Assembly Instructions for **Model 21891208**

Installation method

1. Prepare installation tools.

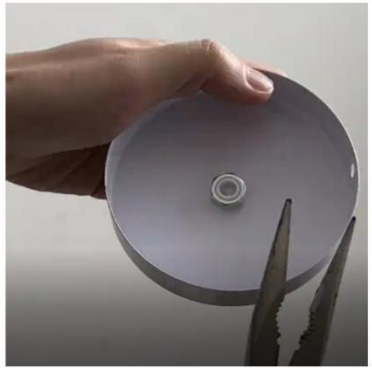

2. Install the mounting plate to the ceiling.

3. For wooden ceilings, use nails; for plaster ceilings, use expansion screws for fixing.

4. Connect the ceiling plate and the wire connector, and tighten the nuts.

5. Thread the wires through the ceiling plate.

6. Connect the wire connectors to the neutral and live wires in the ceiling.

7. Connect the neutral and live wires of the light fixture to the wire connectors (red to red, blue to blue).

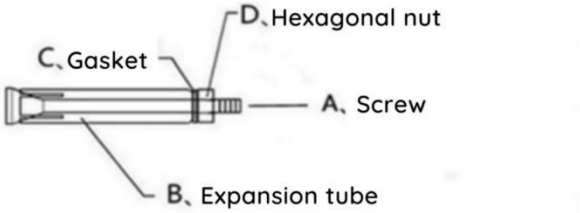

8. Arrange the wires neatly and fix the ceiling plate with screws.

9. Tighten the fasteners to complete the installation.

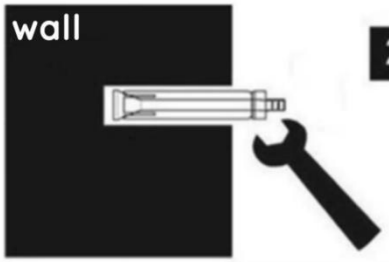

Expansion Screw Instructions

1. Use a drill to drill a hole in the wall that is the same size as the expansion tube

2. Install the expansion screw into the hole and tighten the hexagonal nut with a wrench

3. After the expansion tube is stressed, open the tail and hang it on the wall

Your fixture is now assembled and ready to use.
