

## Fitting Instructions for Log Store with added Doors

1. Your log storage unit will consist of
  - 1 x roof
  - 1 x back board
  - 2 x side boards
  - 5 x floor batons
  - 1 x spacer
  - 1 x full front door panel with doors
  - 36 x screws plus spares

2. Fix the two side boards to the back panel using the 8 screws already in place in the back board

3. Place the 5 floor batons evenly spaced from front to back (please ensure back baton is as far back as possible) as shown in the picture.  
There are 4 screws for each baton 2 either side.

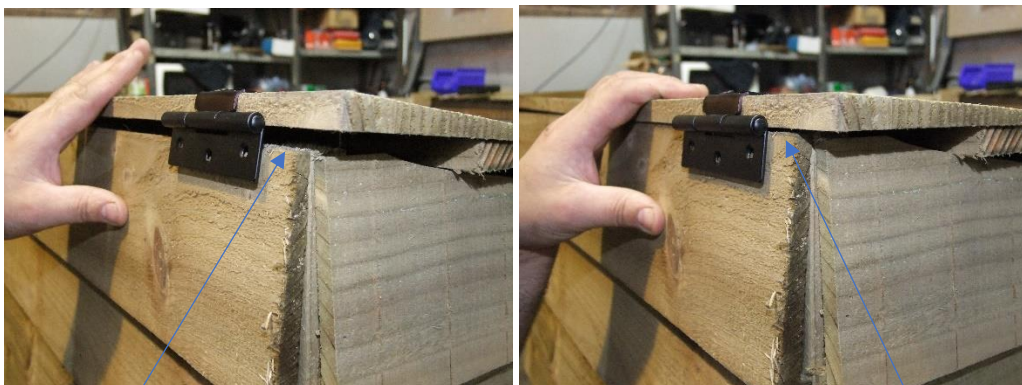

4. Attach the front door panel as shown in below images.

Please ensure the door frame sits flush with the bottom of the Log Store (see below image)

5. When attaching roof hinges ensure there is no gap, if needed pull down on roof and then attach hinge as shown in diagram
