

# Guide to "Repotting" a Faux Plant with a Styrofoam Base

## Step-by-Step Instructions

### 1. Measure and Determine Height

- **Remove** broken planter from Styrofoam base of the planting.
- **Check the Fit:** Place the faux plant's Styrofoam base inside your new planter.
- **Carve to Measure:** If the Styrofoam base is slightly too large for the new planter, cut away some of the Styrofoam with a sharp knife.

### 2. Place and Stabilize the Faux Plant

- **Position:** Place the faux planting in its Styrofoam base in the new planter.
- **Secure:** Tuck any extra preserved moss around the side of the planting.
