self-provided tools
drill bit： 1/4" (6mm)

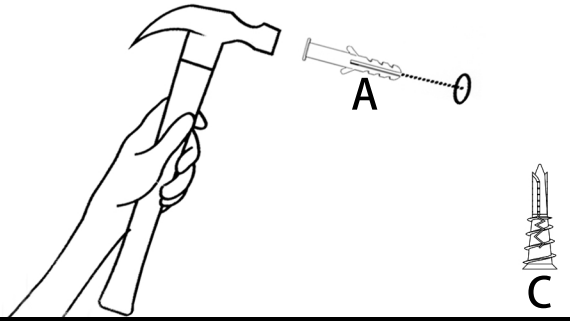

① Mark the place where you want to install the shelf and check with a level.

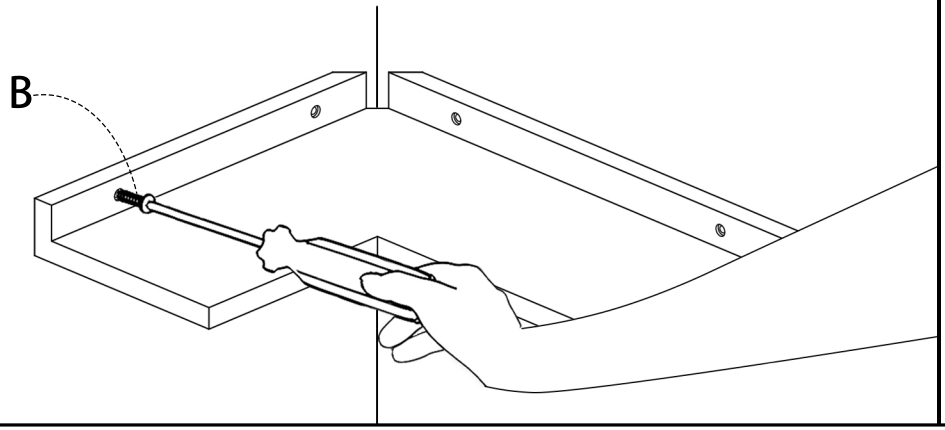

② Drill 1/4" (6mm) holes at the markings with an electric drill.

③ Use a hammer to knock the expansion tube into the drilling hole.
(In case of plaster walls, use plaster expansion pipe C).

④ Use screws and screwdrivers to fix the shelf on the wall.

⑤ You can choose whether or not to affix the screw hole sticker as needed.
