GENERAL SAFETY ADVICE

- λ Please read the instructions before use and retain for future reference.
- λ Ensure the trampoline has been assembled correctly, as per the instructions in the manual.
- λ It is essential that the intended site for this trampoline is completely flat and level. If the ground is un-level this will cause movement in the frame and could cause stress on the joined sections.
- λ Trampoline over 51 cm tall are NOT recommended for use by children under 3 yrs.
- λ **DO NOT** exceed the recommended **MAXIMUM WEIGHT** limit of **220 lbs.**
- λ **DO NOT** allow more than one person on the trampoline at a time.
- λ **DO NOT** wear glasses or helmets when using the trampoline.
- λ **DO NOT** fall or bounce on your knees, this can cause injury.
- λ **DO NOT** use the trampoline in wet or windy conditions.
- λ **DO NOT** somersault – this can cause serious injury.
- λ **DO NOT** allow other persons to go under, sit, stand or lie on the frame pads whilst the trampoline is in use.
- λ **DO NOT** use the trampoline when under the influence of alcohol, drugs or medication which may impair the jumper's judgement.
- λ **ALWAYS** wear socks when using the trampoline.
- λ **ALWAYS** remove jewellery before using the trampoline.
- λ **ALWAYS** jump in the middle of the trampoline bed.
- λ **ALWAYS** follow the safety warnings stated with your trampoline instructions in conjunction with using enclosure.
- λ **NEVER** wear footwear (e.g. shoes) when using the trampoline.
- λ Children **MUST NEVER** use the trampoline unless supervised by a responsible adult with knowledge of trampoline use.
- λ Before trampolining, inspect and replace any worn, defective or missing parts.
- λ Ensure the trampoline is on level ground with a minimum of 2.5M clear space around the sides, 8M clear height space above and that nothing is under the trampoline.
- λ Mount and dismount the trampoline with care as injury may result.
- λ Please read and refer to other warnings and use information in the instructions before use.
- λ Please read and refer to other warnings and use information in the trampoline instructions before use.

Please retain this information for future reference.

How to assemble PP jumping mat to frame with no effort?

Starting at corners and doing opposites works best.

This is the best way to put it together with almost no effort using a vacuum hose attachment. Each bungee cord only need 15 seconds and with less chance of being hurt in the process. Start with one at 12 o'clock, next one is placed at 6 o'clock which is opposite of 12 o'clock. To keep tension even, then put one at 9 o'clock with the next one being placed at 3 o'clock. After that just kind of continue to follow that same pattern always doing the opposite of the one previously placed.

Here is the video link of the whole installation: <https://youtu.be/9HXXhPtbsqw>

Or please search "ANCHEER T-shaped Trampoline Installation" on YouTube to get the assembly video.

The PP mat is in the correct size, it is not too small to install it.

The size is designed and tested by a large of numbers. This size will provides great bounce and benefits for users. If the size is larger, it will not help jump higher and may not finish the goal of exercise. Refers to the instructions above to install it easily.
