Assembly Steps

1 set of main chair body, 1 set of casters and gas lift cylinder. 1 five-star base, 1 charger, 1 power cord (to be connected).

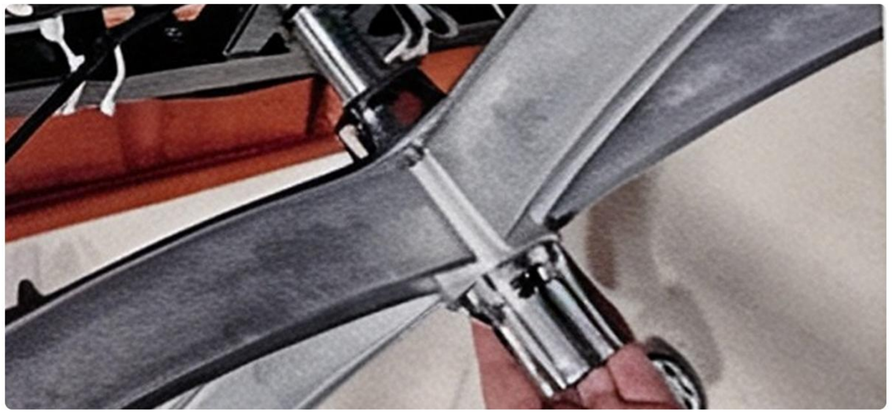

※ (Connect the control power cord under the seat:)

It is disconnected at the factory to avoid accidental operation during transportation.

Insert the 5 casters into the five-star base respectively.

(As shown above): Insert the gas lift cylinder into the central hole of the five-star base, align it with the connecting hole on the bottom of the seat, and join them together to complete the assembly.

Precautions: For the electric chair, it is recommended to use it while charging. Unplug the charger promptly once fully charged. Do not over-charge for an extended period.

Function Usage

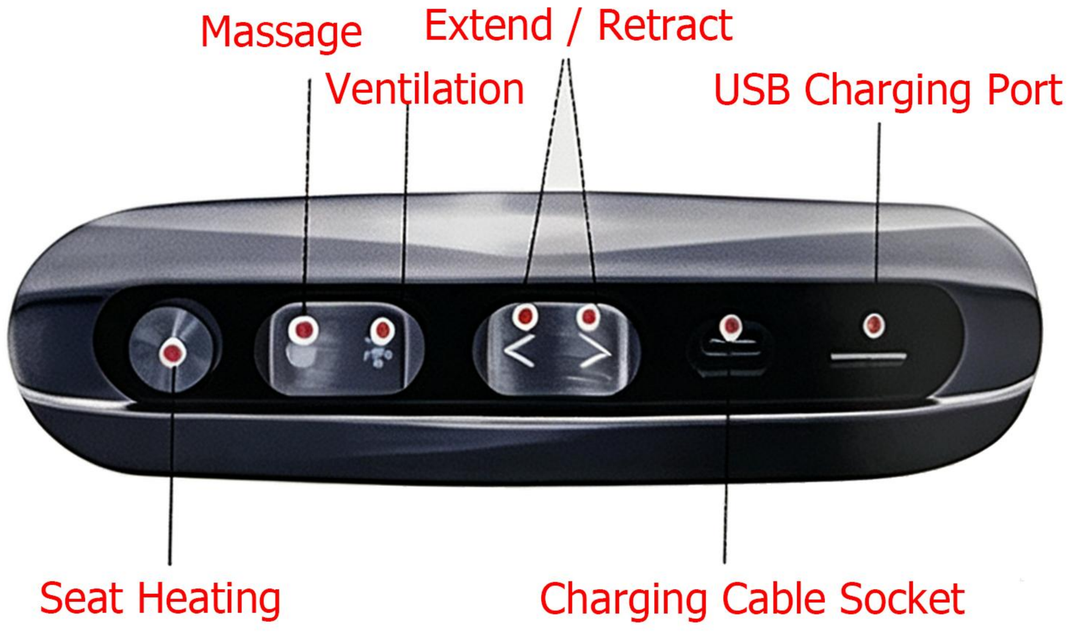

(As shown in the figure above):
The charging port is located on the lower side. Fully charge the device, then unplug the charger before use.

(As shown above):
Push the paddle manually — raise for standing-height position, lower for sitting-height position.

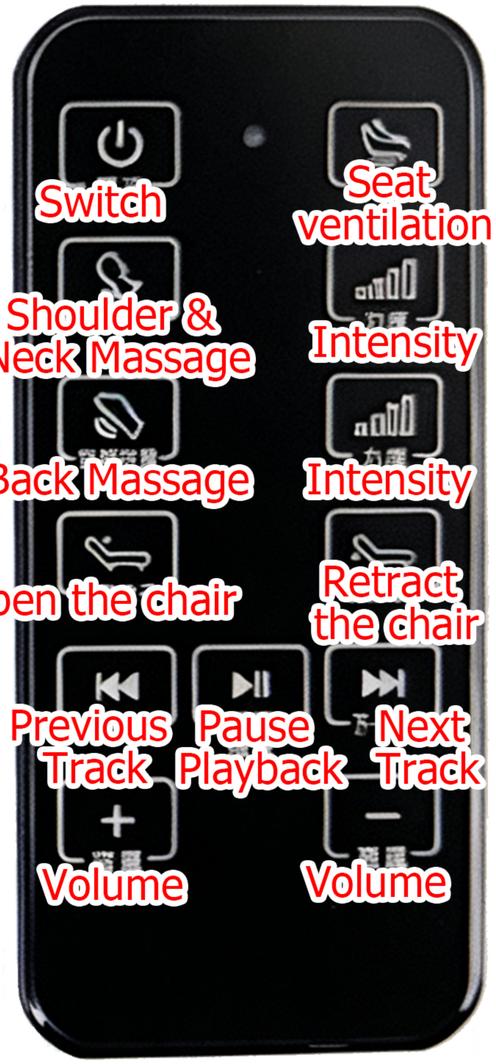

Controlled by Remote Control

First press the power button on the chair, then press the power key on the remote control (massage function will activate automatically). Operate all functions according to the icons and text on the remote control.

Bluetooth connection: For models with heating function, press the Bluetooth key directly. For models without heating function, long-press the play key to switch to Bluetooth mode. Turn on your phone's Bluetooth and find the device name: GuoXing.

Power Button

Voice Control

After receiving the chair, first check whether the power interface at the lower-rear part of the seat cushion is properly connected. Then power on the chair. Press the dedicated side button on the chair. You will hear voice prompt from the chair after pressing. At this point, wake it up by saying the wake-up words: "Smart Chair" or "Xiao Du Xiao Du". After it replies "Yes, Master", say "Please power on". Once it acknowledges the command, you may operate all functions by voice. After each wake-up, you can give the next voice command within 30 seconds after finishing the previous instruction.

【Note: If you only call its wake-up name without saying power-on command, only extending and retracting of the chair are available. You must say "Please power on" at this time.】

Smart Chair

Wake Up & Basic Power On/Off (01-03)

01: Smart Chair | Xiao Du Xiao Du
02: Power on | Please power on
03: Power off | Please power off

Volume Control (04-08)

04: Max volume
05: Min volume
06: Medium volume
07: Turn up the volume
08: Turn down the volume

Music Control (09-14)

09: Play music
10: Stop music
11: Previous track
12: Next track
13: Bluetooth mode | Switch to Bluetooth mode
14: TF card mode | Switch to TF card mode

Massage(15-29)

15: Turn on shoulder massage
16: Turn off shoulder massage
17: Turn on back massage
18: Turn off back massage
19: Turn on massage
20: Turn off massage
21: Gear 1 intensity
22: Gear 2 intensity
23: Gear 3 intensity
24: Max intensity
25: Min intensity
26: Increase intensity
27: Decrease intensity
28: Recline chair
29: Upright chair

Ventilation(30-32)

30: Pause
31: Turn on fan
32: Turn off fan

Volume(33-34)

33: Increase prompt volume
34: Decrease prompt volume
