

Bird Bath – General Instruction Manual

Product Overview

This bird bath is constructed from durable, weather-resistant Magnesium Oxide Stone Composite material with waterproof and UV-resistant performance for long-lasting outdoor use. It acts as a practical wild bird drinking and feeding station, while serving as an exquisite decorative garden ornament to beautify yards and outdoor landscapes.

Specifications

Maximum Load Capacity: 25 kg (55 lbs)

Applications

Ideal for gardens, lawns, patios, balconies, backyards, courtyards and outdoor landscape decoration.

Usage Instructions

Place the bird bath on a flat, level, and stable ground surface before use to prevent tipping and water spilling.

Do not stand, climb, lean on or apply excessive pressure to the product.

Do not overload beyond the 25 kg weight limit to avoid structural damage.

Regularly clean the basin and replace water to keep it clean for birds.

Care & Maintenance

Clean regularly with a soft cloth and mild soap, then rinse and dry thoroughly.

The resin material is UV-resistant, waterproof and fade-proof, suitable for long-term outdoor placement. Avoid prolonged exposure to extreme harsh weather to extend service life.

Empty the water and store in a dry and ventilated area when not in use for a long time or in severe weather.
