Lighting installation instructions

Installation steps

1.First fasten three lamp arms, then fit the fabric shade, next secure the lower ring, and finally fold the acrylic piece and place it in from the top.

2.Tighten the lamp holder tube firmly onto the main body tube

3.Tighten one end of the suspension chain to the lamp holder, and fix the other end to the ceiling plate

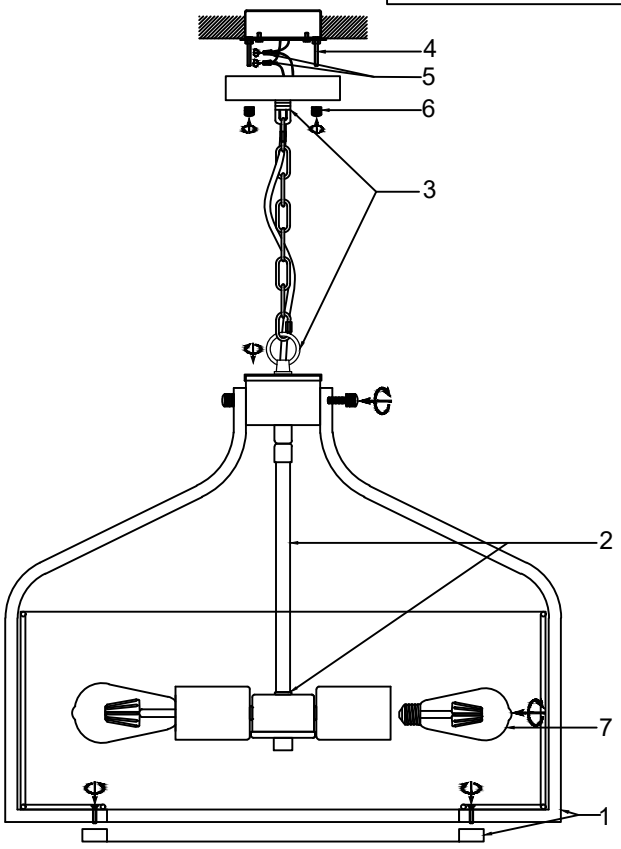

4:Lock the "mounting bracket" onto the wire box.

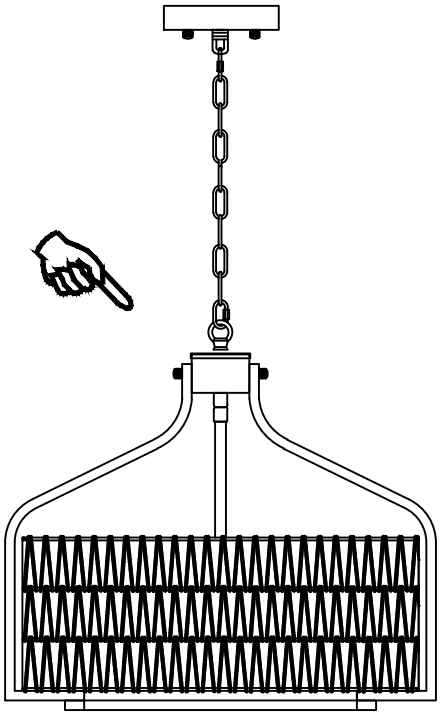

5:Connect the power cord properly.

6: Fasten the ceiling plate firmly to the mounting bracket with screws.

7:Screw on the light bulb .Light Bulb not included

The end!

Precautions for use

1 When installing, cleaning lamps, or replacing light bulbs, the power supply should be cut off.
2 The rated voltage is 120V, and each bulb base supports a maximum of 60 watt bulbs.
3 During installation, avoid scratching the surface of lamps and wires, wear gloves, and do not collide with them to avoid injury.
4 Never install it on an uneven ceiling, keep flammable items such as paper and cloth away from the bulb (to avoid fire).
5 5. The lamps must not be close to corrosive chemicals and gases such as acids and alkalis,
and cannot be cleaned directly with water. They can only be tried with a clean soft cloth.
6.Do not touch the bulb during use or after turning off the light (to avoid burns).
7.Please do not use it in places with high humidity and high temperature.
8 When installing, be careful to handle it with care and minimize the number of movements to prevent damage to the lamp.
