Wiring diagram

Installation instructions

- Use DC12/24V power supply.
- Install the WIFI controller correctly.
 - Use screw to fix it
 - Use 3M tape to fix it
- Please unfold the LED strip to avoid the overheat issues. Please connect the cables of LED strip with the right position on the controller. Test the APP to check if it can control the LED strip correctly. If everything goes well, just keep going.
- Check and ensure the power supply, WIFI controller and LED strip are connected correctly.

Attentions

- Do not put any metal around the WIFI controller, which could blocked WiFi signal
- Ensure power supply and controller are connected correctly.
- The power supply output voltage should be same as LED strip working voltage.
- Do not cover anything on the surface of power supply, WIFI controller and LED strip.
- Ensure the connection is correct before powering.
