#### ANSI/PLATO FL1 STANDARD

MODES	LUMENS	RUN TIME	BEAM DISTANCE
High+	374 lm	2h	162m
High	342 lm	3h 30m	159m
Medium	184 lm	7h 30m	105m
White Flood	41 lm	10h	17m

#### Operation Instructions

**On/Off:** Press and release the button on the right side of the headlamp to turn it on and off.

**High+ Mode:** From any mode, press and hold the button on the left side of the head lamp for 3 seconds to turn on High+ Mode.

**Cycle Modes:** Press and release the button on the left side of the headlamp repeatedly to cycle through modes (High+/High/Medium/White/Green). Pushing the left button after the headlamp has been turned off will recall the last mode used.

**Strobe Mode:** From any mode, press and hold the left button for 3 seconds to switch to Strobe Mode.

#### Battery Replacement

The LP740 uses 3 AAA batteries.

To replace the batteries, first locate the two plastic tabs on the sides of the headlamp. Gently push tabs outward using both thumbs to separate the battery cover from the main headlamp housing. Remove the old batteries and insert new batteries according to the (+/-) symbols in the battery tubes. For best results we recommend using brand new alkaline batteries that are the same voltage and brand.

To re-attach the battery cover, line the plastic tabs on the main housing up to the battery cover taking note to match them in the proper orientation (the LUXPRO logo on the battery cover should line up with the On/Off button on the main housing). Gently press the two sides together until they click into place. Check that the battery cover is secured by gently tugging on the headlamp straps while holding the main housing firm.

When the light is turned on/off, the blue battery indicator lights on the side of the headlamp will light up to indicate the battery percentage.

#### Blue LED Battery Indicators
