One adjustable, ventilated wood shelf behind center pair of doors

One adjustable, ventilated wood shelf behind each of the outside doors

Ventilated back panel in all sections

Levelers

Hidden casters built into the legs of the base

Metal base

**Material:** Elm and Poplar Veneers with Metal

**Finish Construction:** Hooker Furniture utilizes a multiple-step finish process of up to 16 finish steps. This results in an unsurpassed clarity, depth and color richness and durability to our finishes. Through hand-craftsmanship such as rubbing and padding, our finishes feel as good as they look, with a smoothness that is delightful to the touch.

**Frame Construction:** Hooker Furniture uses carefully chosen solid wood and select wood veneers over durable wood products in our furniture

construction. Use of veneers enables more decorative looks unattainable with solid wood. Veneers are used over durable wood products such as medium density fiberboard (MDF) and particle board, made of renewable resources. MDF and particle board are used in quality furniture for areas that need to be stable, such as large surfaces. These durable wood products do not expand and contract with heat and cold and do not absorb moisture as much as solid wood, which results in stronger and longer-lasting furniture.

**Important Use Information:** We are not responsible for damage to carpets, rugs or other makes and models of flooring caused by caster use.
