Two Door Shoe Cabinet with Drawers

Use WeChat to scan the code to watch the video→

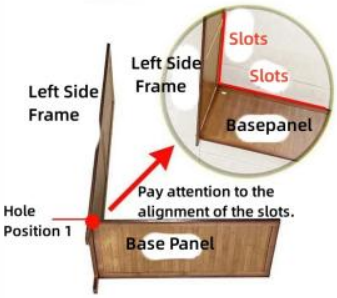

Drawer Installation Steps:
(8 screws are required for each drawer.)

① Fix the base panel on the left frame first.

② Fix 4 Laminates +1 Drawer Holder

The drawer holder with a raised side should be facing up

③ Installing right side frame.

Please note that the hole positions on the left and right sides should be consistent.

④ Install skirting board.

⑤ Stand up the shoe cabinet and insert it into the back panel.

Be sure to fully insert into the slots.

⑥ Insert Rear Insert.

The small side of the insert hole faces the inside of the shoe cabinet.

⑦ Install the top panel (the back panel should be fully clamped into the panel slots).

⑧Install the door panel with the shortest small (cross) screw.

The other end of the hinge is fixed on the side frame.

⑨ Put on the installed drawer. (complete)

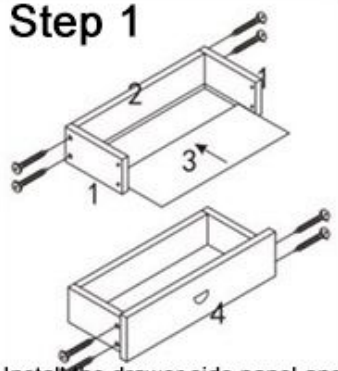

Installation
