

JZSKZCA6USLBS

Specification

Color: Grey

Material: Environmental-friendly Thickened PVC, Pearl Cotton

Process: Uniformed Welding

Style: Portable, Classic

Pattern: Pure

Shape: Inflatable Rectangle

Installation Method: Freestanding

Usage: Foldable Bathtub for Adult Spa

Applicable Age&People: 1 Adult

Number of Floors: 4

Suitable Height/Weight: Below 1.9m/6ft, 100kg/220 lbs

Suitable Water Temperature: -15~55°C/5~ 131°F

Bump Type: Electric Air Bump

Plug: US Standard

Electric Air Bump Model: 8201

Electric Air Pump Power: 130W

Electric Air Pump Input: 120V AC 60Hz

Pump Power Cable Length: 1.6m/5.25ft

Insulation Time: Depends on Local Temperature Difference

Inflation Time: About 3 Minutes

Capacity: About 190L/50.2Gal

Inner Size: 122*52*45cm/48*20.47*17.7inch

Outer Size: 152*82*57cm/50.84*32.28*22.44 inch

Package Size: 40*15*37cm/15.7*5.9*14.6inch

Net Weight: 4.3kg/9.48 lbs

Gross Weight: 4.8kg/10.6 lbs

How to Inflate

1. Unfold the inflatable bathtub on a flat surface.
2. Open the air inlet.
3. Choose the medium nozzle.
4. Turn on the electric air pump to inflate. Please do not overinflate.
5. Close the air inlet.
6. Done.

How to Fold

1. Deflate the bathtub.
2. Flatten the bathtub.
3. Fold the top half inside.
4. Fold the bottom up.
5. Fold in half on the right.

6. Store it after folding.

Package Included

- 1* Inflatable Bathtub
- 1* Electric Air Pump
- 1* 3-in-1 Inflatable Nozzle
- 1* Drainage Pipe
- 1* English Manual

Application

It can be used in living rooms, RVs, shower stalls, hotels, backyards, decks, balconies, bathrooms, etc. It is suitable for most people within 6ft and 220 lbs.

Notes

1. The products are brand new, and they are sealed packages immediately after production, so it is normal to have some smell. You can use the shower gel or others to wash or put it in a ventilated place, the smell will slowly dissipate after a few days.
2. Before inflating, please make sure the ground is smooth without sharp objects, unfold the product carefully and cover all the air nozzles on the product tightly.
3. The product is an air-supported structure, relying on the support of water and air. It will be solid when filled with water. Please do not add water more than 2/3 of the internal height to the inflatable bathtub. Please do not move it after the water filling to avoid damage. Please timely drainage after enjoying bathing. It is recommended to use it in a well-drained bathroom or outdoor camping.
4. Soaking water temperature is recommended between 38-42°C/100.4-107.6°F. After 1-2 hours after the meal and then soak. The first bath water level should not be too high, and the time should not be too long (recommended 10-15 minutes or so), otherwise there will be dizziness, vomiting, and other discomforts, adapt to the individual body reaction to adjust the situation.
5. Try to drink a cup of warm water before the bath and keep the bathroom ventilation at all times to avoid adverse reactions caused by poor air circulation.
6. Before taking a bath, please respect the doctor's advice before taking a bath (due to different personal constitutions, some pregnant women need to take more baths, while some are not allowed to take a bath). Suffering from hypertension, hemophilia, poor skin sensitivity (such as spinal cord injury), tumors, physiological period, etc., the above cases are prohibited bathing.
7. The elderly, infirm, and children need to have adult supervision throughout their use.
8. When standing up from the bath, slight dizziness will occur after the water pressure recedes. Please do a good job of anti-slip work, put on dry clothes in time, lie still for 10-15 minutes, and do not blow the wind to avoid getting cold.
9. Because each person's physique varies, the first few times someone will appear dizzy vomit, and have other adverse reactions, this is normal. The pressure of the water and buoyancy for the weak, low blood pressure is prone to adverse reactions. If there are adverse reactions, the bath should be lowered to the stomach level. Later, according to their adaptation to the situation gradually adjust the water level. It is recommended to take a bath with sugar in the mouth.
10. When connecting the drain pipe to the drain switch, make sure that the smaller end of the drain pipe is connected to the drain switch to ensure that the drain pipe will not fall off and cause water leakage when draining.
11. This is not a lifesaving device. Please do not overinflate or use high-pressure air to inflate, touch

it with anything sharp, scald it with high-temperature water, or use it in the deep sea, rapidly, or anywhere with big waves.

12. Hang to dry, please do not use a hair dryer to dry this product.
13. Please read the operating manual completely before use. And pay particular attention to the safety instructions included.
14. Please allow the slight color difference caused by the shooting light and 1-3 cm error due to manual measurement, and make sure you do not mind.
