Measuring Your Curtains

Before You Order - What to Measure:

- **Curtain Thickness:** Measure the thickness when curtains are gathered together
- **Desired Position:** Decide where you want the tieback positioned on your curtain
- **Fabric Weight:** Consider if you have heavy or light curtains
- **Curtain Width:** Measure how much fabric you'll be gathering
- **Style Preference:** Choose the finish that best complements your natural decor

Measurement Points

- A. Curtain panel width when spread flat
- B. Gathered curtain thickness at tieback point
- C. Distance from window frame to desired tieback position
- D. Available space for wire loop and magnetic connection

Compatibility Guide

Perfect For:

- **Light to Medium Weight Curtains** - Ideal for natural fabrics and sheers
- **Curtain Thickness:** Up to 3 inches when gathered (3.8" loop accommodates most)
- **Panel Widths:** 30" to 84" wide panels work excellently
- **All Fabric Types** - Cotton, linen, silk, polyester, natural blends
- **Design Styles:** Natural, organic, botanical, modern, transitional

How to Measure Properly

Step 1: Gather Your Curtain

Pull your curtain to one side as you would want it to look when tied back. The wire loop design accommodates various thicknesses.

Step 2: Check the Circumference

Wrap a measuring tape around the gathered curtain. The measurement should be less than 11 inches for the 3.8" loop to work effectively.

Natural Advantage: The organic Ginkgo leaf design brings a touch of nature indoors while providing secure magnetic hold.
