

# LED lighting instructions

Please read the instructions carefully before use,  
and please keep them for reference

## Product features

- Beautiful shape and smooth lines
- High efficiency, energy saving and environmental protection
- Good color rendering and long service life
- How to speak? Suable performance safety and reliability
- Simple installation and wide applicability
- Luminous uniform temperature rise

## Matters need attention

1: In order to ensure the safe installation, maintenance and inspection of lamps, please entrust professionals to install them.

Non-professionals are prone to danger in construction.

2: Under no circumstances can lamps be covered by thermal insulation pads or similar materials (such as foam, plastic, etc.).

3: Please cut off the power supply before installation and maintenance.

4: When the lamp is abnormal, please cut off. Align the lamp body into the base seller or manufacturer.

5: Pay attention to the different moisture-proof and waterproof grades between lamps and lanterns, screwdriver and choose the use occasion correctly.

6: If you have any questions, please contact the dealer or manufacturer.

## Method of erection

Step 1.

Mark holes in the walls  
and attach the base to the walls

Step 2.

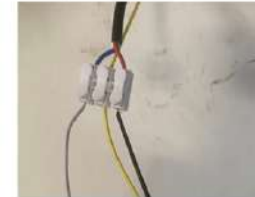

First, screw the threaded pipe from the accessory kit onto the decorative part. Then loosen the two nuts on the edge of the cover to separate the lamp holder from the cover, and screw in the light bulb.

Step 3.

Place the assembled decorative part into the hole at the bottom of the frame and secure it with a nut. Then fit the frame onto the cover and tighten it with the previously loosened nuts.

Step 4.

Connect the wire, power up,  
and the lamp can work normally

Step 5.

Align the lamp body into the base  
and lock the lamp with a  
screwdriver
