

## Trim Compatibility Support

The Treysta® tub & shower rough-in valve body is engineered to power both Gerber® and Danze® by Gerber trim. While the valve works out of the box with new Gerber and Danze by Gerber trim, specifically TC series trim, there are minor modifications that need to be made to old Gerber and Danze trim in order to make the valve compatible. Additionally, because Gerber and Danze by Gerber trims are designed to work with Treysta, there are specific parameters that need to be followed to make new Gerber and Danze by Gerber trim compatible with an older valve.

### Does my existing Gerber or Danze valve work with new Danze by Gerber trim?

In most cases yes, but there are several exceptions:

- The Danze by Gerber Vaughn® collection uses a unique installation method and therefore is not compatible with older model valves.
- The new TC suffix trim also includes the new Treysta Ceramic Disc Cartridge. This new cartridge is NOT compatible with the previous valve bodies. Please use the cartridge that shipped with your previous valve body.
- If you have a ceramic disc valve (Gerber GH-301 & GH-305 or Danze D112000, D112010, D115000, D115010, D113000 or D113010) AND your new trim is BN, BS or BR finishes you will also need to add a finish-matched sleeve to use NEW TC-suffix trim with an OLDER model ceramic disc valve:

Item No.	Finish
A041714NP	Brushed Nickel (BN Suffix)
A041714BS	Satin Black (BS Suffix)
A041714RV	Tumbled Bronze (BR Suffix)

### To make new Gerber and Danze by Gerber trim compatible with an older valve:

- Use the cartridge shipped with the valve.
- **Do not** use the new cartridge shipped with the trim, the new cartridge is not compatible with the old rough-in valve.

Example of Cartridge Shipped with Old Valve Assembly

New Cartridge, GA510015, Shipped with New Trim

### To make old Gerber or Danze trim compatible with the Treysta valve:

- Add the new cartridge, sold separately.
- Add a retainer nut that matches the finish of the trim, sold separately, see table below for specific numbers.
- When using old Gerber Maxwell® trim, shorter escutcheon screws, item # GA608234, are required.

Cartridge, GA510015

Retainer Nut, Shown in Chrome, GA016257

#### RETAINER NUTS

Item No.	Finish
GA016257	Chrome
GA016257BN	Brushed Nickel
GA016257BR	Tumbled Bronze
GA016257BS	Satin Black

- Deep Wall Extension Kit available, D113001/BN/BS/BR (with finish matched suffixes), works with all Treysta valves, both with and without diverter.
- Shallow Depth Installation Kit, GA663B1/BN/BS/BR (with finish matched suffixes), works with all Treysta valves, both with and without diverter.
