Measuring Your Curtains

Before You Order - What to Measure:

- **Fabric Weight:** Consider if you have heavy or light curtains
- **Curtain Width:** Measure how much fabric you'll be gathering
- **Color Preference:** Choose the color that best complements your decor

Measurement Points

- A. Curtain panel width when spread flat
- B. Gathered curtain thickness at tieback point
- C. Distance from window frame to desired tieback position
- D. Available space for rope wrap-around

- **Flexible Sizing** - Adjusts from small to large curtain bundles
- **Any Panel Width** - Works with 24" to 120" wide panels

How to Measure Properly

Step 1: Gather Your Curtain

Pull your curtain to one side as you would want it to look when tied back. The rope design adjusts to any thickness.

Step 2: Check the Circumference

Wrap a measuring tape around the gathered curtain. The 14" rope can accommodate curtains up to approximately 4" in circumference.

Advantage: Unlike fixed-length tiebacks, this rope design is fully adjustable and works with virtually any curtain thickness.
