40 inch Installation

Step 1

Unpack all the packaging, take out the mirror cabinet, and put it together to measure the total size of the mirror cabinet combination

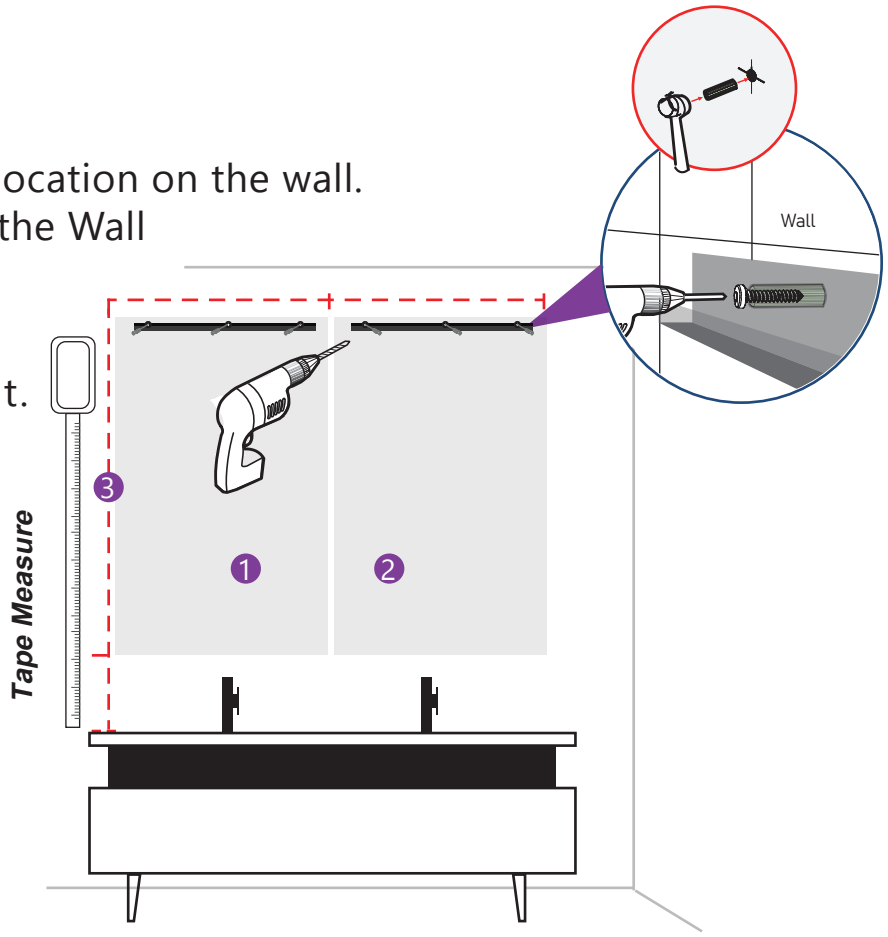

Step 2

Level and mark the cabinet's location on the wall.
Fix Top Mounting Bracket on the Wall

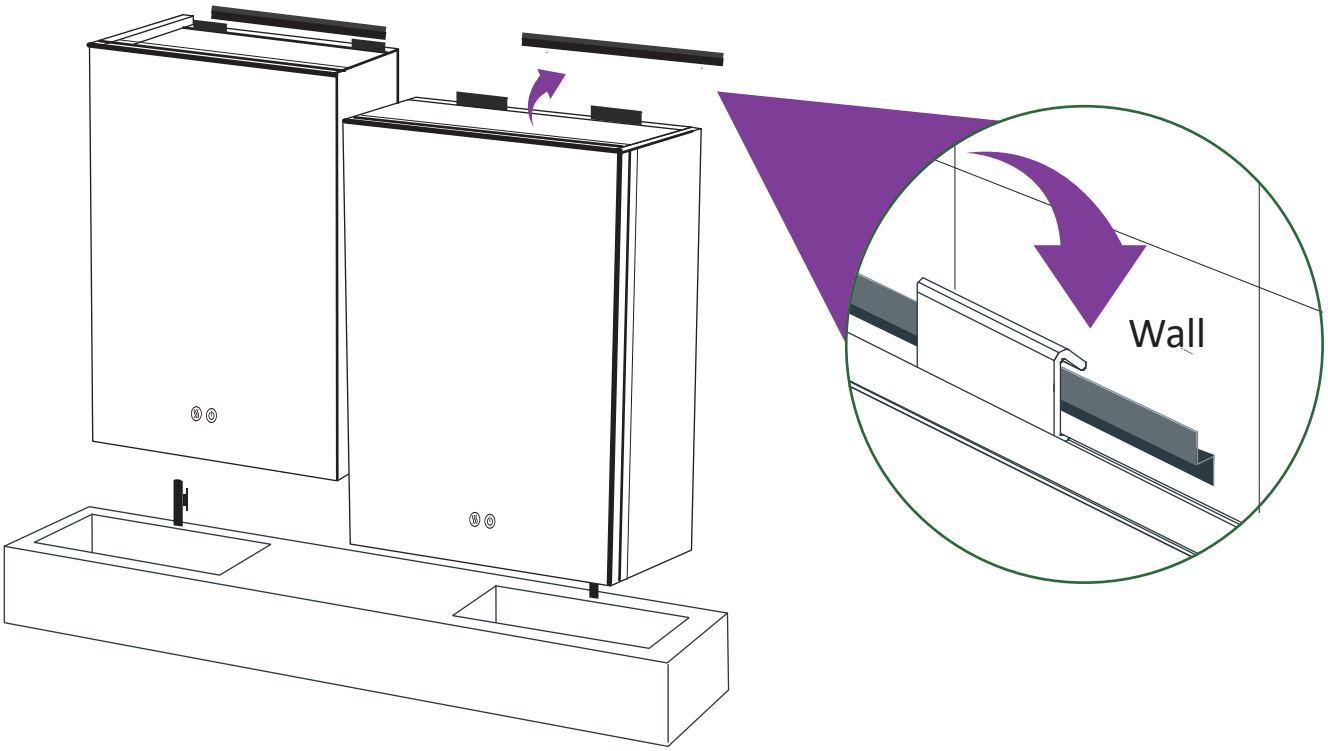

Measure the distance
between the holes
in the Top Mounting Bracket.

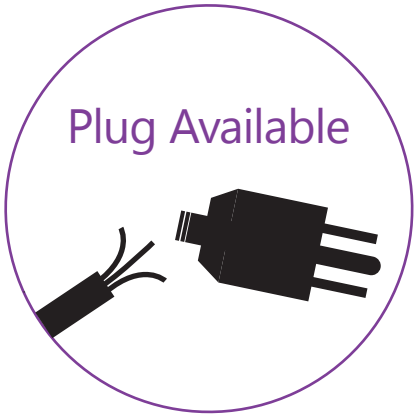

Step 3

Hanging the Cabinet on the top mounting bracket. Make sure top brackets are locked in the grooves.

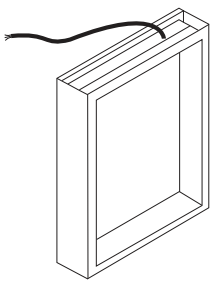

Step 4

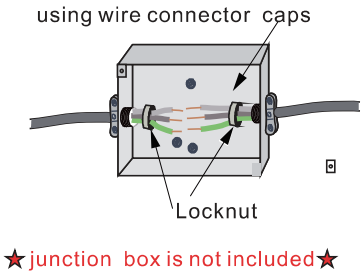

Connect the wire to Junction Box inside the wall.

The electric wire comes through the access hole on the top of the cabinet, exact location of access hole varies depending on the product models. Please refer to the actual product for the exact location.

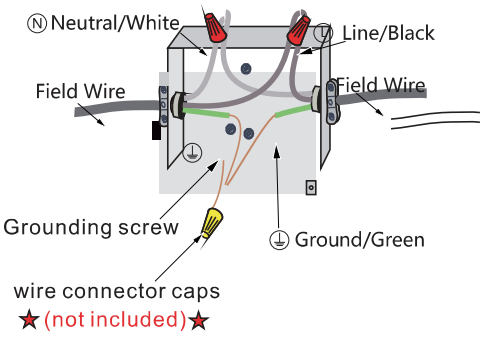

Make connection with Junction box

Neutral to white.
Line to black.
Ground to green.

★junction box is not included★

ALL WIRING SHOULD BE DONE BY A QUALIFIED LICENCED ELECTRICIAN.

⚠ **WARNING:** Shut off power before wiring the cabinet.

Requires 120 VAC 20 Amp GFI protected Circuit.

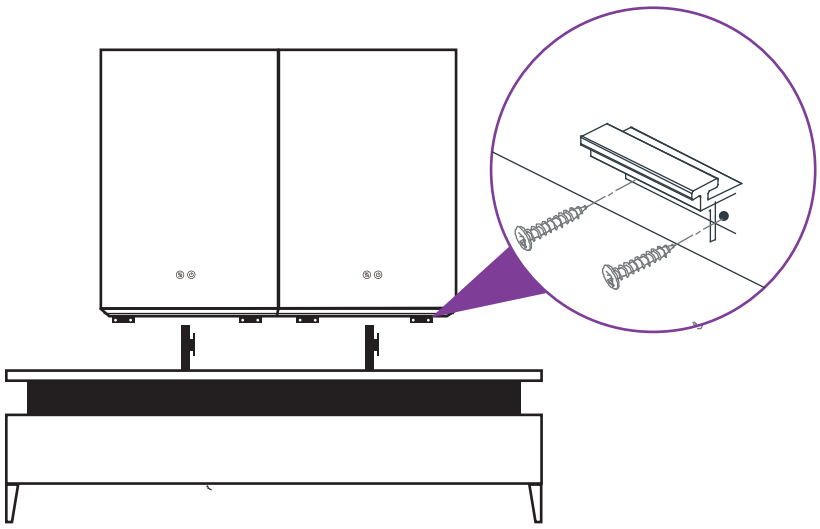

GROUNDING INSTRUCTIONS:

⚠ **CAUTION:** This product must be connected to a grounded metal permanent wiring system or an equipment-grounding conductor must be run with the circuit conductors and connected to the equipment grounding terminal or lead on the product.

⚠ **WARNING:** An Electrical option cabinet must be wired to a 20 Amp GFI (Ground Fault Interrupter) protected circuit when used in bathrooms and all other locations required by the National Electric Code.

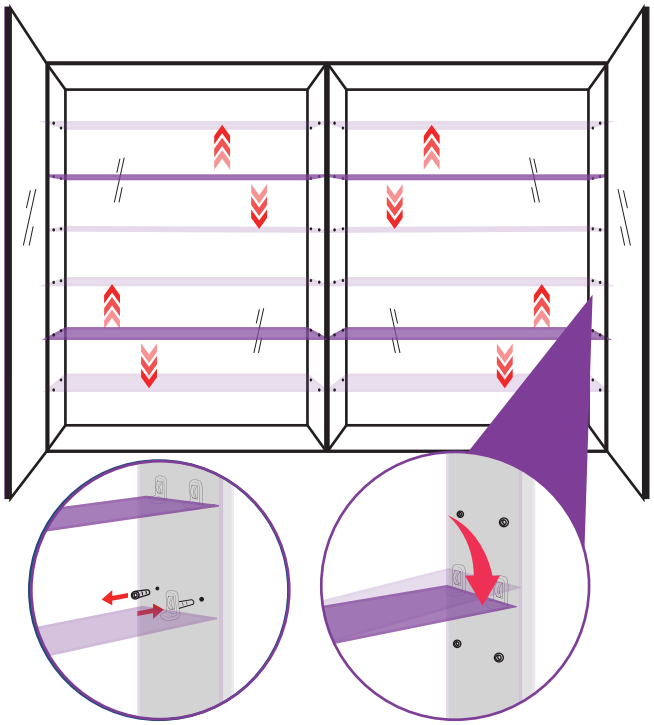

Step 5

Move the cabinet to the right position and screw in the bottom supporting bracket and fix it.

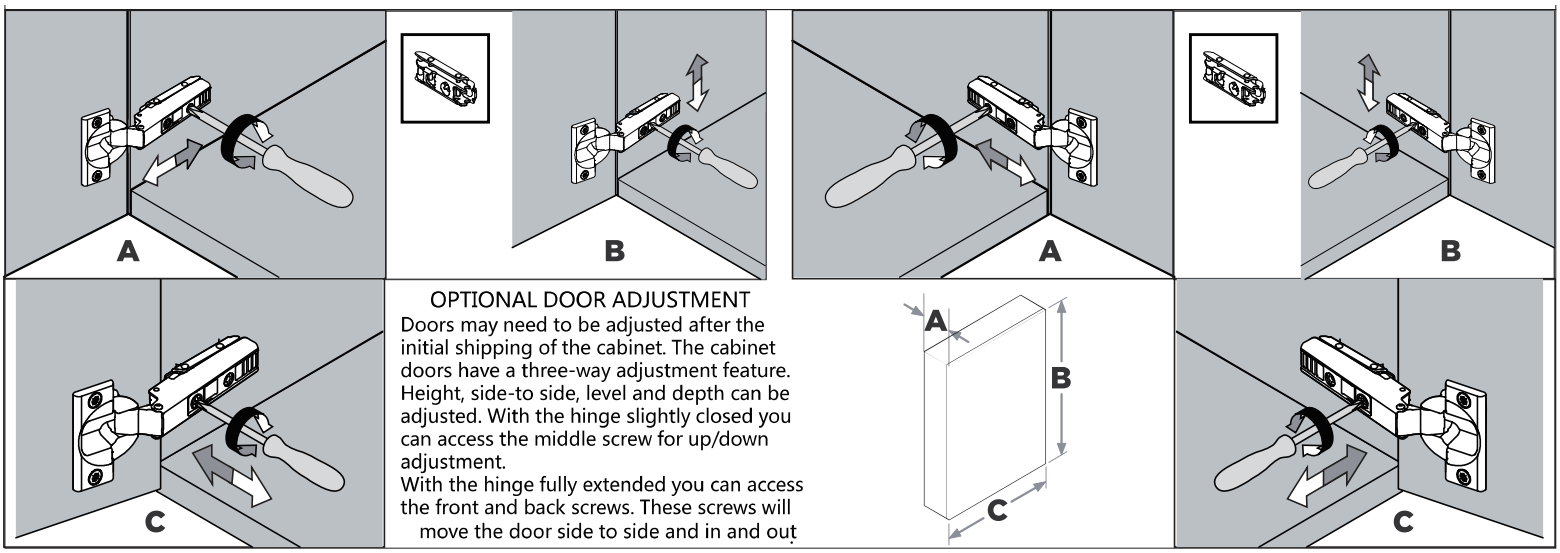

Step 6

According to you own needs and preferences, adjust and install the height of the glass shelves, first insert the transparent glass clip, then put the glass shelves on the clip, pay attention to the level of the glass.

Step 7

If the cabinet door does not close well or unbalanced, it is necessary to adjust the hinge.

OPTIONAL DOOR ADJUSTMENT

Doors may need to be adjusted after the initial shipping of the cabinet. The cabinet doors have a three-way adjustment feature. Height, side-to side, level and depth can be adjusted. With the hinge slightly closed you can access the middle screw for up/down adjustment.

With the hinge fully extended you can access the front and back screws. These screws will move the door side to side and in and out
