

Dry & Wet Steam Room Series instruction for installation

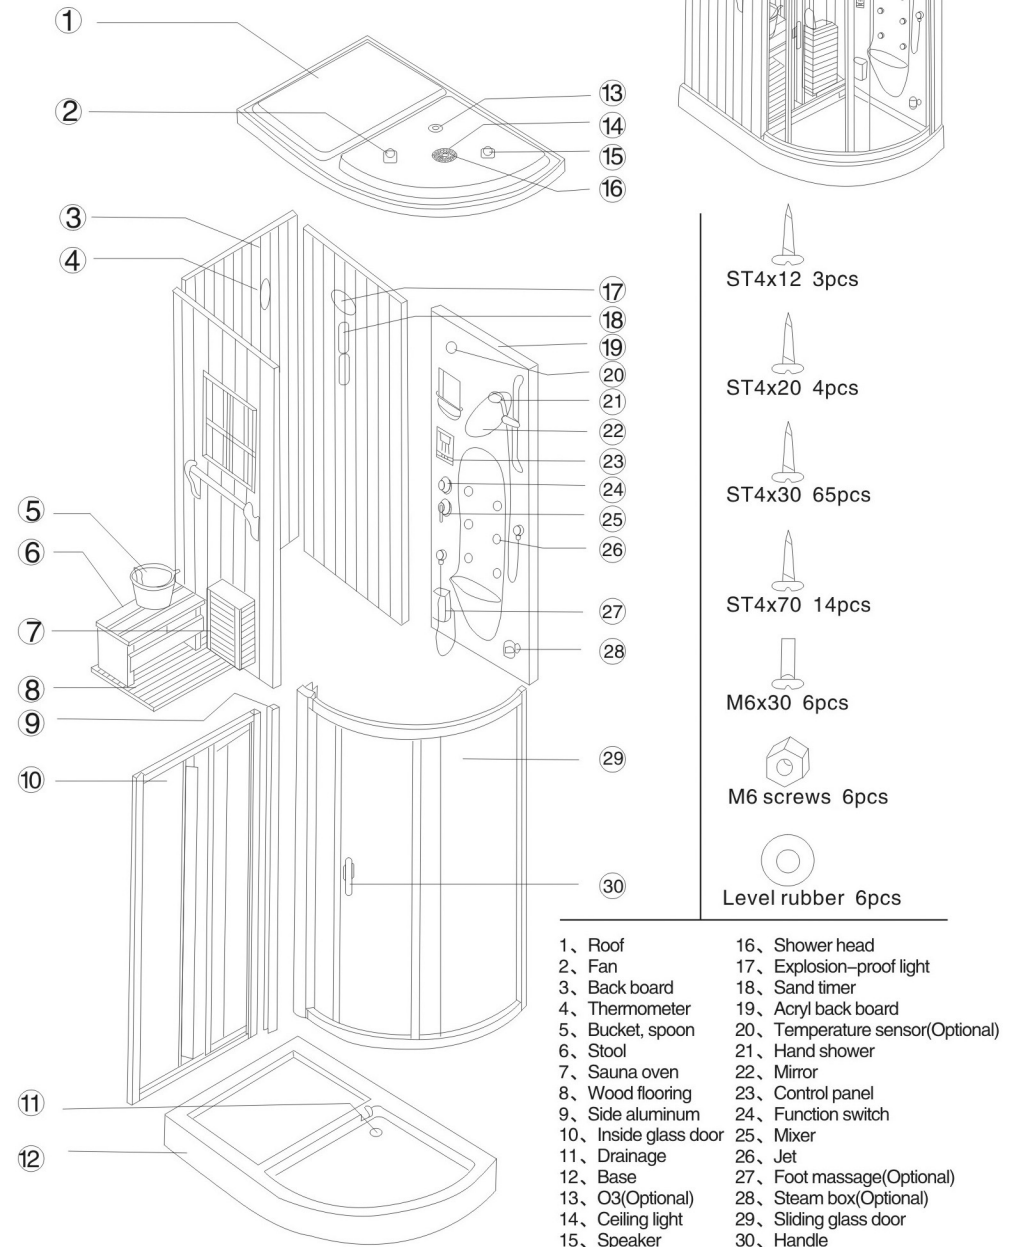

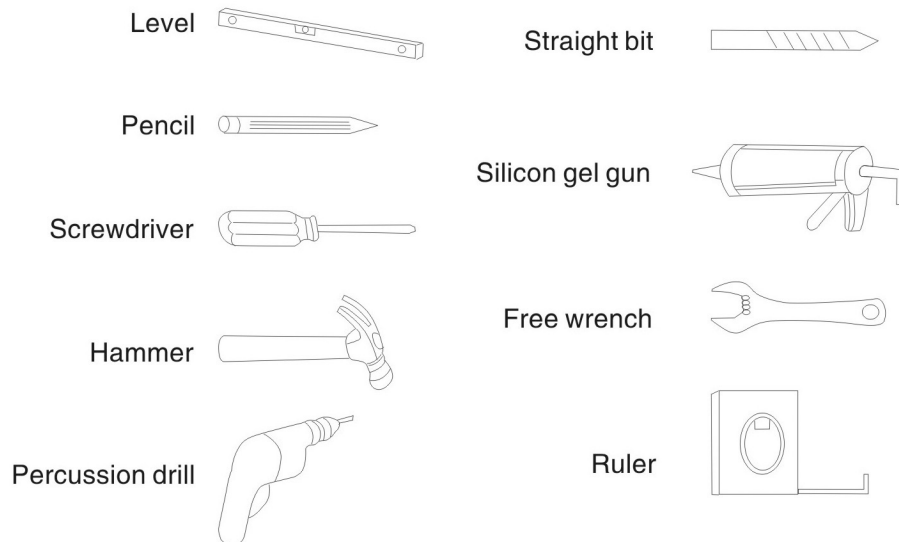

Notes for Installation

- 1、 Please read the Installation & Operation Manual as carefully before the installation, and carry out the installation as required.
- 2、 Check the parts unwrapped, and put the glass vertically against the wall. It may damage the glass arranged horizontally.
- 3、 Move the glass unwrapped vertically by two persons.
- 4、 Don't knock on the glass forcefully, or it may damage the glass.

Maintenance and Clean

- Thoroughly clean all parts of the shower room by a piece of cloth Soaded with the neutral detergent (cleanser, soap and water) in normal conditions.
- Don't use the strong detergent, alcohol, gasoline, thinner, acetone and other organic solvents.
- Use the low-density vinegar lipid to eliminate the sticky dirt, and rinse with water then.

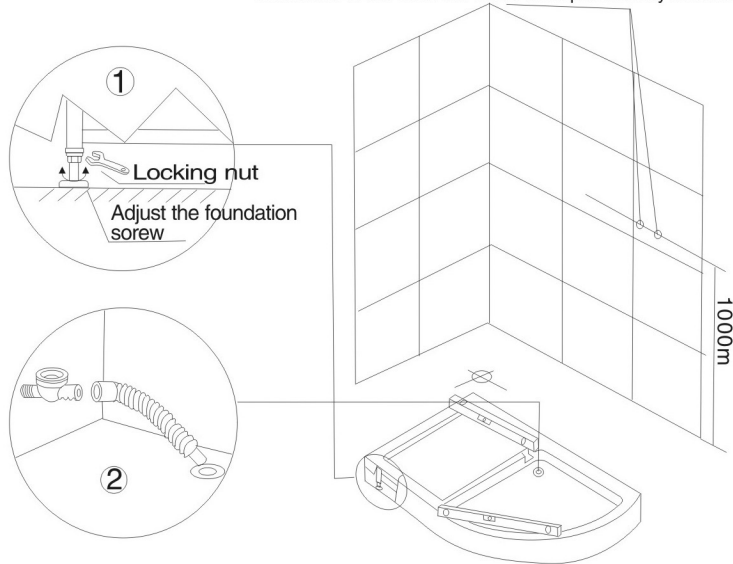

Installaion Tools

Installation Step I: Install the Base Tub

- 1、Adjust the foundation screws to level the base tub and calibrate it with the level as shown in Fig. (1)
- 2、Connect the water outlet to the strainer provided by the user by a flexible hose as shown in Fig. (2)

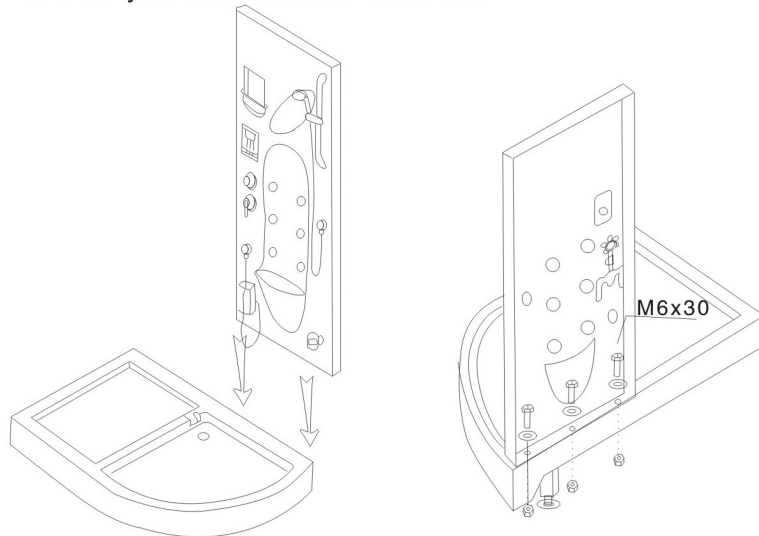

Connector to the cold/ hot water hose provided by the user

Installation step II:

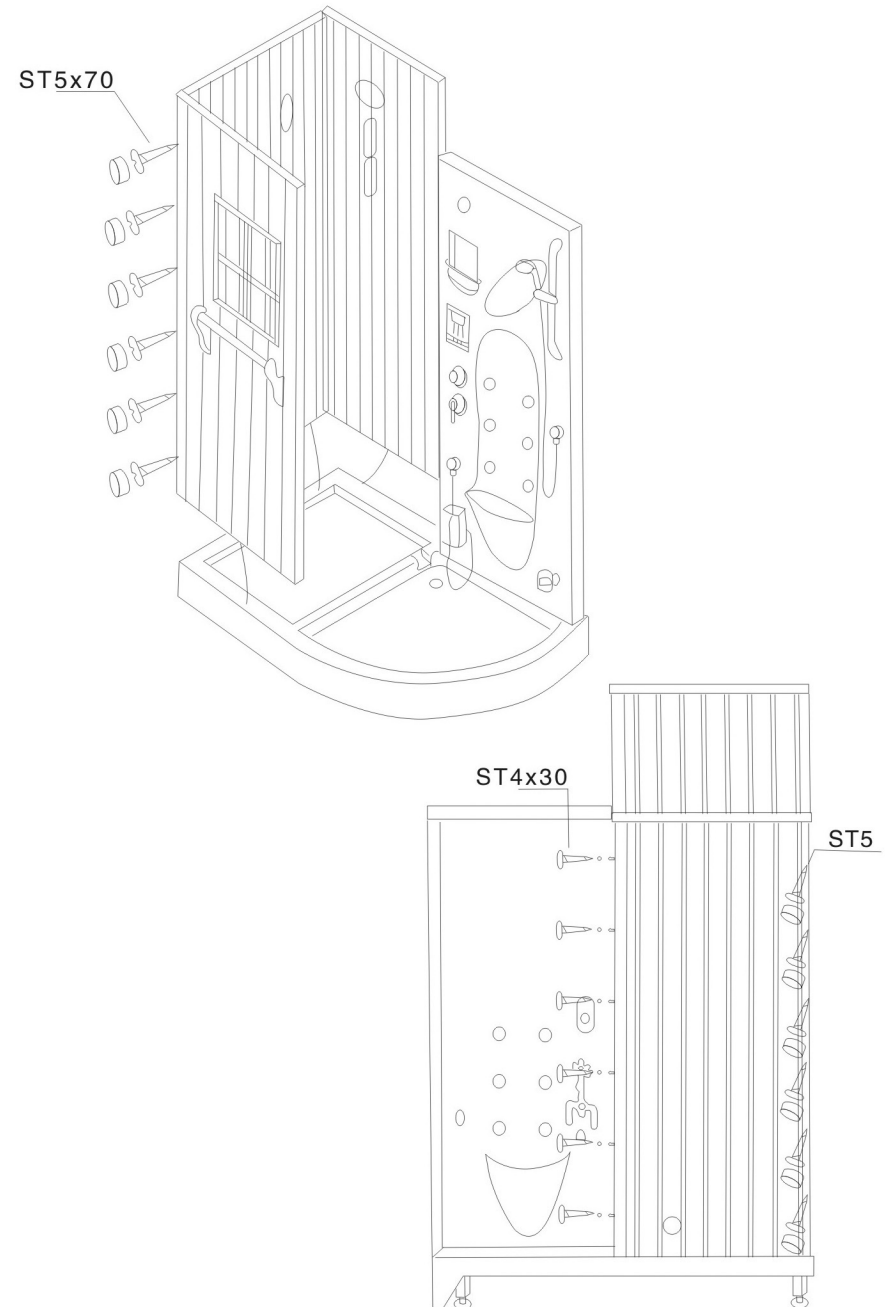

Connect the Acrylic Back Plate and Base Tub

Put the acrylic back plate on the base tub as per the arrow indication, find the screw holes on both the acrylic back plate and the base tub, and firmly connect them with M6 screws.

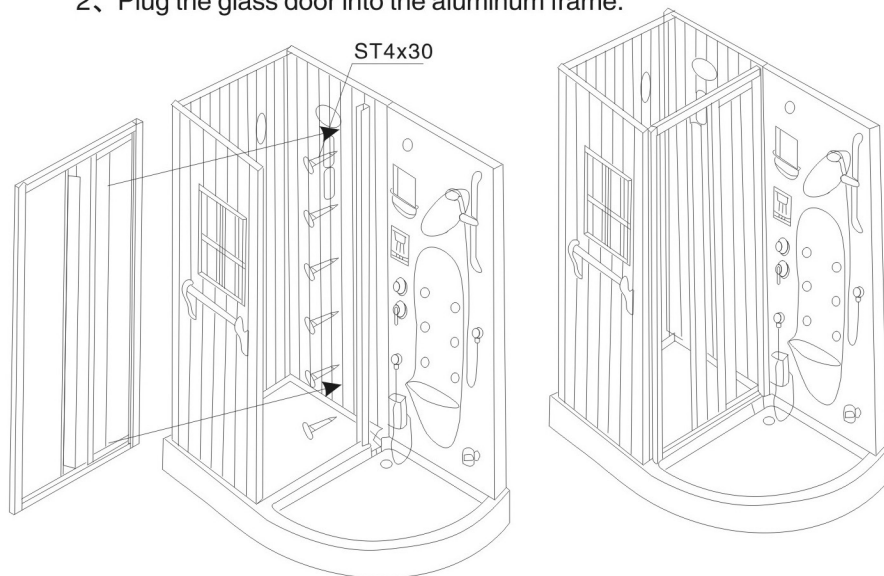

Installation step III: Install the wood Back Plate

Put the wood back plate on the base tub as per the arrow indication, find the screw holes on both the wood back plate and the base tub, and firmly connect them with screws.

Installation Step IV: Install the Inner Free Glass Door

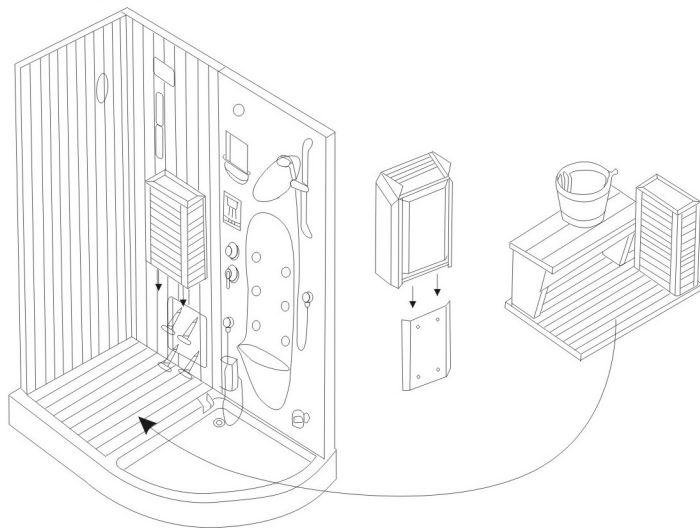

- 1、 Assemble the side aluminum to the wood back with screws;
- 2、 Plug the glass door into the aluminum frame.

Installation Step V:

Assemble the wood back and sauna oven

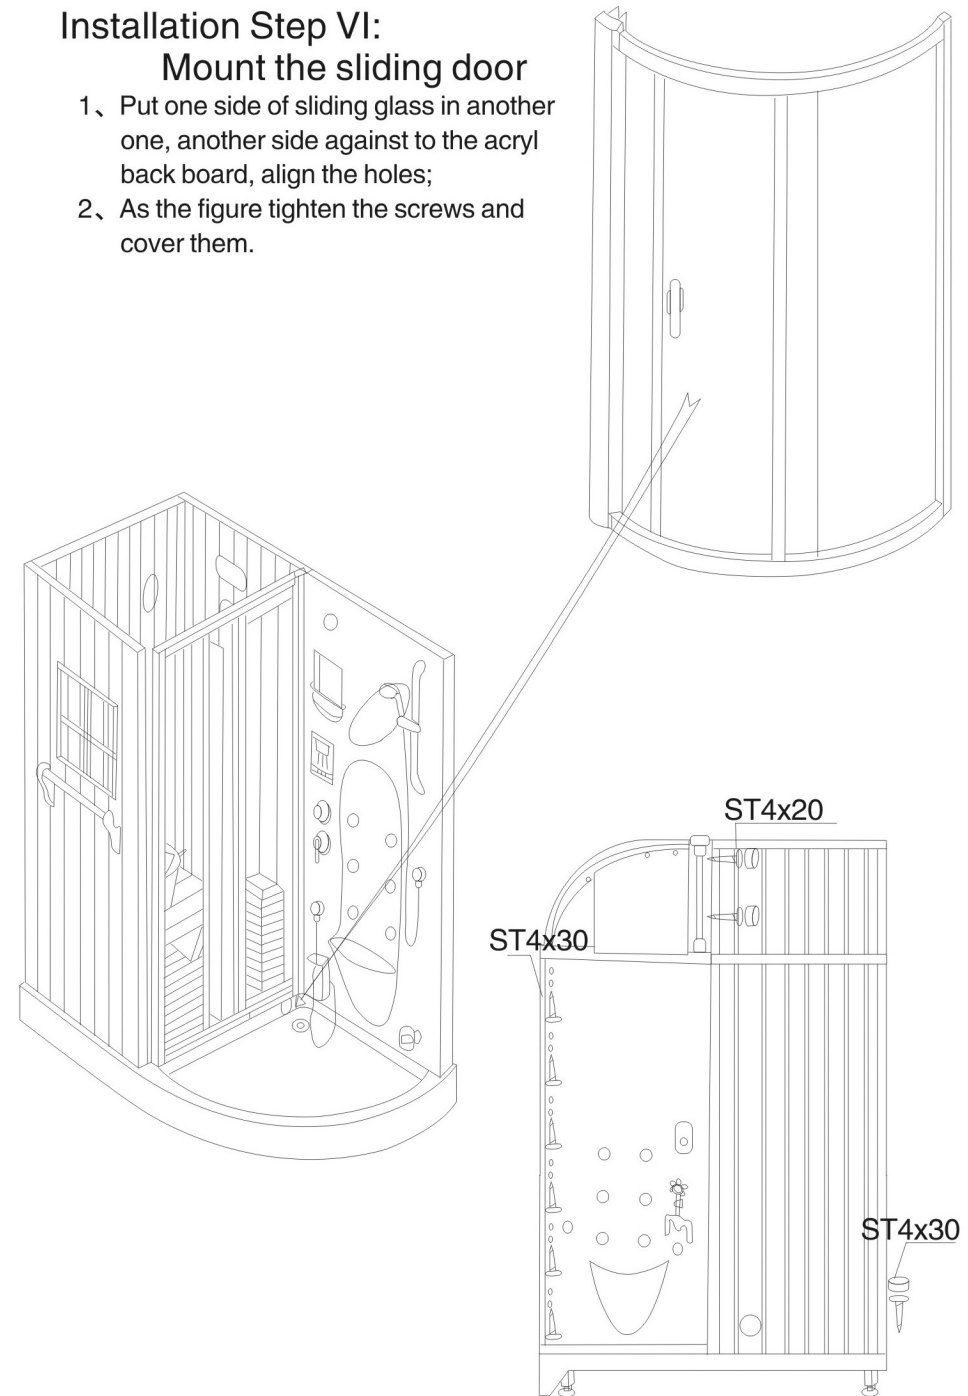

- 1、 Put the wood flooring on the base, group the wood stool and put on the flooring, mount the thermometer, explosion-proof light, sand timer on the wood back. Put the wood bucket, spoon on the stool;
- 2、 Take out the stainless steel hook and mount it on the wood back;
- 3、 Hang the oven to the stainless steel hook.

Installation Step VI:

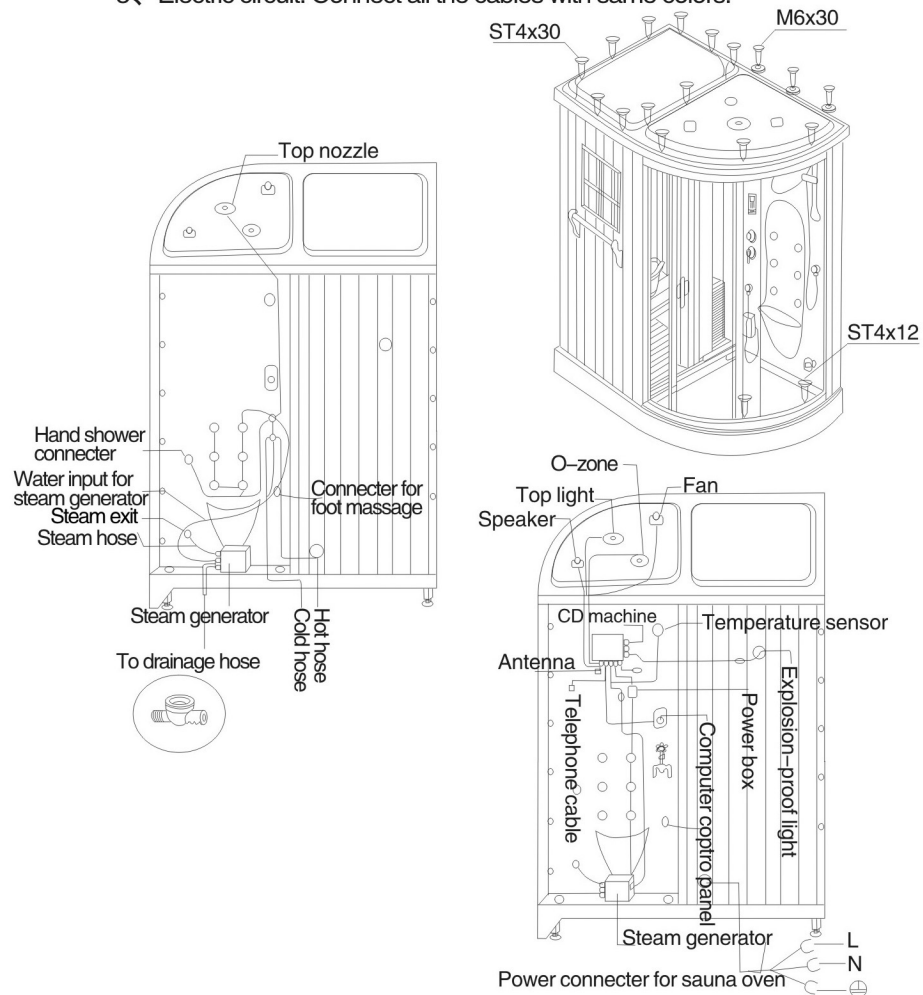

Mount the sliding door

- 1、 Put one side of sliding glass in another one, another side against to the acryl back board, align the holes;
- 2、 As the figure tighten the screws and cover them.

Installation Step VI: Mount roof (water and electric circuit)

- 1、Put the roof on the body, align the holes and screw them;
- 2、Connect the bottom frame with base by screws;
- 3、Mount hand shower, foot massage to the back glass with water hose;
- 4、Water circuit: Connect the jets, massage, hand shower and shower head to the mixer;
- 5、Electric circuit: Connect all the cables with same colors.

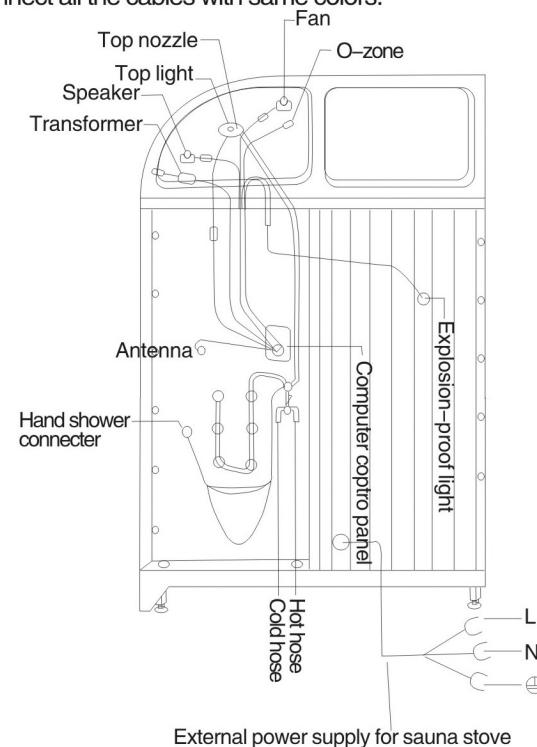

Warning:

Only qualified workers can mount this product.
The earth wire must be connected properly.
Factory won't take any responsibility because of wrong earth wire connecting.
Please check all the wires connected correctly before switch on the machine.
Factory won't inform every user in case the technology data will be updated.

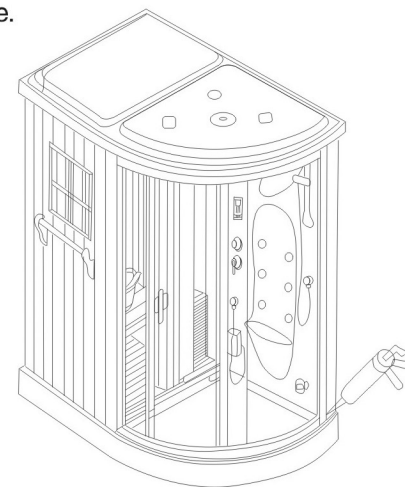

Installation Step VIII: Water and electric circuit for sauna room

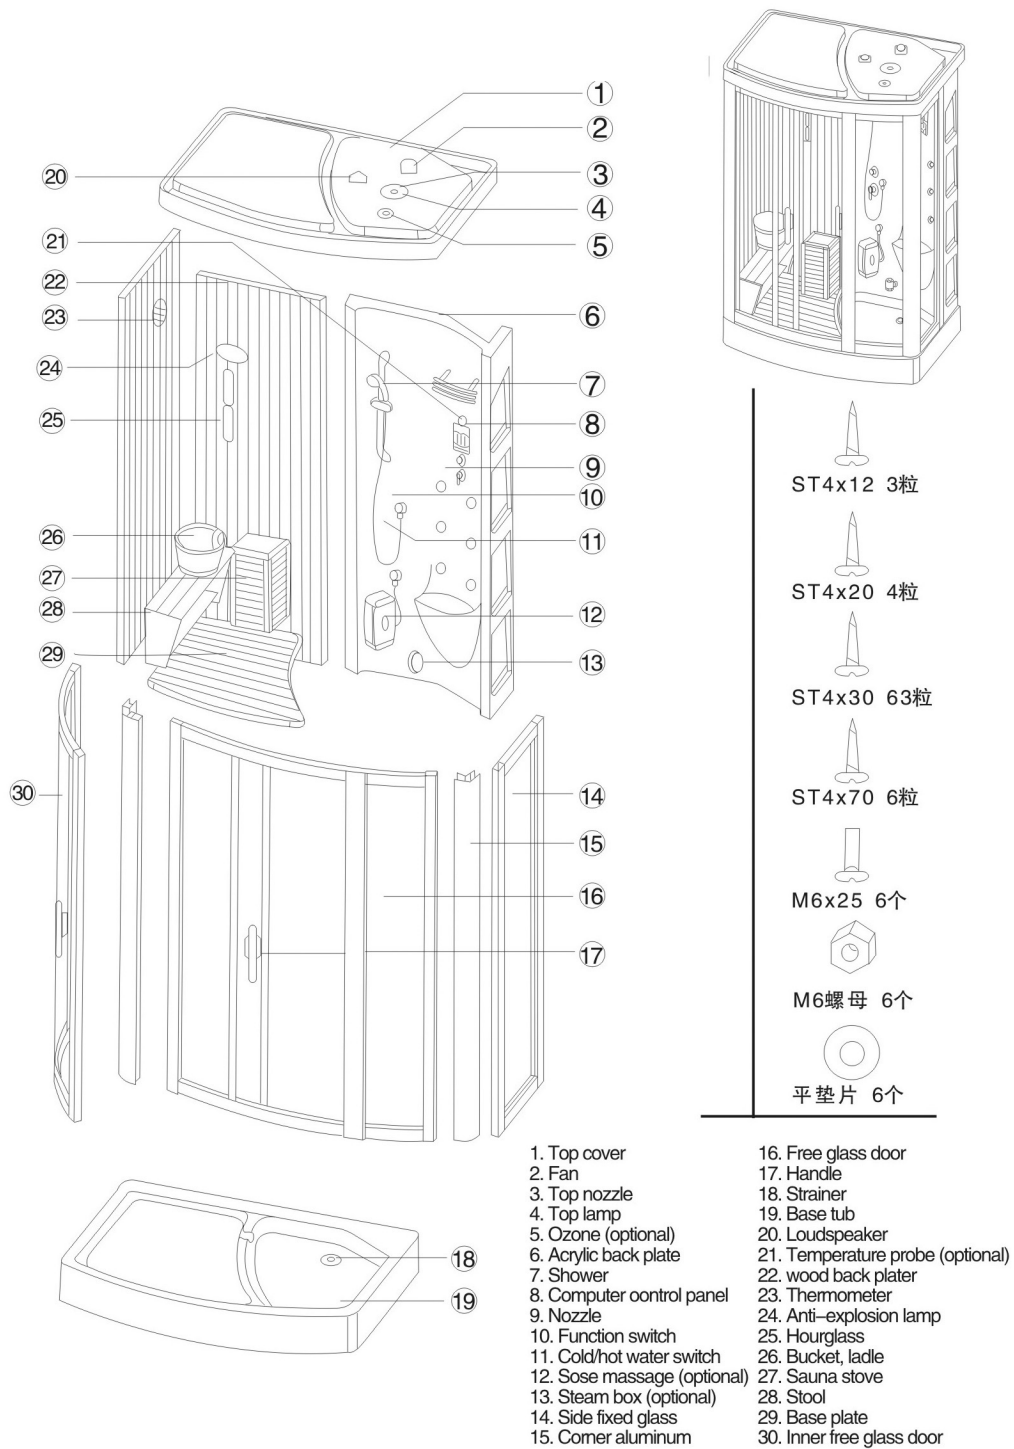

- 1、Water circuit: Connect the jets, massage, hand shower and shower head to the mixer;
- 2、Electric circuit: Connect all the cables with same colors.

Installation Step IX: Seal neutral glass silicon

1. Seal all the connecting gaps with silicon and wait for 24 hours to use;
2. Connect the power and phone cable.

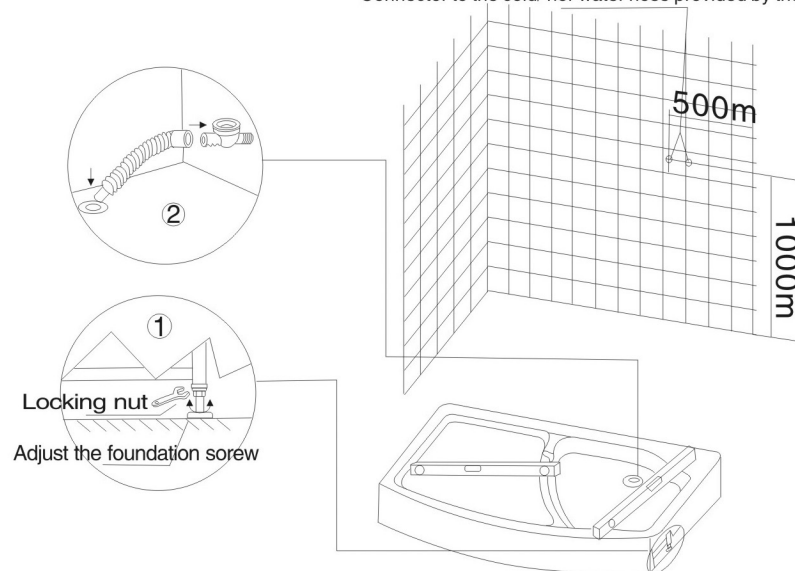

Installation Step I: Install the Base Tub

- 1、Adjust the foundation screws to level the base tub and calibrate it with the level as shown in Fig. (1)
- 2、Connct the water outlet to the strainer provided by the user by a flexible hose as shown in Fig. (2)

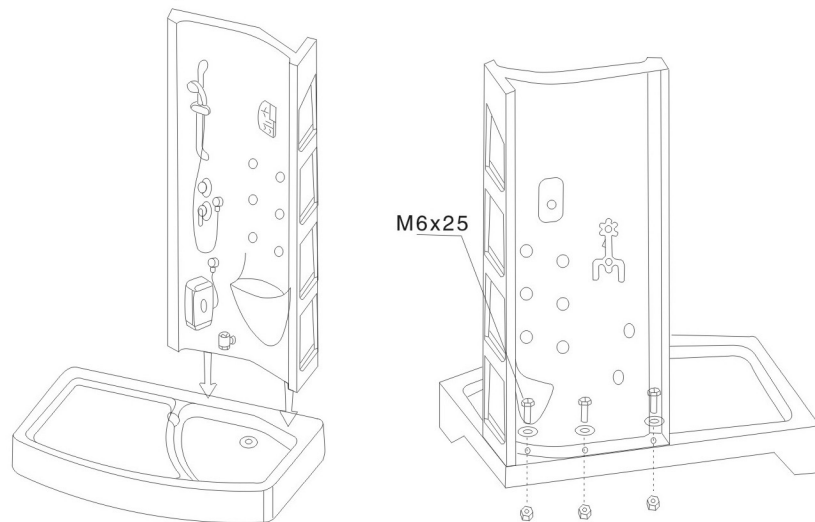

Connector to the cold/ hor water hose provided by the user

Installation step II:

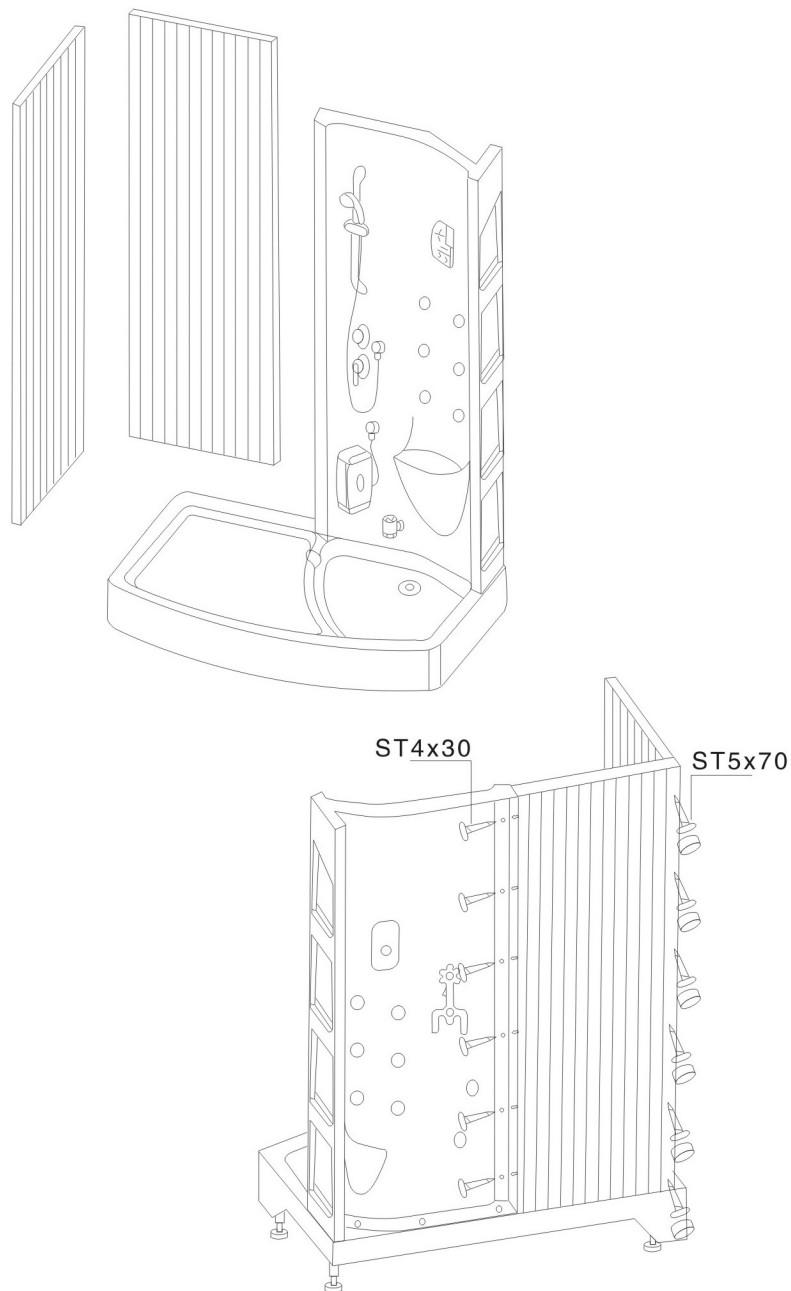

Connect the Acrylic Back Plate and Base Tub

Put the acryliv back plate on the base tub ad pet the arrow indication, find the screw holes on both the acrylic back plate and the base tub, and firmly connect them with M6 screws.

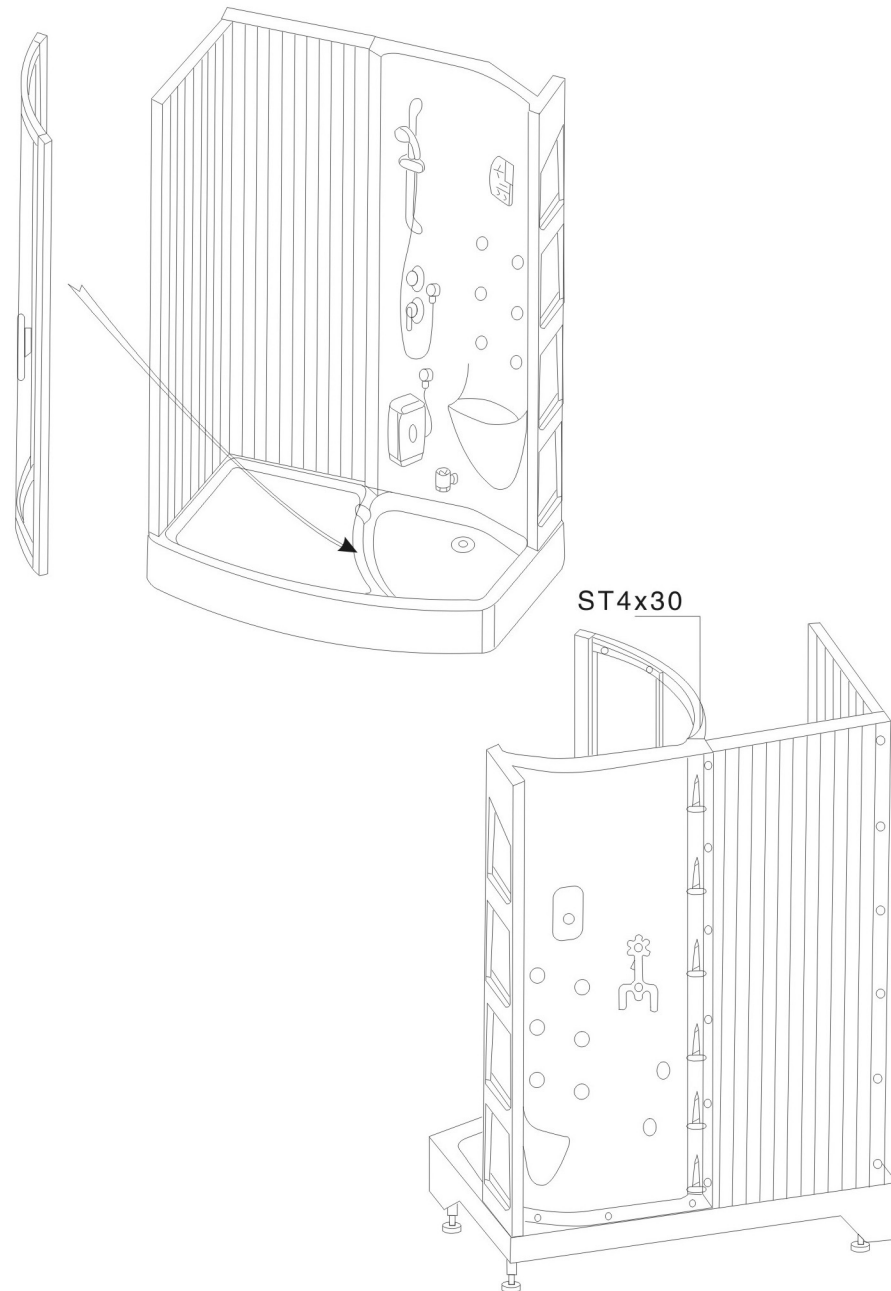

Installation step III: Install the wood Back Plate

Put the wood back plate on the base tub as per the arrow indication, find the screw holes on both the wood back plate and the base tub, and firmly connect them with screws.

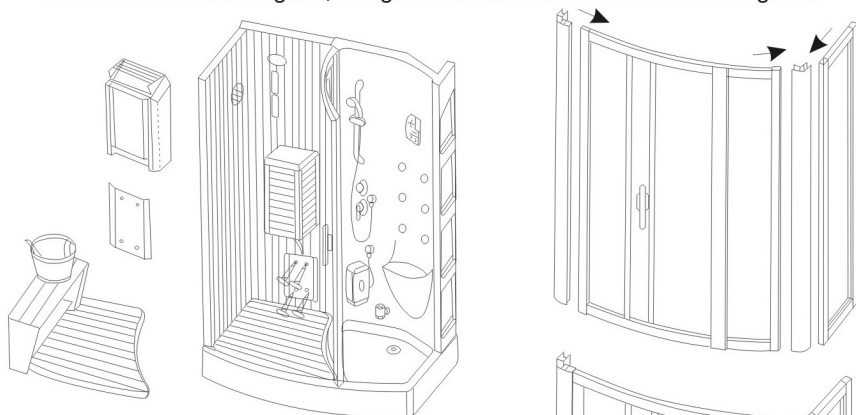

Installation Step IV: Install the Inner Free Glass Door

Put the inner free glass door on the base tub as per the arrow indication, find the screw holes on both the free glass door and the base tub, and firmly connect them with screws.

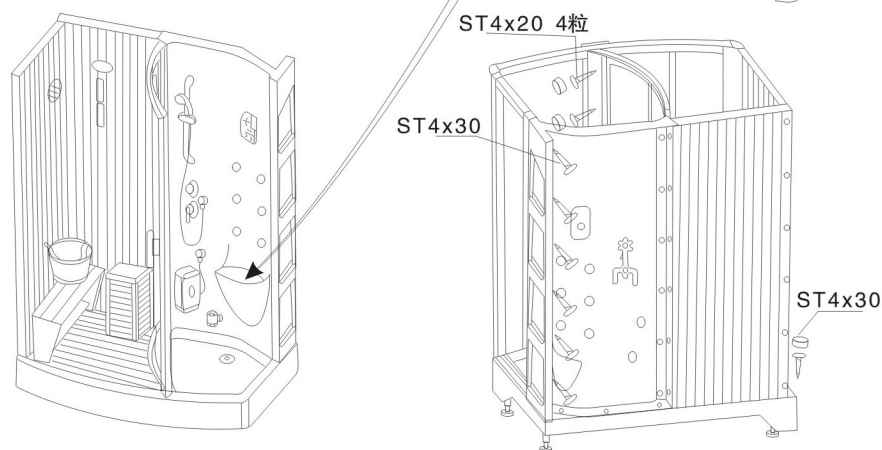

Installation Step V: Install the Wood plate and Sauna stove

1. Put the base plate on base tub, assemble the stool with tapping screws and put it on the base plate, fix the thermometer, Anti-explosion lamp and hourglass on the wood back plate with the tapping screws, and arrange the bucket and ladle on the stool.
2. Remove the stainless piece from the back to the sauna stove, and fix it on the wood back plate with the screws.
3. Reinsert the sauna stove on the stainless piece.
4. Assemble the side fix glass, free glass door and the corner aluminum together.

Installation Step VI: Install the Free Glass Door

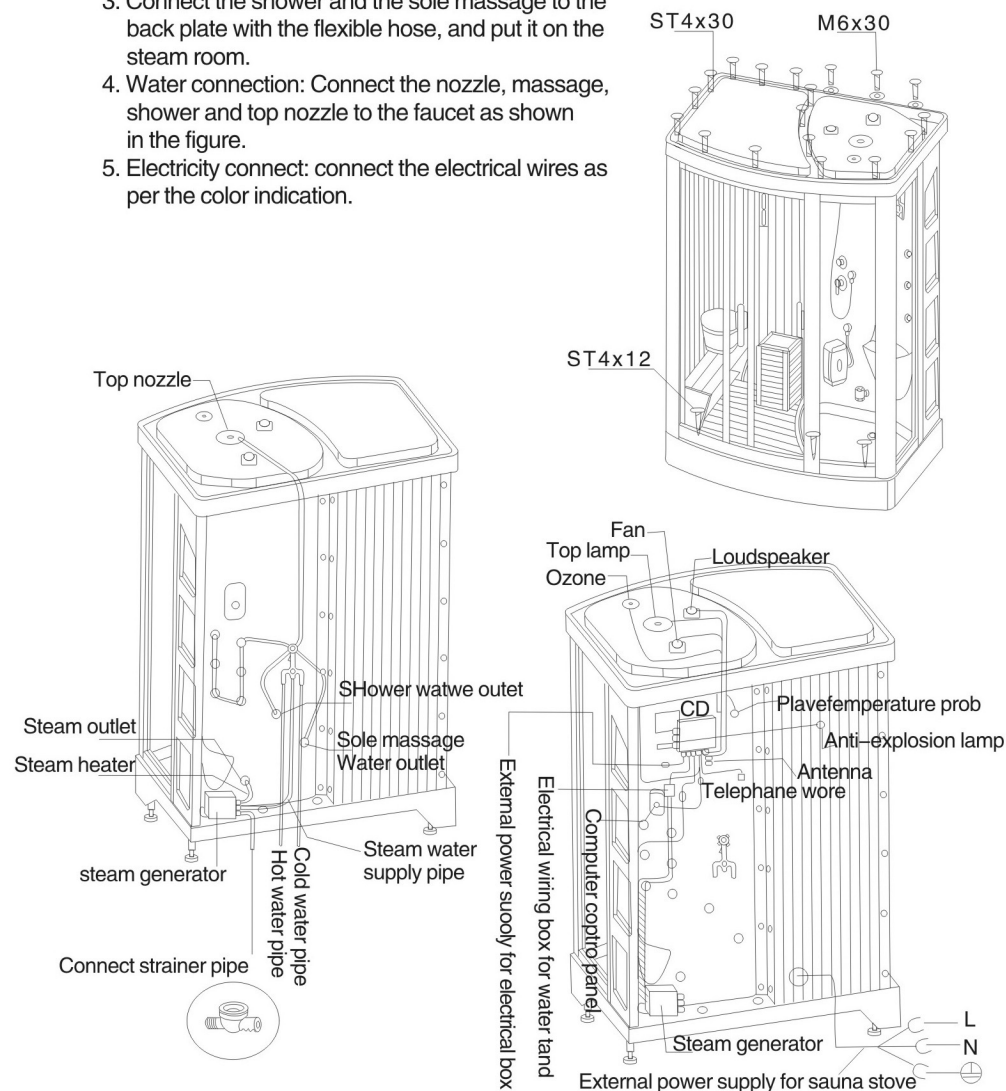

1. Connect one side of the free glass door to the wood back plate by the corner aluminum, the middle to the inner free glass door, and the other side to the acrylic back plate. Find out all screw holes.
2. Fix the decorative cover with the tapping screws as shown in the figure.

Installation Step VII:

Install the Top Cover(Water & Electricity Connections)

1. Put on the top cover, find out the screw holes and fix the cover with the screws.
2. Fix the lower track and the base tub with the tapping screws.
3. Connect the shower and the sole massage to the back plate with the flexible hose, and put it on the steam room.
4. Water connection: Connect the nozzle, massage, shower and top nozzle to the faucet as shown in the figure.
5. Electricity connect: connect the electrical wires as per the color indication.

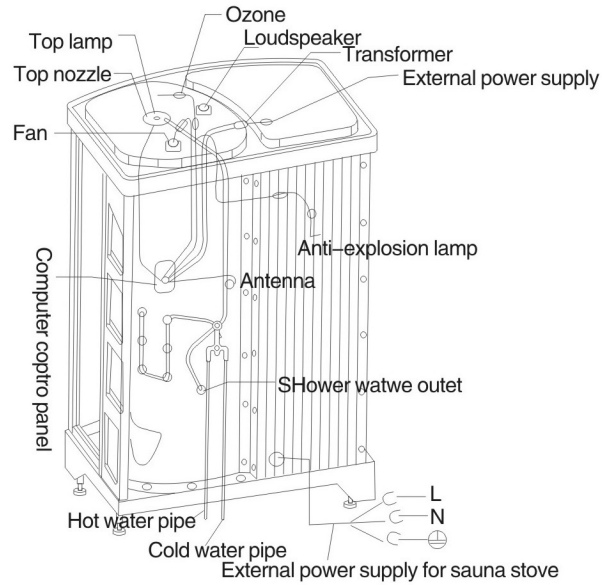

Warnings:

The manufacturer shall be never liable for any by the
 Pualified electrician with reliable grounding.
 The manufacturer shall be never liable for any damage
 Caused by the poor grounding !
 Check the wiring before switching on power supply!
 No further notice shall be give in case of any change
 on the technical information!

Installation Step VIII: Overall Water & Electricity Connections

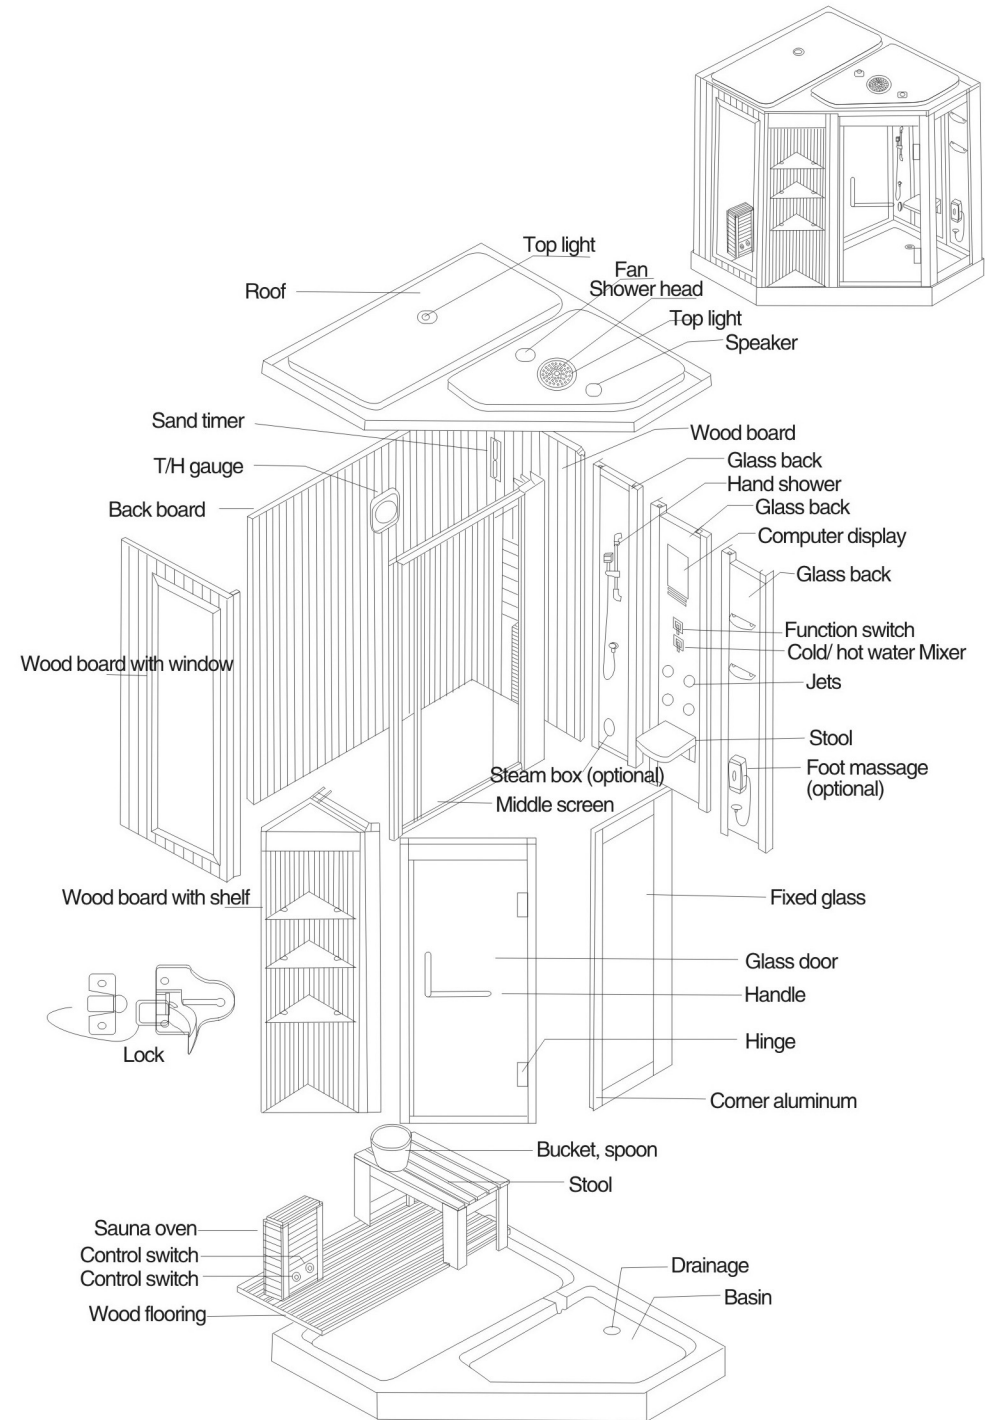

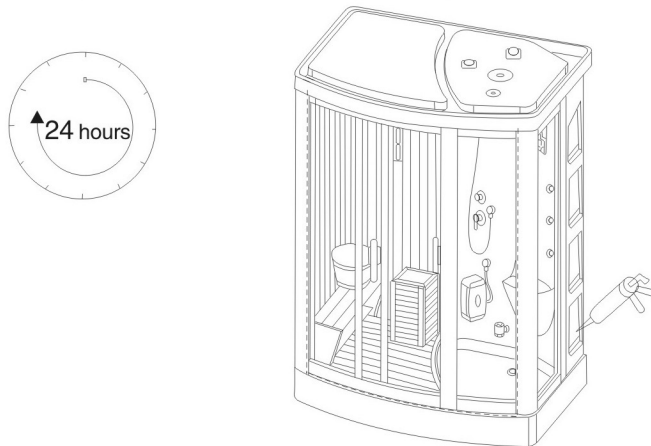

1. Water connection: Connect the nozzle, massage, shower and top nozzle to the faucet as shown in the figure.
2. Electricity connection: connect the electrical wires as per the color indication.

Installation Step IX: Apply the Neuter glass glue sealing

As shown with the figure dashed line in the figure:

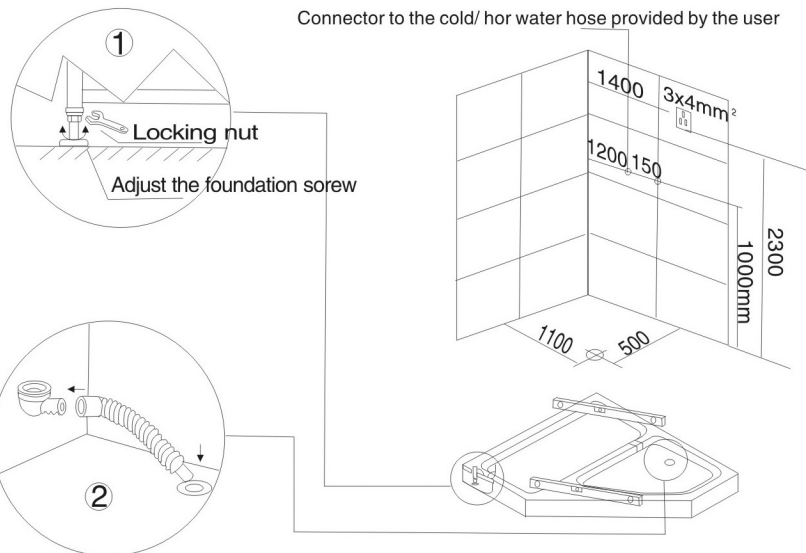

1. Apply the silicon glue at all joints to avoid the possible water leakage.
2. Connect the power wires and telephone wire properly.

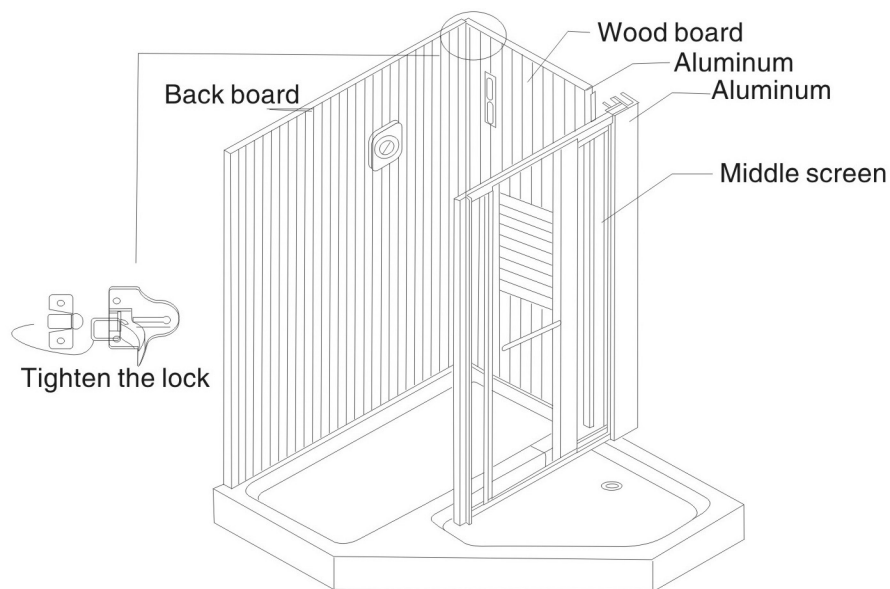

Assembling Steps:

- 1、Adjust the base legs to be horizontal (Figure 1);
- 2、Connect the water hoses to the prepared connectors (Figure 2).

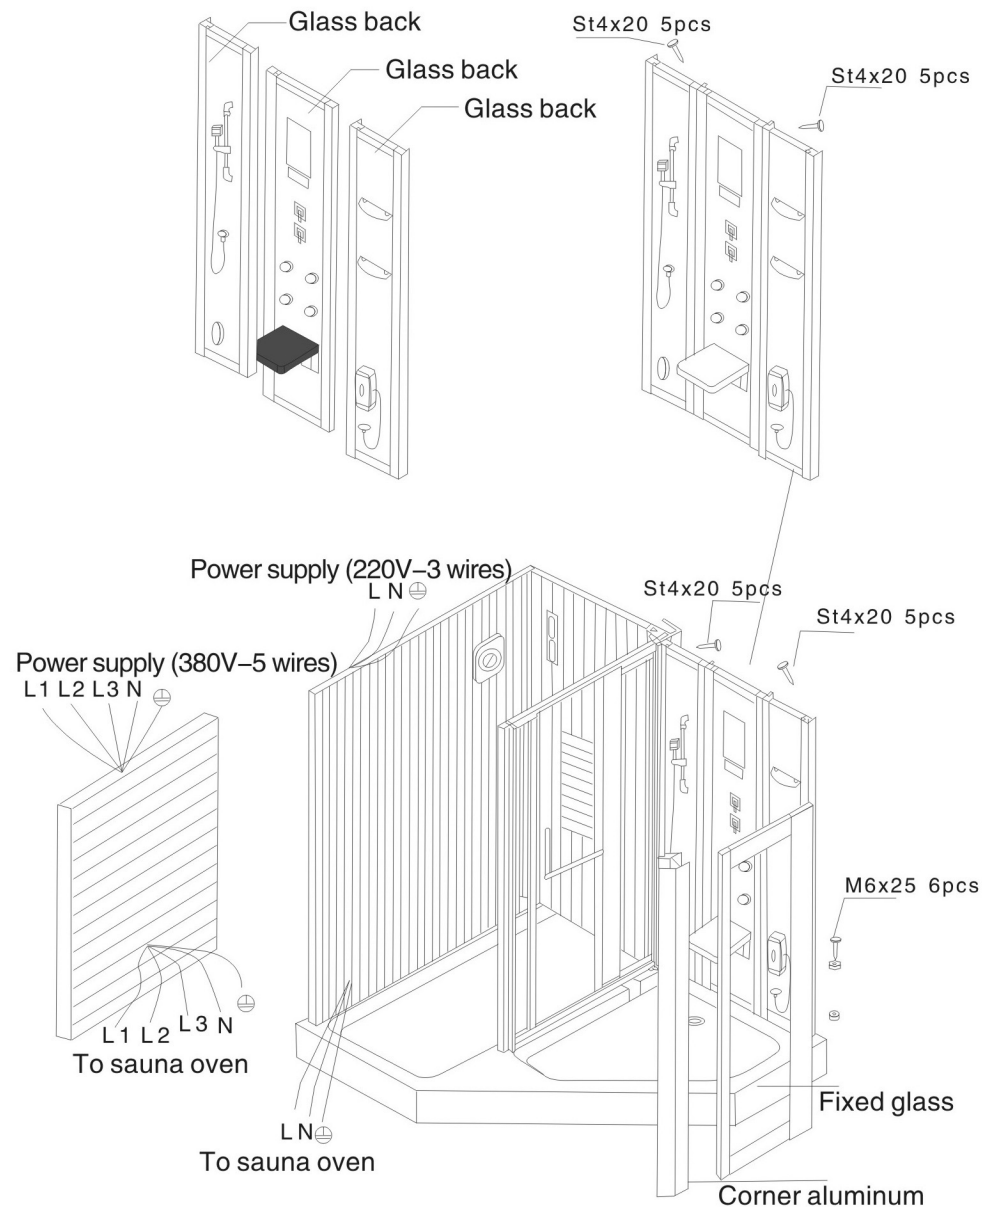

Connector to the cold/ hot water hose provided by the user

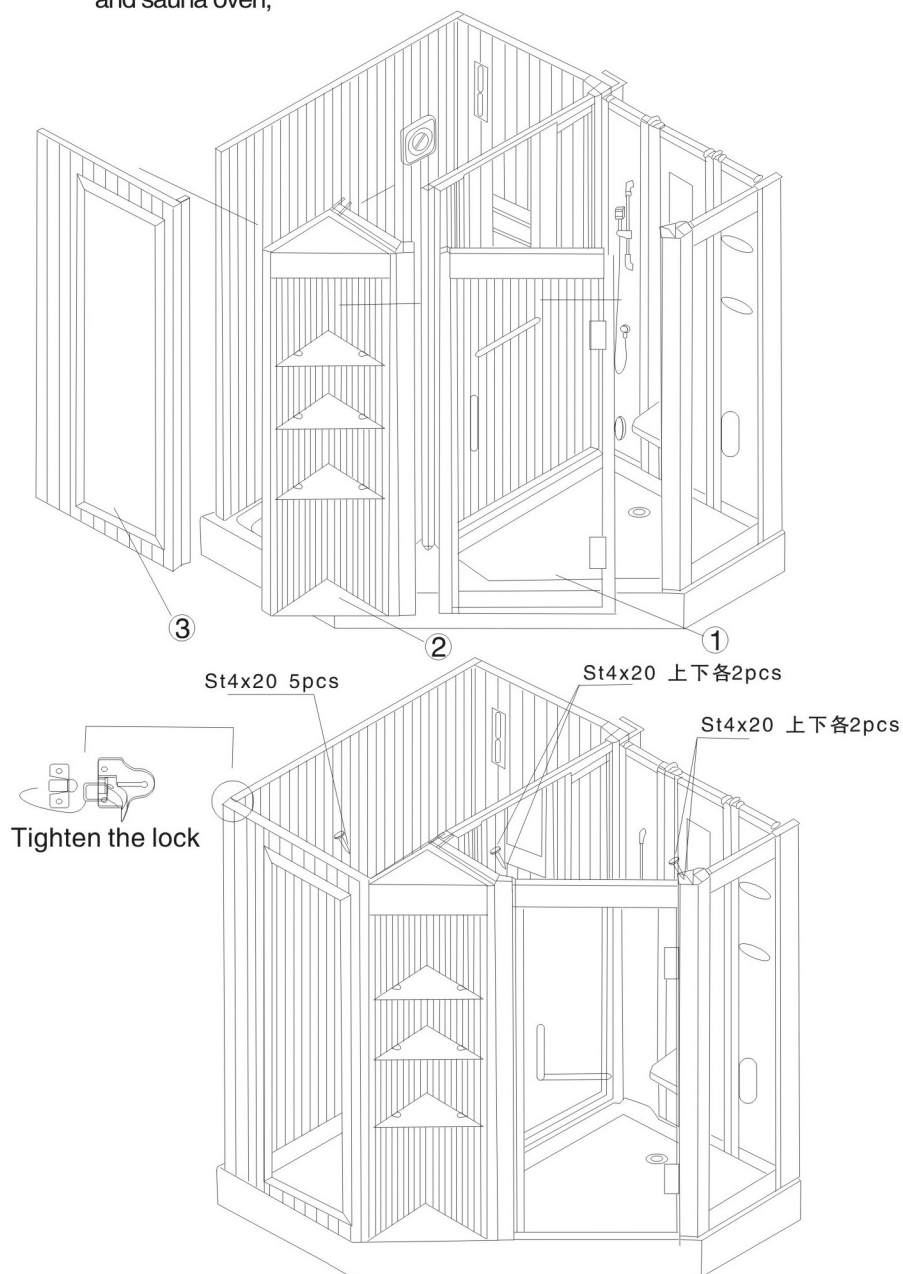

- 3、Put the back board, side board on the base as the arrow and align and lock them. Put the middle aluminum on the aluminum of wood board.

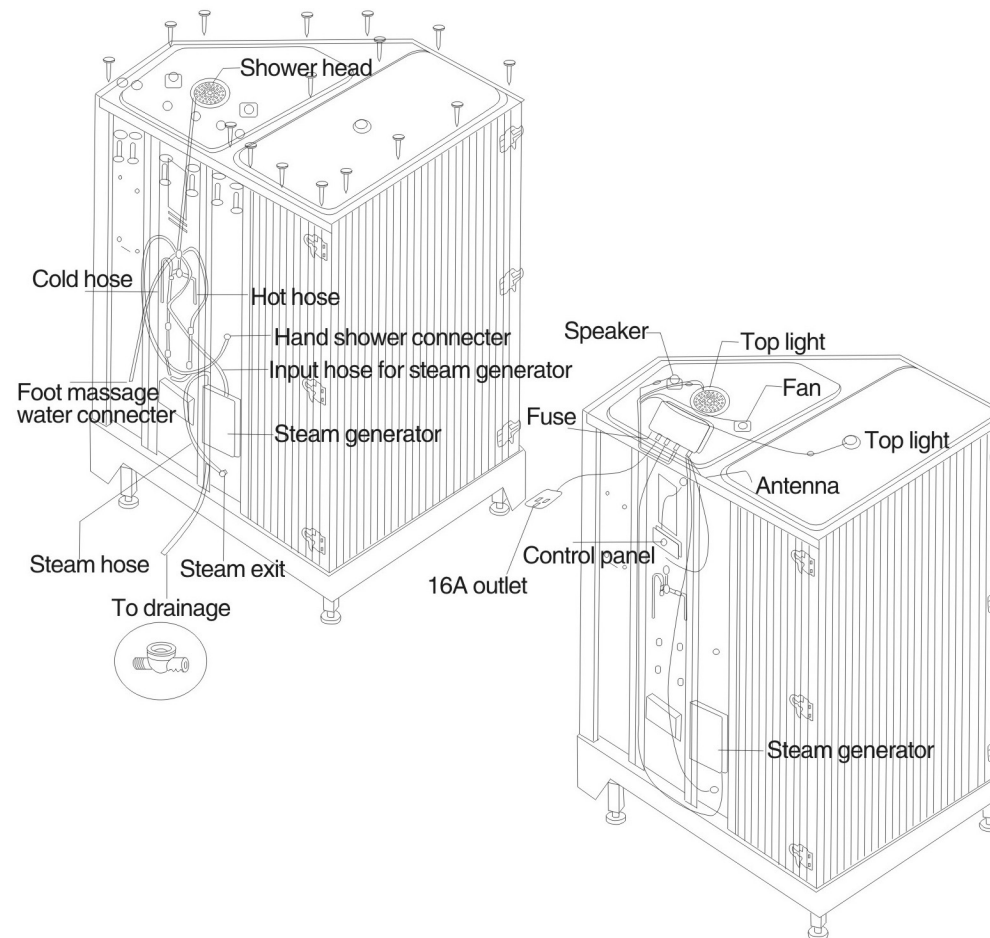

- 4、As the figure, put 3 glasses together and align the screw holes, then tighten them;
- 5、Put the grouped glass back on the base, align all the screw holes and tighten them;
- 6、Put the fixed glass on the base and align the screw holes, then tighten them;
- 7、Mount the corner aluminum on the fixed glass.

- 8、As the figure, assemble sliding door, wood shelf, wood board with glass as the order 1-3, adjust them and tighten the screws;
- 9、Mount the handle and all the accessories on the back glass, then fix the shelf;
- 10、Put the flooring in the room, assemble the stool, bucket, T/H gauge, sand timer and sauna oven;

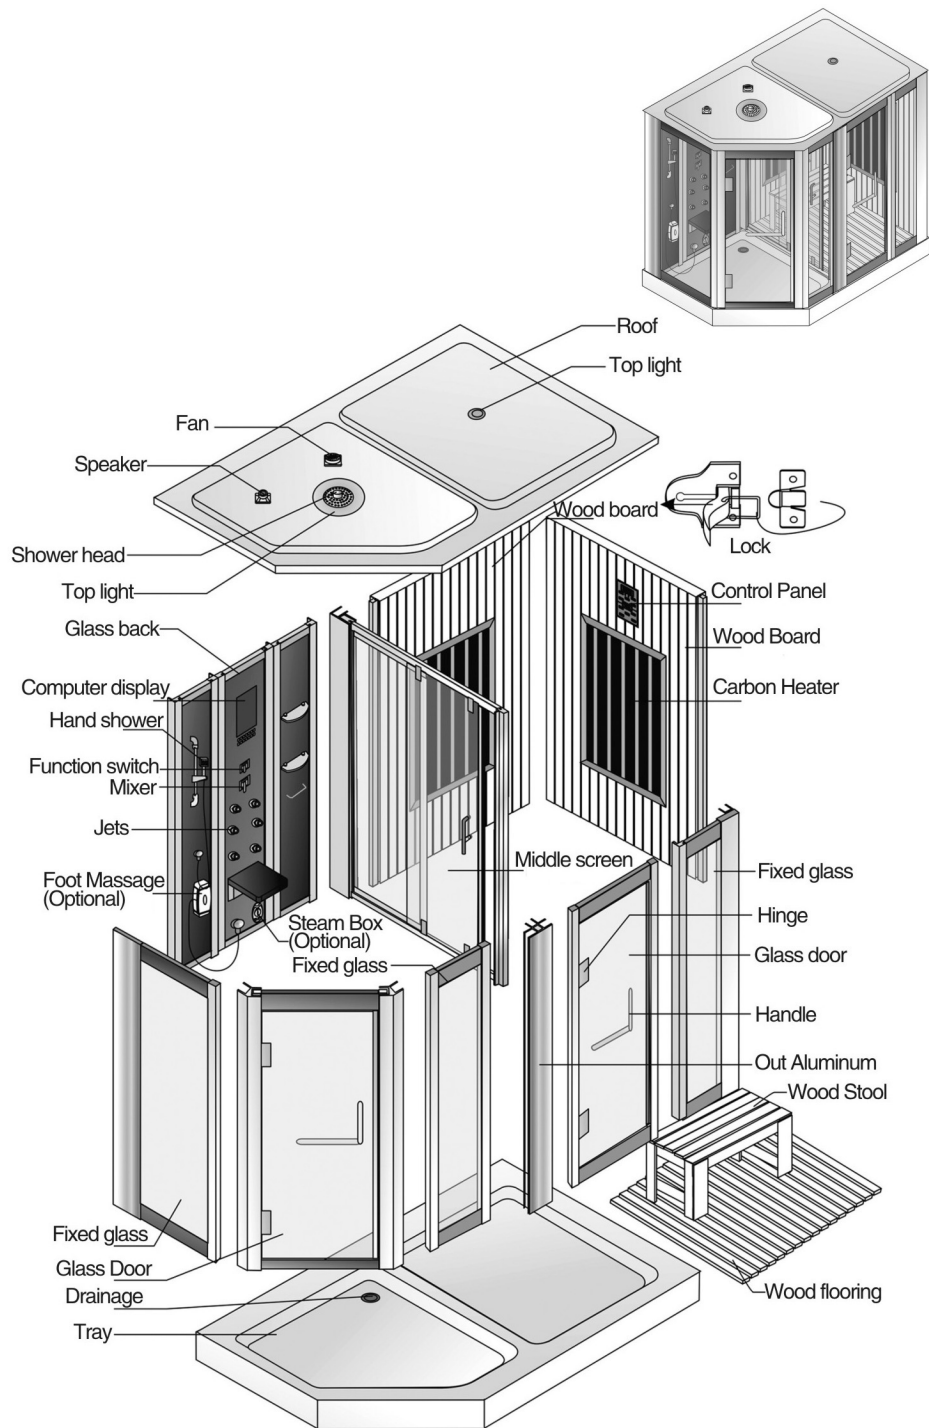

- 11、Put the roof on the body and align the screw holes, then tighten them;
- 12、Assemble the hand shower and shelf, foot massage to the back glass with water hoses;
- 13、Water circuit: Connect the jets, massage, hand shower and shower head to the mixer;
- 14、Electric circuit: Connect all the cables with same colors;
- 15、Put the neutral silicon in all the necessary gaps and wait for 24 hours to use;
- 16、Connect the power.

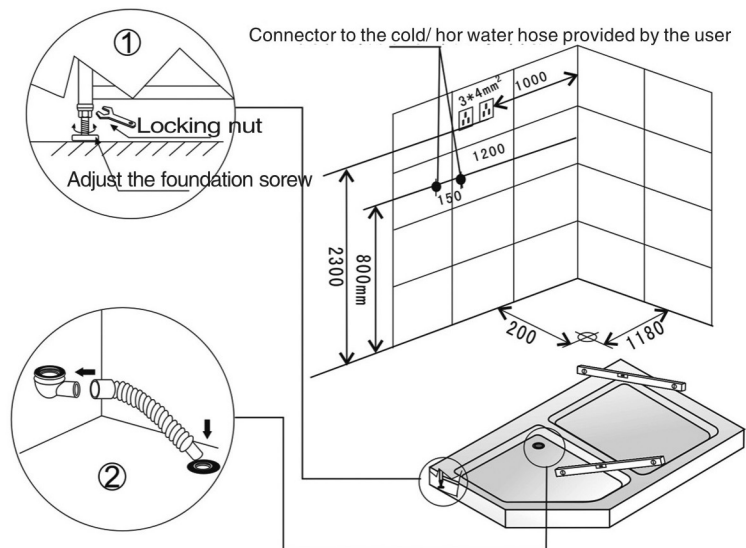

Warnings:

The manufacturer shall be never liable for any by the pualified electrician with reliable grounding.
 The manufacturer shall be never liable for any damage caused by the poor grounding !
 Check the wiring before switching on power supply !
 No further notice shall be give in case of any change on the technical information !

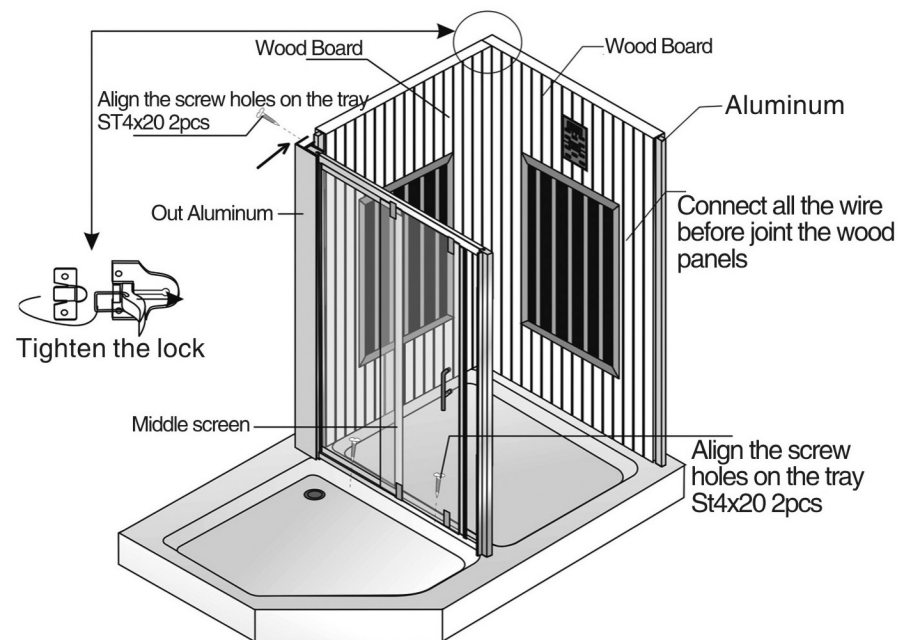

Assembling Steps:

1. Adjust the legs to make the tray horizontal;
2. Connect the draining pipe to prepared connector with soft pipe.

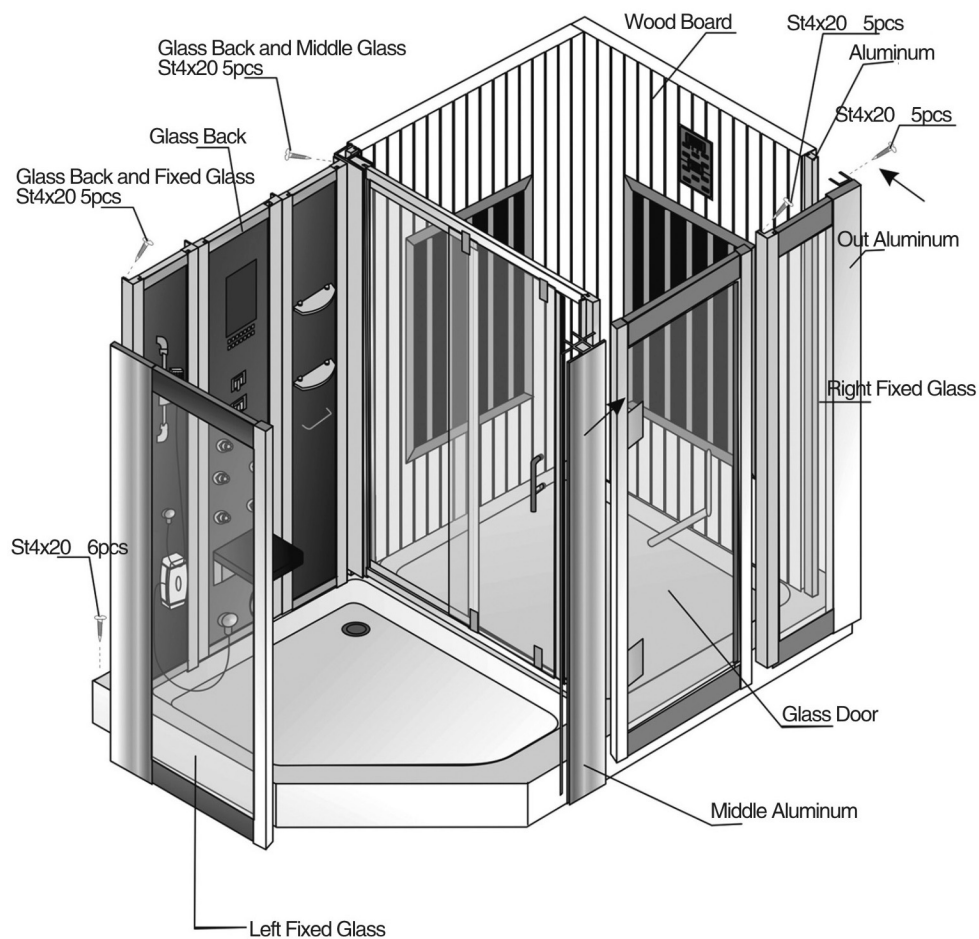

3. Put all the wood panels on the tray, align two panels and lock them. Put the aluminum frame on the fixed panel to the wood aluminum slots.

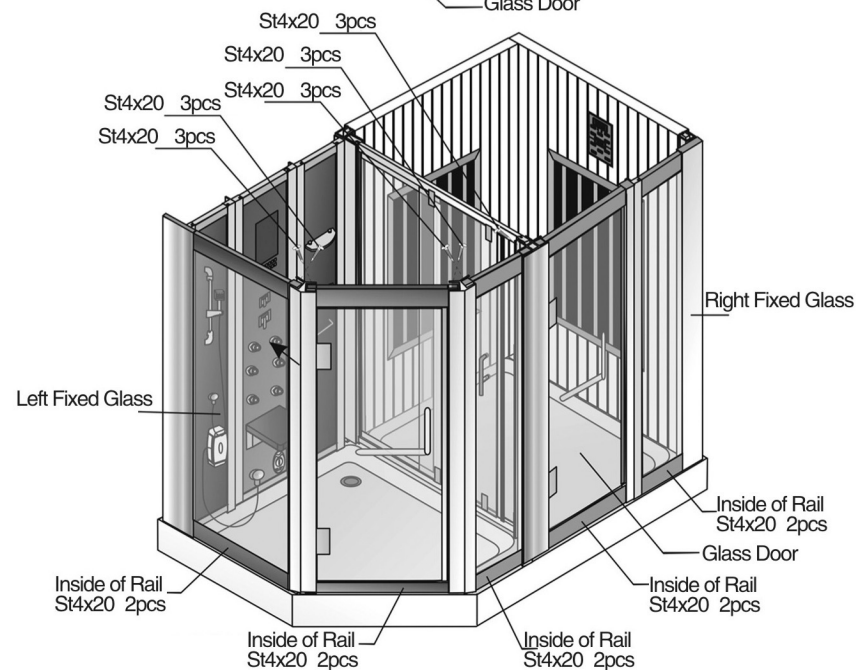

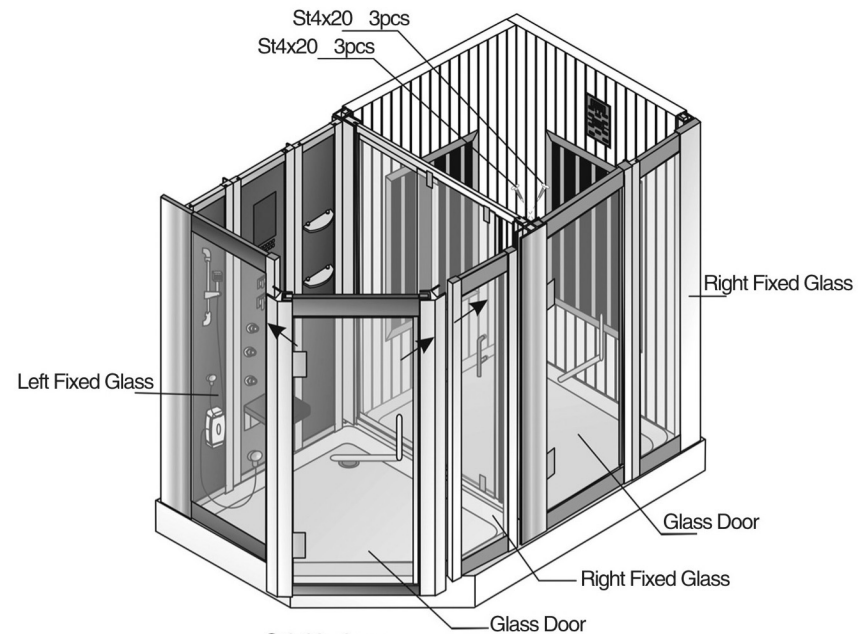

Assebling Steps:

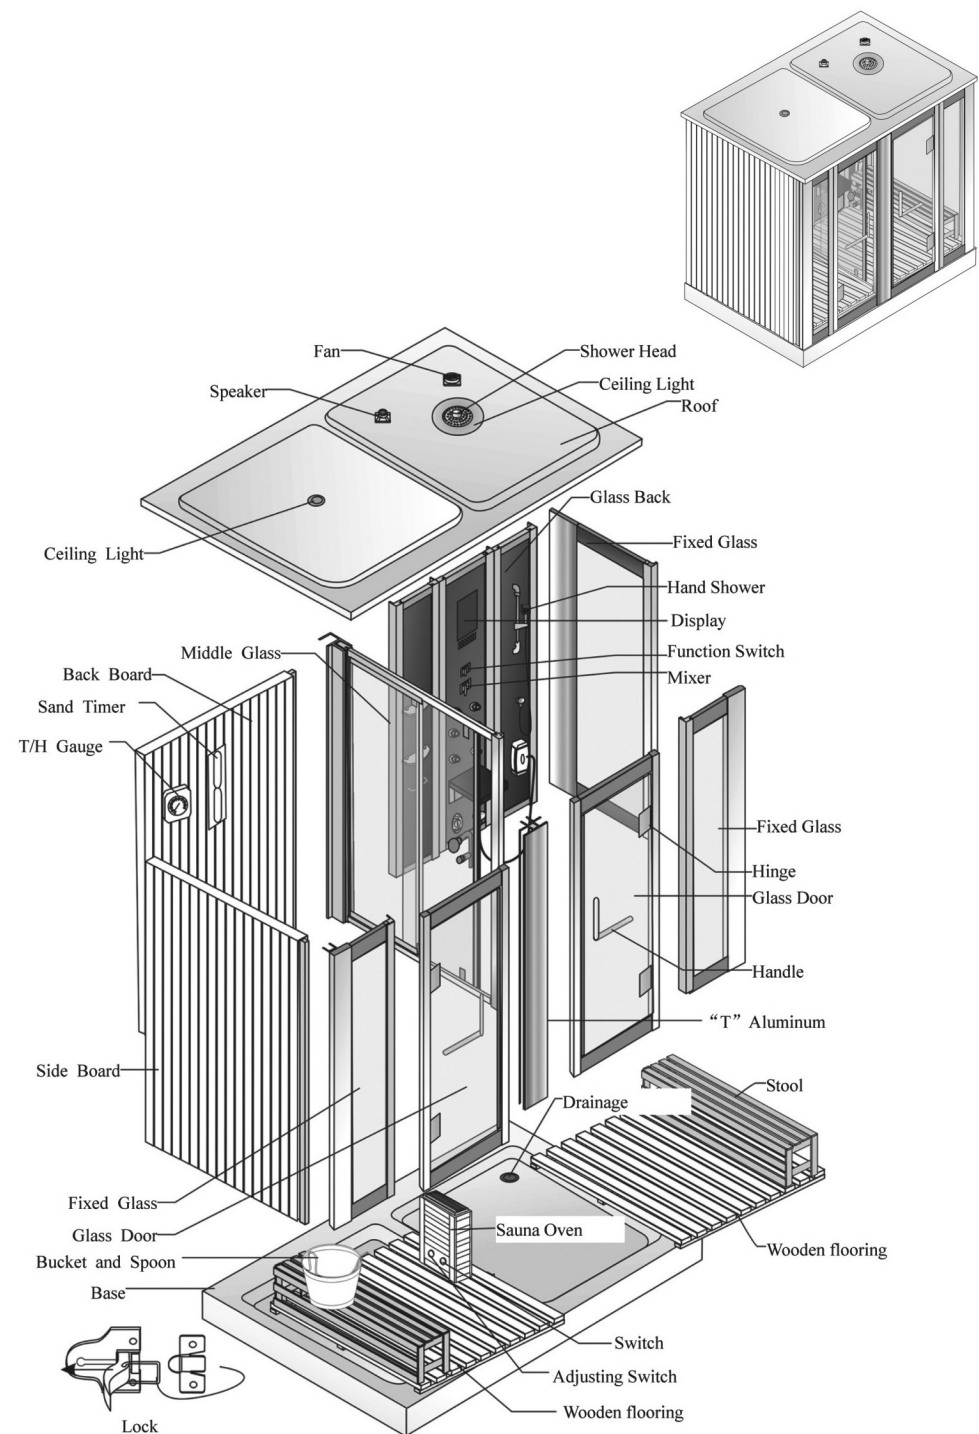

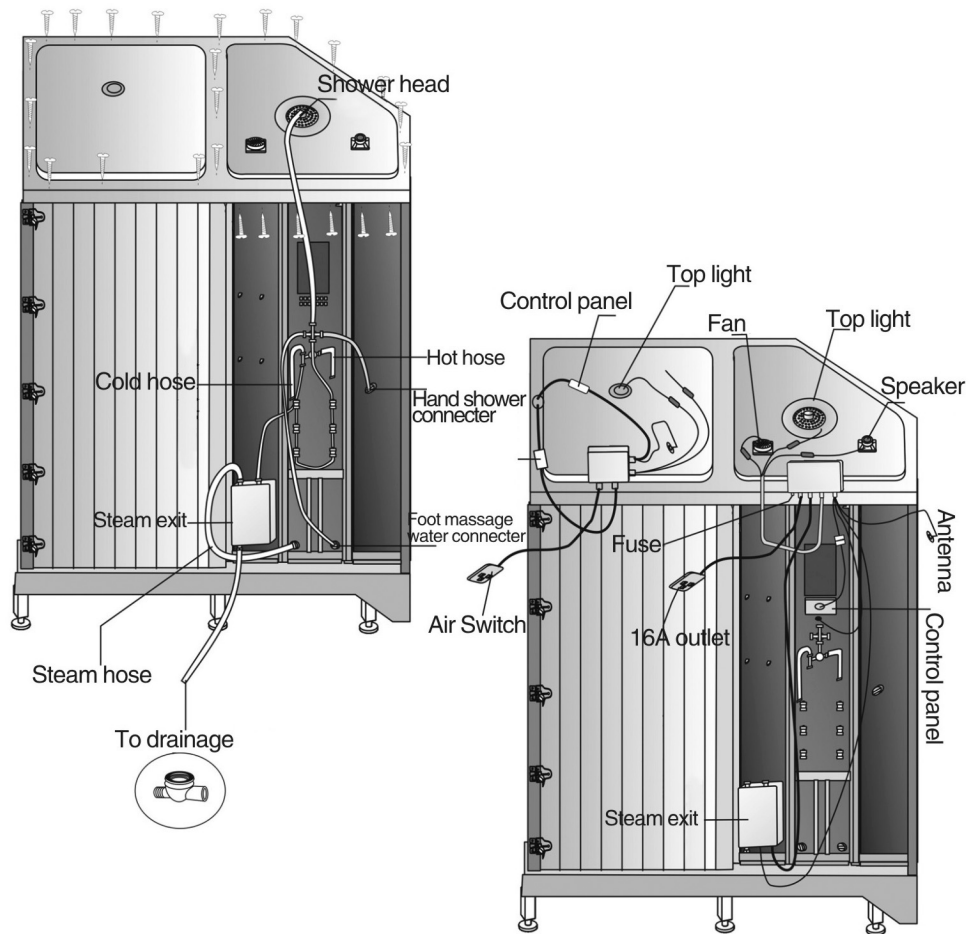

4. Put the glass bck on the tray, align all the holes and screw them;
5. Put the left glass on the tray and screw it;
6. Put the right glass on the tray and plug the side into the wood panel, screw it;
7. Connect the left/right fixed glass with middle aluminum and screw it.

8. As the photo, connect the fixed galss and middle glass, adjust the location and screw it;
9. Assemble the handles and screw the top and bottom rails;
10. Put the flooring in the cabin and put the stool inside.

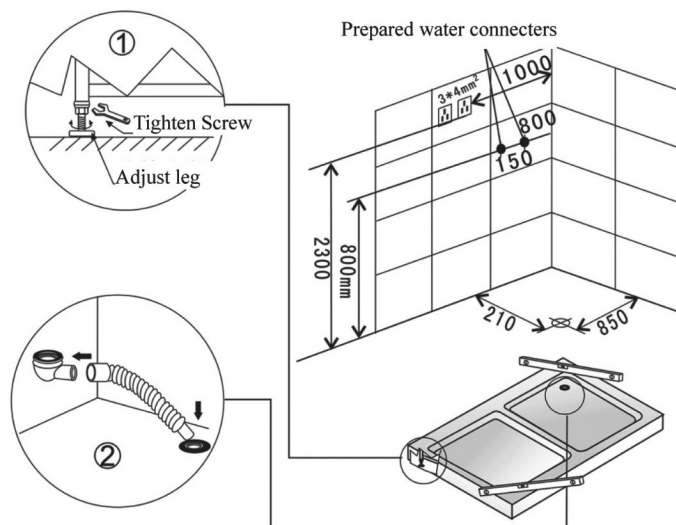

11. Put the roof on the body, align the holes and screw them;
12. Assemble the handshower and shelf, connect the foot massage;
13. As per the diagram, connect all the pipes for jets, hand shower and shower head to the faucet;
14. Connect all the wires as per the label with same colors;
15. Put the silicon to all the gaps and wait for 24 hours to use;
16. Connect the power.

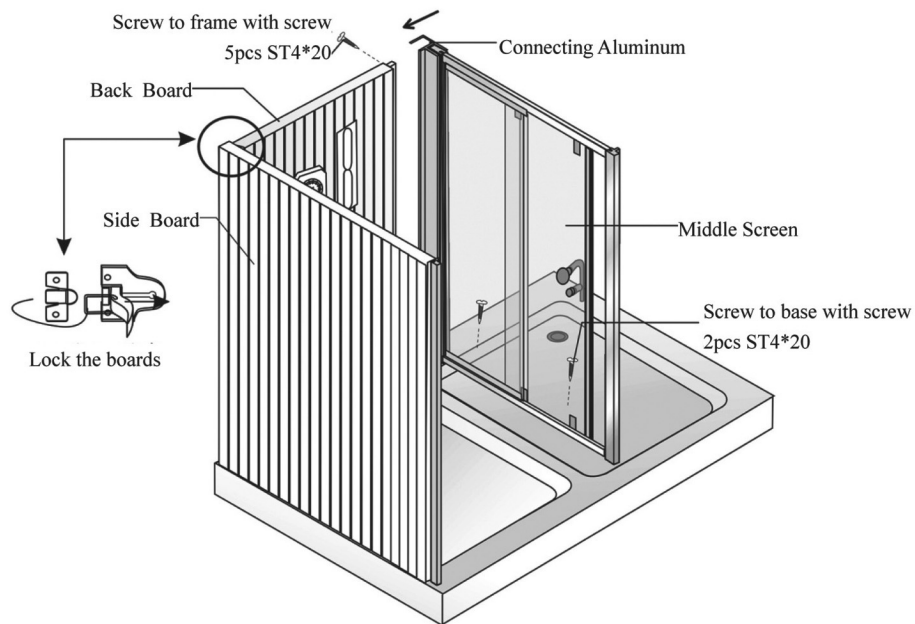

ASSEMBLING STEPS:

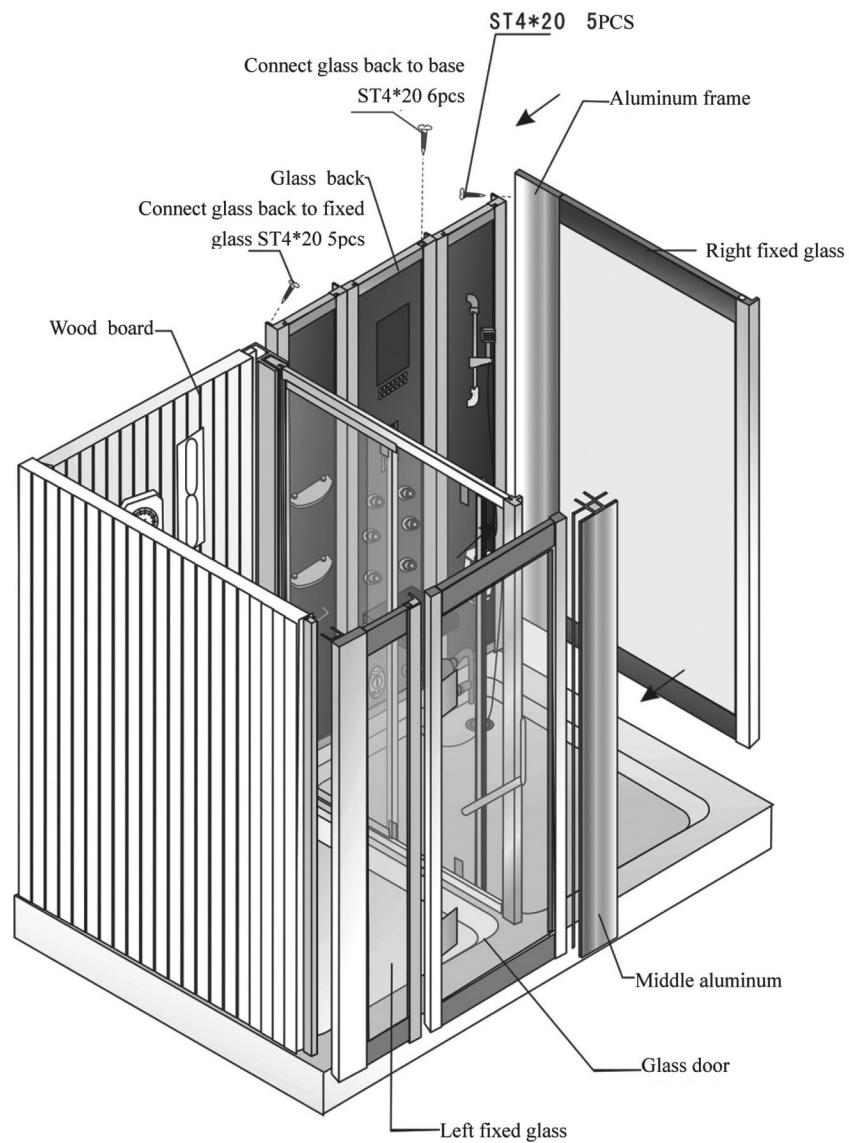

2. Adjust the base legs to horizontal (as figure 1);
3. Connect the water hose to prepared water connectors (as figure 2).

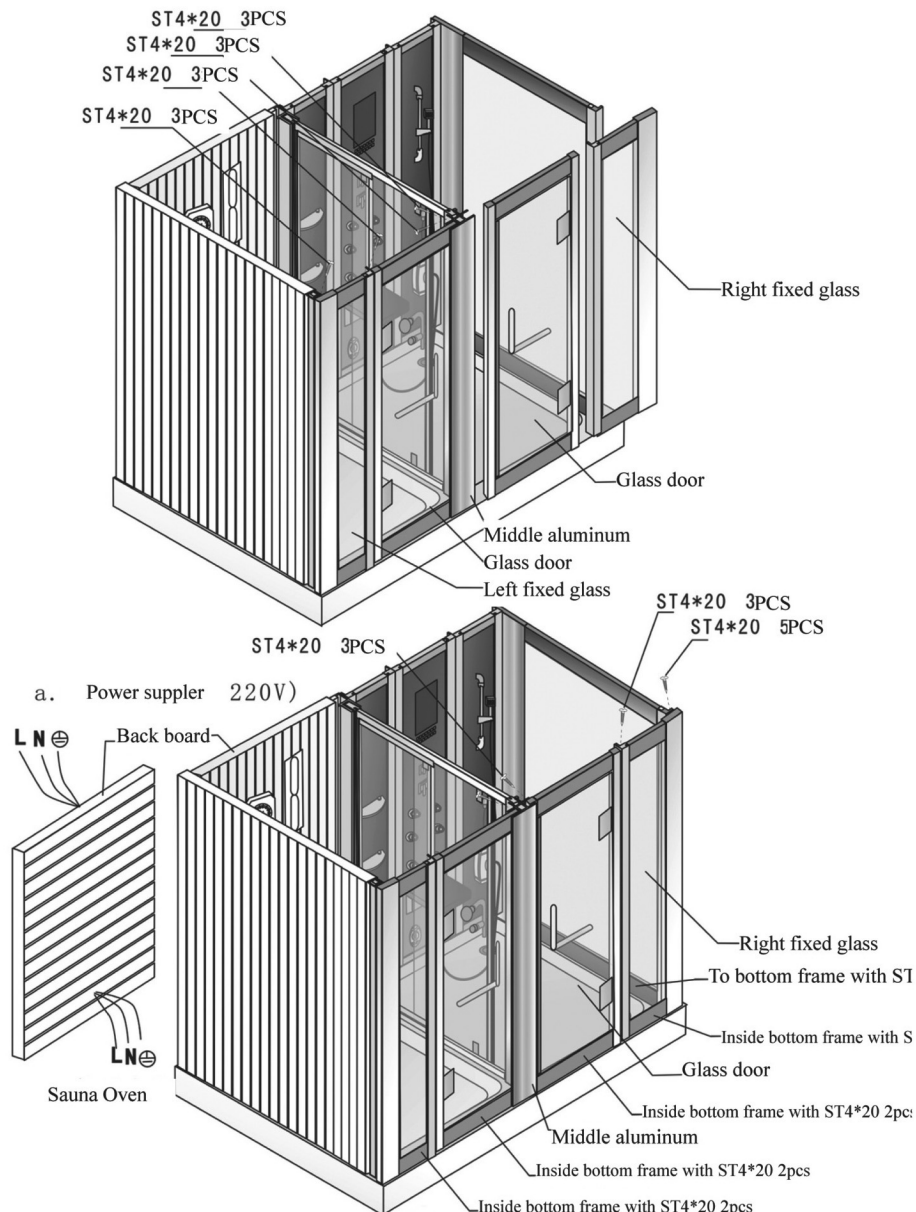

1. Put back board, side board on the base, align the boards and lock them. Assemble the middle screen with back board.

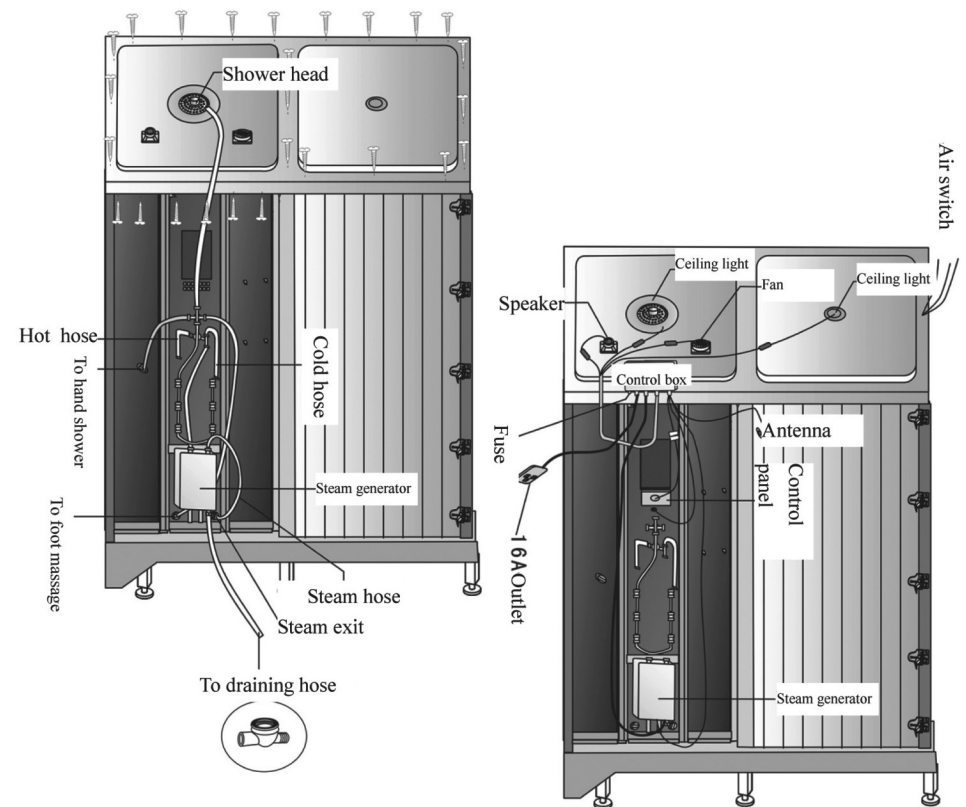

4. Put the glass back on the base, align the holes and screw them;
5. Put the left fixed glass on the base, align the holes and screw them;
6. Put the right fixed glass against the wood board, fix it to wood frame;
7. Fix the middle aluminum on the right fixed glass and screw it.

8. As figure assemble the right fixed glass middle glass, adjust and tighten the screws;
9. Fix the handles, tighten the bottom frame screws;
10. Put the wood flooring inside; assemble T/H gauge, sand timer and wood stool.

11. Put the roof on the body, align the holes and screw them;
12. Assemble the hand shower, shelf, foot massage to back glass;
13. Connect the water circuit: assemble the jets, massage, hand shower and shower head to switch;
14. Connect the electric circuit: connect all the plugs with same color;
15. Put neutral silicon on all the gaps and waiting for 24h to use;
16. Connect the power to sauna oven.

Warning:

Only qualified workers can mount this product. The earth wire must be connected properly. Factory won't take any responsibility because of wrong earth wire connecting. Please check all the wires connected correctly before switch on the machine. Factory won't inform every user in case the technology data will be updated.
