Precautions
• Please read this quick start guide carefully before using the product and keep it indoors.
• If you use the fountain at cold water, the water temperature should be 0-40°C / 32-104°F.
• It is strictly forbidden to put this product and its components into the dishwasher for cleaning.

Installation Instruction
• For first-time use, please follow the steps below:

1. Before installation, soak the filter in clean water for about 10 minutes, then rinse with tap water for 2 minutes. It is normal for a few black activated carbon particles to fall off.
2. Turn on the filter, wait for 1-2 minutes until the water is clear.
3. Install the filter tray under the bowl lid. Align the (2 bowl sides) first, then turn the filter tray clockwise until it is fully seated in the filter tray slot within the MIN-MAX water level line. (Water temperature: 0-40°C/32-104°F).
4. Push the power cord into the power port and turn the bowl on. The big one is recommended to hold the power cord.
5. Align the water tank cover with the power cable groove on the back, and press it firmly to ensure that the buckle on both sides of the top cover are locked.
6. Align the water tank cover with the power cable groove on the back, and press it firmly to ensure that the buckle on both sides of the top cover are locked.

Instructions for Splatter Guard
• After initial use, please follow the steps below:

1. Remove the splatter guard from the box.
2. Align the four buckles with the four holes on the side of the dog water fountain, then align the four buckles and press down to install.
3. At the 4 buckles, while pressing outward with your thumbs, lift up to remove the splatter guard.

Remove the bowl lid
There is a buckle on each side of the dog water fountain, pinch any one of the buckles, and lift up to remove the bowl lid.

Water Pump Adjustment Method
The first time the device is turned on, it defaults to the maximum water flow rate and high-brightness lights. This dog water fountain has a memory function that saves the set water flow rate and light brightness. When you turn it off and turn it on again, it will remember the previous water flow rate and light brightness.

The flow rate of the water pump and the brightness of the light can be adjusted individually. The adjustment method is as follows:

① Long press for 2 seconds to turn on/off the water pump.

② Short press: Set the 3 levels of water flow in the order of 100%-75%-50%.

③ Short press: Set the brightness of the light in the order of High-Bright/Medium Brightness/Low Brightness/Off light.

Pump Cleaning
1. Remove the power cord.
2. Use a finger loop to pull out the pump, which is held in place magnetically.
3. Use a finger loop to remove the pump.
4. Clean the part with a cleaning brush.

Cleaning and Maintenance
There is no need to remove the filter for daily cleaning and maintenance, there is no need to remove the filter for daily cleaning and maintenance.

1. It is suggested to clean it once a week because there are some pet hair and food residue in the water bowl for a long time of use.

2. Clean the water tank cover with a cloth to remove the water stains.

3. Put the filter in the dishwasher to wash it.

4. When the filter is used, it is turn brown. That is because the filter is exposed to the water, which does not affect the use.

Warranty
One year Non-Transferable Limited Warranty.
This Product has the benefit of a limited manufacturer's warranty.
