

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Before You Begin:

- Ensure power is turned off at the circuit breaker before installation.
- Read all instructions carefully.
- Installation should be performed by a qualified electrician if you are unfamiliar with wiring.

Step-by-Step Installation:

Step 1: Connect the long decorative tube to one end of the fixture (this end is recommended to face downward).

Step 2: Connect the short decorative tube to the other end of the fixture.

Step 3: Use screws to secure the bracket to the junction box (if there is no junction box at the top, use self-tapping screws to fix the bracket to the wall).

Step 4: Wire Connections

Make wire connections using the provided wire connectors, ensuring no bare wires are exposed:

- Connect the black wire (L / Live / Hot) of the fixture's main wire to the house black wire (L / Live / Hot).
- Connect the white wire (N / Neutral) of the fixture's main wire to the house white wire (N / Neutral).
- Use the green ground screw to attach the fixture's green or bare copper ground wire to the mounting bracket, and connect it to the house ground wire.

Step 5: Secure the upper wall base onto the upper bracket.

Step 6: Secure the lower wall base onto the lower bracket.

Step 7: The light source rod can rotate 320°

Step 8: Turn on the power to check if the fixture operates properly.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock, be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
