

PARTS LIST

Table top	
Metal base	
Screws	

We recommend having two people to assemble the tables. You will definitely need two of you when assembling and turning over the larger tables as these are heavy. Take the box(es) into the room where you want to position your table, open them and remove all the packaging.

Place the table top on a carpet or on the cardboard (to protect the table surface and prevent scratching) with the underneath facing upwards.

Now you're ready to bolt on the base/pedestal/legs. Each table comes with the necessary number of nuts, spring washers and/or flat washers & Allen wrench to go with the fixing holes in the wood. Some tables will have numbers on the legs and bottom of the top, please make sure to match each leg as per the numbers. All others will be universal

Simply place the pedestal/base/legs on the table to line up with the holes, position each bolt and tighten securely (avoid over-tightening) with the Allen key. Once the bolts/screws are tightened, carefully turn the table in the upright position, with the help of another person when table is too heavy. Your item is now ready for use.
