Clean and maintain product

1.How to clean the shower head :

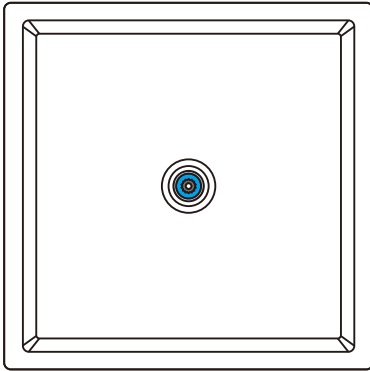

A.Rub the nozzles with fingers or toothbrush to loosen deposits,then run hot water for a while .

B.Put the shower head in a pot,fill with enough white vinegar or Detergent to cover the shower head.Then soak it for 30 minutes or longer.

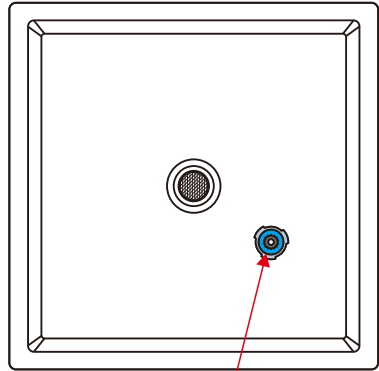

C.Use a high quality microfiber cloth and gently wipe over the surface, then rinse with warm water.Finally,use a dry chamois or paper towel to gently remove any residue.

Warm Tips :

If you feel the flow is too small , you can take out the water restrictor accordingly.
