⚠WARNING⚠

CHOKING HAZARD — This item contains small parts that could be swallowed by children. Keep children away during assembly.

Tip: Always fully insert the hex key into the designated notch.

If the hex key is not fully inside the notch, the hex key could slip out, causing damage to the bolt head. Repeated hex key slipping will cause the notch to become rounded, making it difficult or impossible to tighten the bolt with the hex key.

ATTENTION! Do not fully tighten any hardware until all components are loosely connected. If each bolt is fully tightened too soon, mounting holes may not align and parts not fit together easily.

Turn each bolt, by hand, until the screw grips into the mounting hole. Continue this process until all bolts have been installed. Tighten all hardware.

Do not use any electronic tools to assemble this product. The high energy of electronic tools will cause hardware to over-tighten, stripping the bolt, bolt head, or bore holes.

Only tighten the hardware entirely after the product is fully assembled.

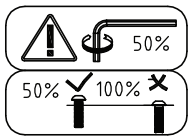

Do not over-tighten screws or bolts.
