care instructions, your down-filled sofa will remain soft and comfortable for years to come.
