CLEANING AND MAINTENANCE FOR CAST ALUMINUM FURNITURE

With simple, regular maintenance and care, cast aluminum patio furniture will provide years of enjoyment. Occasional cleaning with mild soap and lukewarm water, followed by rinsing and a thorough drying with a towel is typically all that is required.

Do not use any abrasive materials, cleansers or bleach products as these may damage the finish. You should avoid allowing dirt to build up on the metal frames, as this may cause it to become more difficult to remove over time.

To keep your cast aluminum furniture looking its best, you may wish to store or cover your furniture when not in use for an extended period of time. Before placing covers on your furniture, clean any debris with mild soap and water then dry completely with a soft cloth. Trapped debris or moisture can cause surfaces to mold.

If you choose to move your furniture indoors, make sure it is clean and dry and stored in a moisture free environment.
