

# Installation & Assembly

- 1: Take the lamp body out of the package, adjust the direction of the lamp heads, with six extending horizontally and three pointing downward.
- 2: Connect the middle pole to the lamp body.
- 3: Manually unscrew the metal piece at the bottom of the lamp base, and the lamp cover will automatically come down, revealing the interior part of the lamp base.
- 4: Pull the wire from the bottom of the lamp holder tube into the interior of the lamp base, then close the lamp base cover and tighten the metal piece. Insert the top end of the lamp holder into the metal piece, and take out the "L"-shaped wrench from the parts package to securely fasten the lamp holder tube.
- 5: Connect the middle rod, hook, chain, and ceiling mounting plate together.
- 6: Tighten the wiring end cover in the correct manner
- 7: Tighten and fix the installation plate onto the junction box, and then secure the screws on both sides of the ceiling.
- 8: Connect the 500MM round lamp stand with the 360MM round metal ring using four small chain links (100MM).
- 9: Then use 4 small chain links (100MM) to connect the 360MM round metal ring loop with the 120MM round metal ring loop.
- 10: Install the light bulb.
- 11: The hanging method for glass: For clear striped glass, pass the glass through the circular rings from the bottom layer one by one. Use a serrated metal piece to secure it, and ensure that the glass is vertically facing downward.
- 12: Plug in the power supply and the light will turn on.
