

PRODUCT USAGE INSTRUCTION

Concrete Planter • Timeless Design • Eco-Friendly

DRAINAGE DESIGN

Every concrete planter includes a factory-pre-drilled drainage hole and matching rubber stopper. Remove the stopper outdoors to drain excess water and prevent root rot; insert it indoors to stop spills, for flexible indoor-outdoor use.

EASY TO MAINTAIN

Simply rinse off dust and debris with water. For tougher marks, apply mild soap with a soft cloth. Skip harsh cleaners to protect the concrete surface and maintain its original look.

ALL-WEATHER DURABILITY

Made of premium blended concrete material. Our planters feature weather-resistant performance to withstand sun, rain, wind, and frost — perfect for year-round indoor & outdoor use.

IDEAL FOR VARIOUS PLANTS

Ideal for a wide variety of plants, including flowers, herbs, succulents, small trees, and more—perfect for indoor and outdoor spaces. Ample inner space supports healthy root growth for your plants.

SAFETY & CARE INSTRUCTION

DO NOT USE FOR ANY HEAT-RELATED PURPOSE

This planter is only for planting. Do not use as a fire pit or for burning materials. Keep far away from open flame and high-heat sources.

HOW TO MAINTAIN

Do NOT use abrasive pads or harsh chemical cleaners. Wipe clean exterior with soft brush or cloth and mild soapy water solution.

HANDLE WITH CARE

Concrete blended material is durable but may chip or spall if dropped or struck by hard/sharp objects. Wear protective gloves when moving or carrying the heavy planter to prevent surface scratch injuries. Always place the planter on a stable, level surface.

DRAINAGE SETUP & HANDLING

Insert the rubber stopper fully into the drainage hole and test for leaks before planting. Remove the stopper for outdoor planting to avoid over-watering and root rot.

DO NOT DRILL WITHOUT PROFESSIONAL GUIDANCE

Never drill holes on the planter without professional guidance. Unauthorized drilling may damage the structure and cause cracking or breaking.

FREQUENTLY ASKED QUESTIONS

Q: What material is the planter made of?

A: Our planters are crafted from a specialized concrete composite material. This unique blend achieves the perfect balance of durability, lightweight design, and environmental sustainability.

Q: Are the planters frost-proof?

A: Our planters are weather-resistant. However, we recommend moving them to a sheltered location during severe frost to extend their lifespan.

Q: How do I operate the rubber drain plug for indoor placement?

A: Firmly insert the included rubber plug from the interior of the planter. Perform a water-leak test before placing it indoors, so you can prevent leaks and potential damage to your flooring.

Q: Is this planter suitable for use as a fire pit, candle holder, grill or heater?

A: It CAN NOT be used for these purposes. This planter is made exclusively for planting. Keep it clear of fire, flames, cooking and heat sources to prevent damage and safety hazards.

Q: What should I do if my planter develops cracks, breaks or chips?

A: Discontinue use right away. Wear protective gloves while handling the damaged planter to avoid hand injuries. Do not continue to use any planter that has become cracked, chipped or broken.

Q: Can I drill, cut, modify, or repurpose this planter?

A: No. Please refrain from drilling, cutting, altering, or repurposing the planter. These actions can lead to cracking, expose internal reinforcing fibers, and create potential injury hazards.
