1

Do not tighten any of the bolts until the item is fully assembled

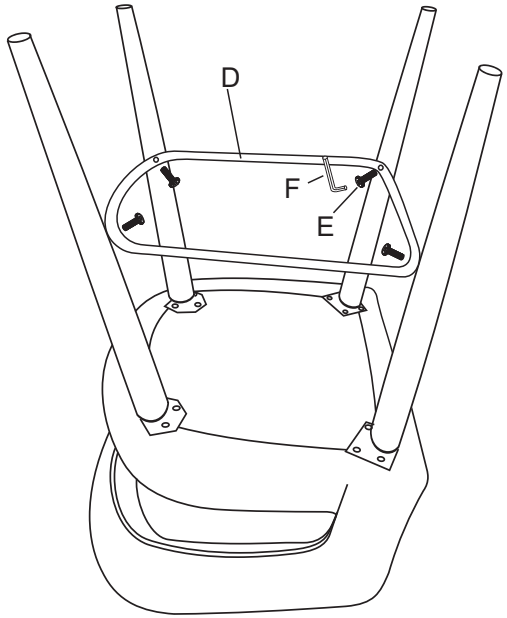

Screw on bolts as shown in the picture. and tighten bolts with approximately 75% of required torque

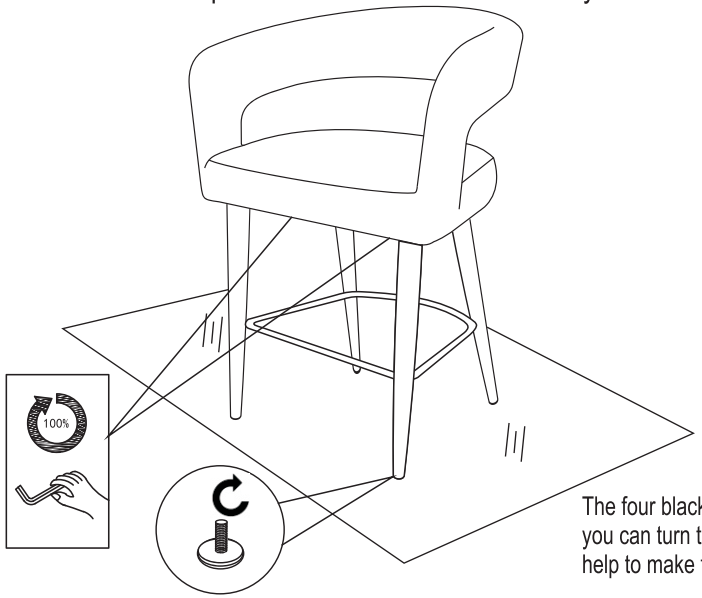

2

3

Place Chair on a totally flat surface and Re-tighten bolts again with 100% of required torque until all screws do not turn anymore

The four black plastic feet are adjusted, you can turn them and adjust its height to help to make the chair stable

4

After finishing assembling,if the four legs are still not on the same level,pls try to switch the position of two front legs A or switch the position of two back legs B.
