

Installation Instructions and Usage Functions

Steps for Installing a Mobile Partition

Each side of the cabinet panels has 6 adjustable holes, arranged in upper, middle, and lower rows, totaling 12 holes for flexible height adjustment. Follow these installation steps: 1. First, insert a peg into the middle hole of one panel, then repeat the same on the other panel; 2. Once all pegs are firmly inserted, place the adjustable shelf on the pegs to finish. Note: The adjustable shelf can be removed at any time, and you can modify the height by adjusting the pegs to different holes.

Cabinet Leg Installation Steps

1. Align the mounting holes on the top of the cabinet legs with the pre-drilled holes on the cabinet base;
2. Slide the washers onto the screws, then insert the screws into the aligned holes;
3. Align the wrench with the screw heads and tighten, ensuring the cabinet legs are secure and stable with no wobble;
4. Repeat the above steps for the remaining cabinet legs.
