

# BBQ PIT POPPER

**MODEL:6252 BBQ Pit Popper 83-DT5678**

## ASSEMBLY & INSTRUCTIONS

# BBQ PIT POPPER

## ASSEMBLY, USAGE & STORAGE

### Assembling Your Pit Popper

To attach your telescoping popper handle to your BBQ Pit

Popper, first,

1. Lift the clip on the popper handle and fully extend the handle.
2. Lock the handle into place by lowering the handle clip back down.
3. Next, affix the handle to the kettle of your popper by seating the bottom of the handle over the two raised hooks on the top of the popper. Slide the handle away from the lid to lock.

**Lift Handle Clip**

**Lower Clip to Lock**

**Note: Always check to be sure that the handle is secured to the popper before using!**

**Fit Handle Underside to Top Hooks, Slide Away to Lock**

**Popper Handle Secured and Extended**

### Seasoning Your Pit Popper

To ensure that your popper has a long life it's best to season the kettle after unpacking.

- Wash and dry the kettle when you first unpack the popper.
- Wipe the entire inside of the kettle with a small amount of vegetable oil, then add a few more drops and heat on medium for 30 seconds or until hot. Caution! Kettle will be very hot...do not leave unattended.
- Take the kettle off the heat and cool completely. Wipe out excess oil.

## USING YOUR BBQ PIT POPPER

### Using Your Pit Popper

1. To use your popper, first add oil (approximately 3-4 Tablespoons), then your favorite popcorn (1/3 cup) into the kettle. You can also use pre-measured packs, like our Gourmet All-N-One Great Northern Popcorn Paks (2.5oz or 4oz packs) by emptying the entire contents of the portion pack into the popper. Close the lid.
2. Pop over the flames or coals of a campfire, fireplace or on a gas or charcoal grill by gently sliding the popper from front to back. Depending on how hot your fire is, the total popping time can range from 3-6 minutes. When the sound of the popping begins to slow down, remove from heat and wait until the popping stops completely. With the telescopic handle still extended, carefully tilt the popcorn from the kettle into your serving bowl. Season to taste and serve immediately! **See the next page for important Do's and Don'ts...**

### WARNING

Popper is extremely hot during and after use! Take care to keep hot popper away from children. **DO NOT TOUCH HOT POPPER. REMOVE TO A SAFE PLACE UNTIL COOL.**

**CAUTION:** Pot, oil and popcorn are extremely hot. Escaping steam can cause severe scalding. Children and inexperienced campers are naturally attracted to the excitement of the popping event. Keep children and others well back out of harm's way.

Be sure to check out our **Gourmet All-N-One Tri-Paks** for theater flavor popcorn taste in the middle of the woods, around your backyard firepit, or anywhere! Find a full line of poppers and popping supplies at [www.greatnorthernpopcorn.com](http://www.greatnorthernpopcorn.com).

U.S. grown premium popcorn in premeasured portion packs complete with coconut oil and seasoning salt.  
Great convenience, taste and portability.

Pack some for your next trip to the campsite, backyard or kitchen today!

## IMPORTANT SAFETY & STORAGE TIPS

### Do...

- Follow all warnings, instructions and recommendations
- Check to be sure that the handle is securely fastened to the popper before popping
- Check that the lid is securely fastened to the kettle before popping
- Always use caution when the popper is hot
- Season pan before first use and wipe clean with a paper towel after popping to keep popper clean and ready to go
- Close lid before popping
- Slide popper back and forth after placing on fire to prevent burnt kernels and speed up popping time
- Remove from heat when popping slows or stops

### Don't...

- Don't put face or hands near popper lid when freshly popped to avoid steam burns
- Don't put in microwave or use anything other than a paper towel or if needed, mild soap and water to clean your popper
- Don't pop in a dry popper (without oil); do not use butter or olive oil spray or vegetable spray to pop popcorn
- Don't set hot popper on plastic, glass or place on or near flammable materials
- Don't let children use the popper and always watch children while the popper is hot
- Don't use the popper when water is in kettle because water will cause oil to pop and potentially injure you or others
- Don't use sugar or cheese as these may stick, burn or explode when hot
- Don't leave popper unsupervised when popping or hot

### Storing Your Pit Popper

1. You can store your Pit Popper with the handle attached or detached. If storing with the handle attached you can collapse the handle and hang inverted from the handle end/loop.

2. To detach your handle, first lift on the handle clip to collapse the extension and lower the clip to hold the compacted handle in place.

3. Next, locate the metal clip on the popper lid that is directly beneath the handle and press and hold down. While keeping the clip down, slide the popper handle forward and then up to release and remove.

Clean your popper kettle by wiping the inside with a clean paper towel. No need to clean with detergent....**the more seasoning the better!**
