E

M6x25mm

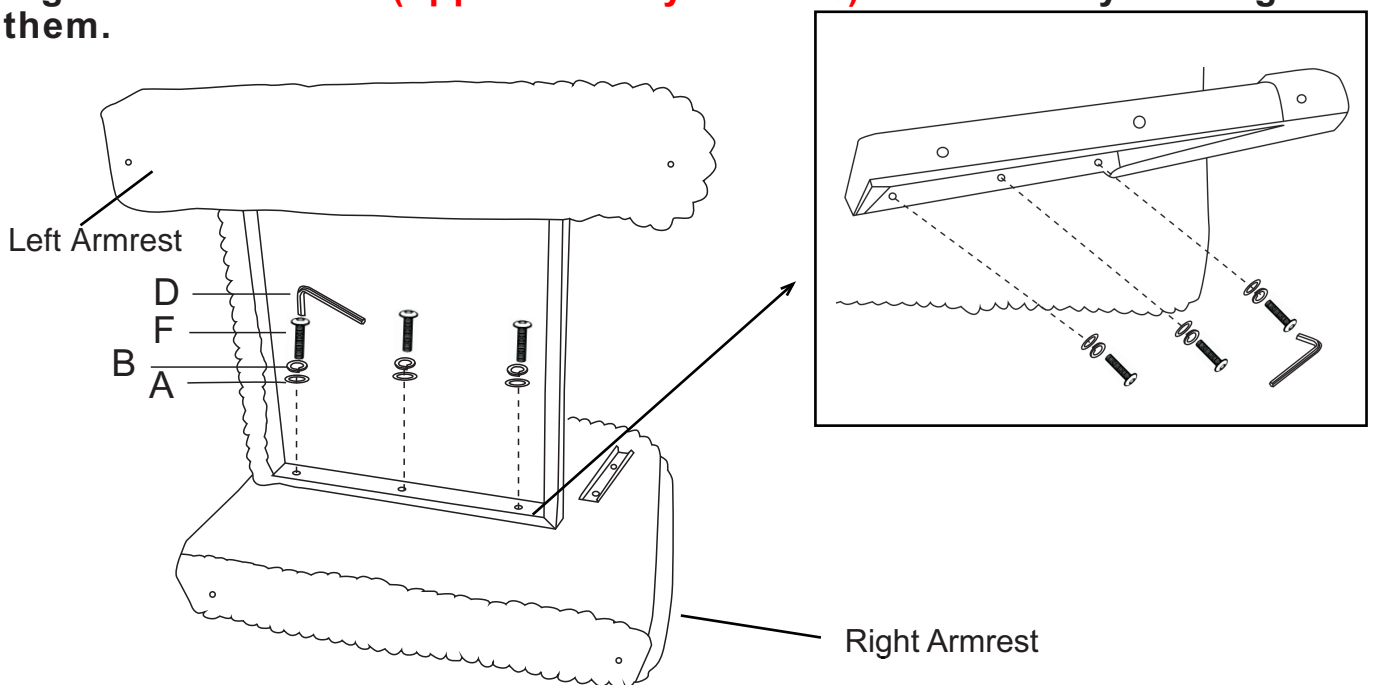

8pcs

STEP 1: Use screw (E) to assemble the metal insert onto both sides of the armrests.

Step 2: Align the seat frame with the armrests using washers (A, B) with screws (F)
Tighten the screws (approximately 70–80%) without fully locking them.

Step 3: Attach the metal crossbar between the two armrests under using screw (E), ensuring it is firmly secured.

Step 4: Align the metal insert on both the backrest and armrests, insert them into position, and secure them firmly

Step 5: Stretch the backrest fabric tightly and adhere it to the metal crossbar to ensure a smooth, secure fit.

 Once everything is aligned nicely, go back and **fully tighten them**. This makes the assembly easier and safer!

Step 6: Use washers (C) to securely tighten the legs

Step 7: Place the seat cushion, backrest cushion, and lumbar pillow onto the chair to complete the assembly.

Assembly Completed
