

## Installation Instructions

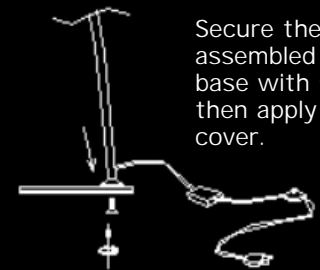

1. Thread the wires through the grommets, then slide the upper and lower lamp poles together and secure them with screws.
2. Fasten the entire lamp pole to the base with screws, then attach the base fabric strip.
3. Connect the lampshade terminals to the pole terminals, insert the lampshade into the pole, lock it in place, and adjust the lampshade angle.
4. Plug the power switch into the power outlet, press the switch, and the light will turn on.

①

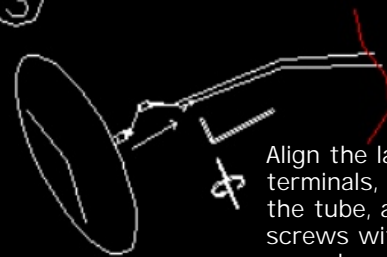

Slide the plastic sleeve over the switch wire ends and thread it through both sections of the light pole from bottom to top. Then tightly fit the two poles together, tighten the connecting screws, and secure the plastic sleeve screws.

②

Secure the entire assembled rod and base with screws, then apply the base cover.

③

Align the lampshade terminals, insert them into the tube, and tighten the screws with a small wrench.
