

How to use

Pets may need some training and guidance to try and adapt to new ramps.

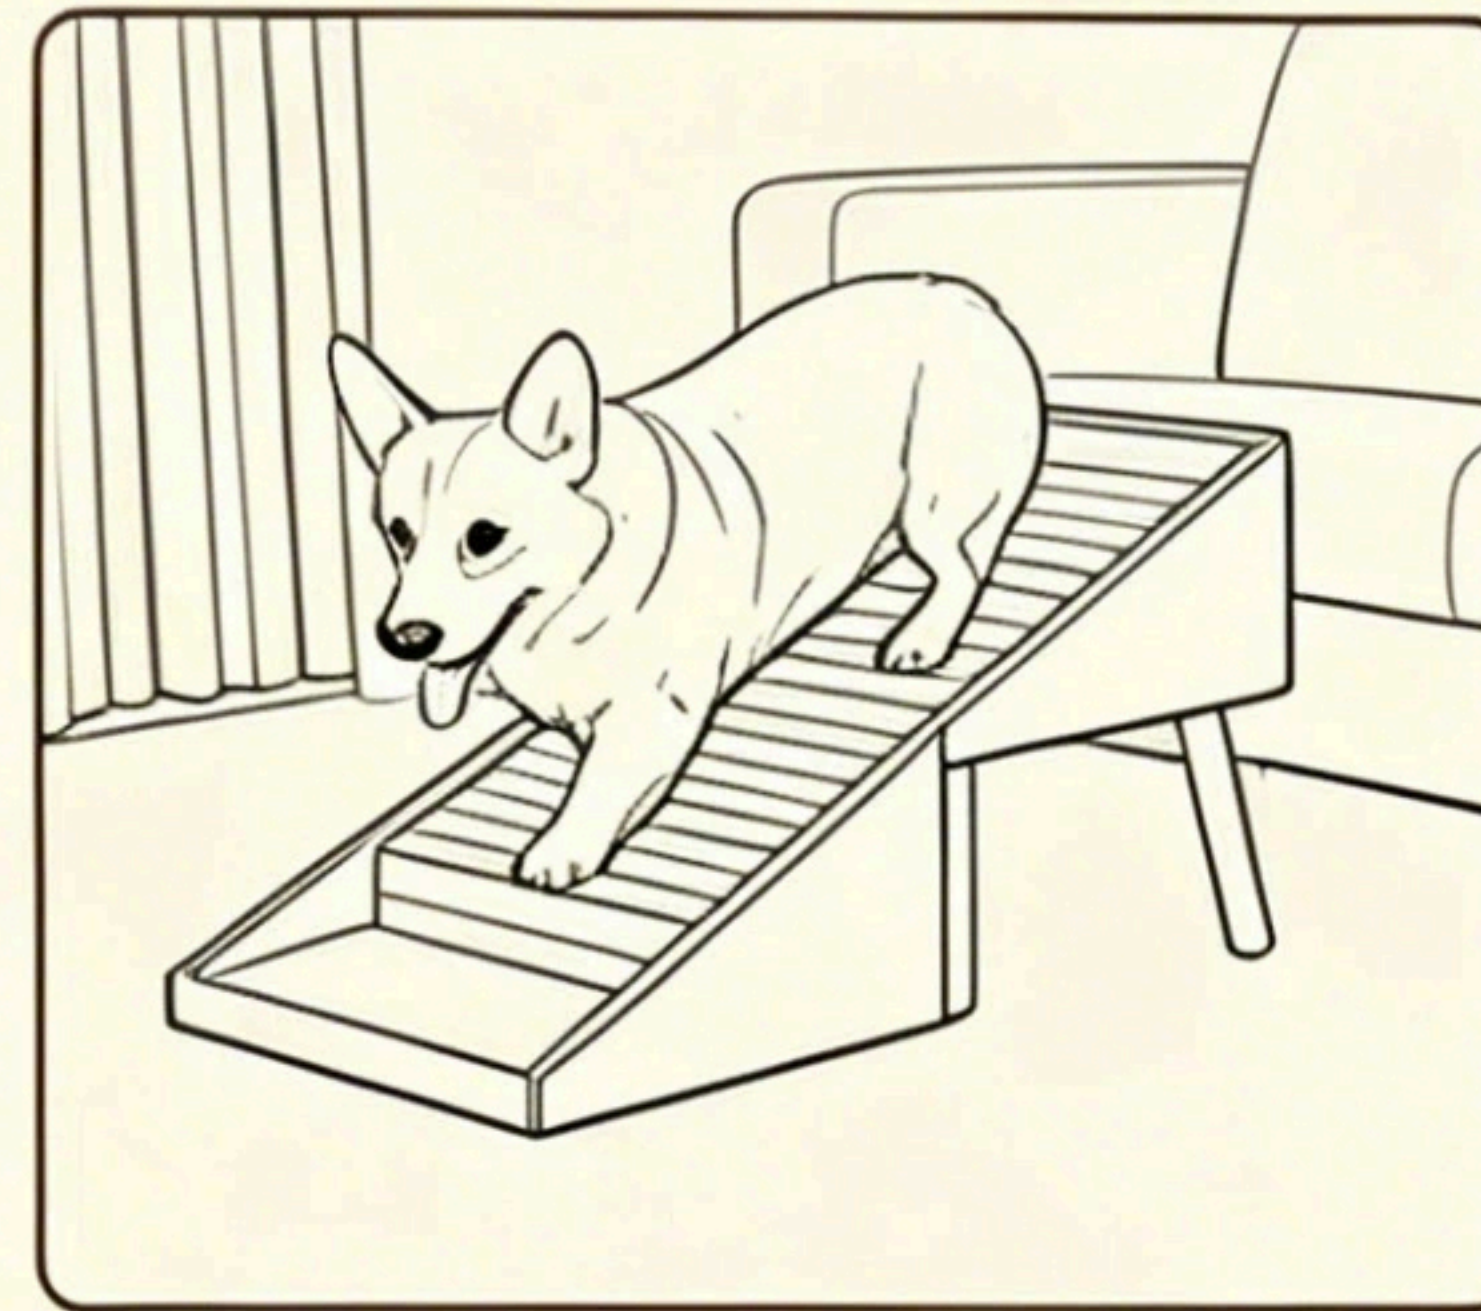

Step 1

Lay the ladder flat on the ramp, allowing your pet dog to freely smell and explore.

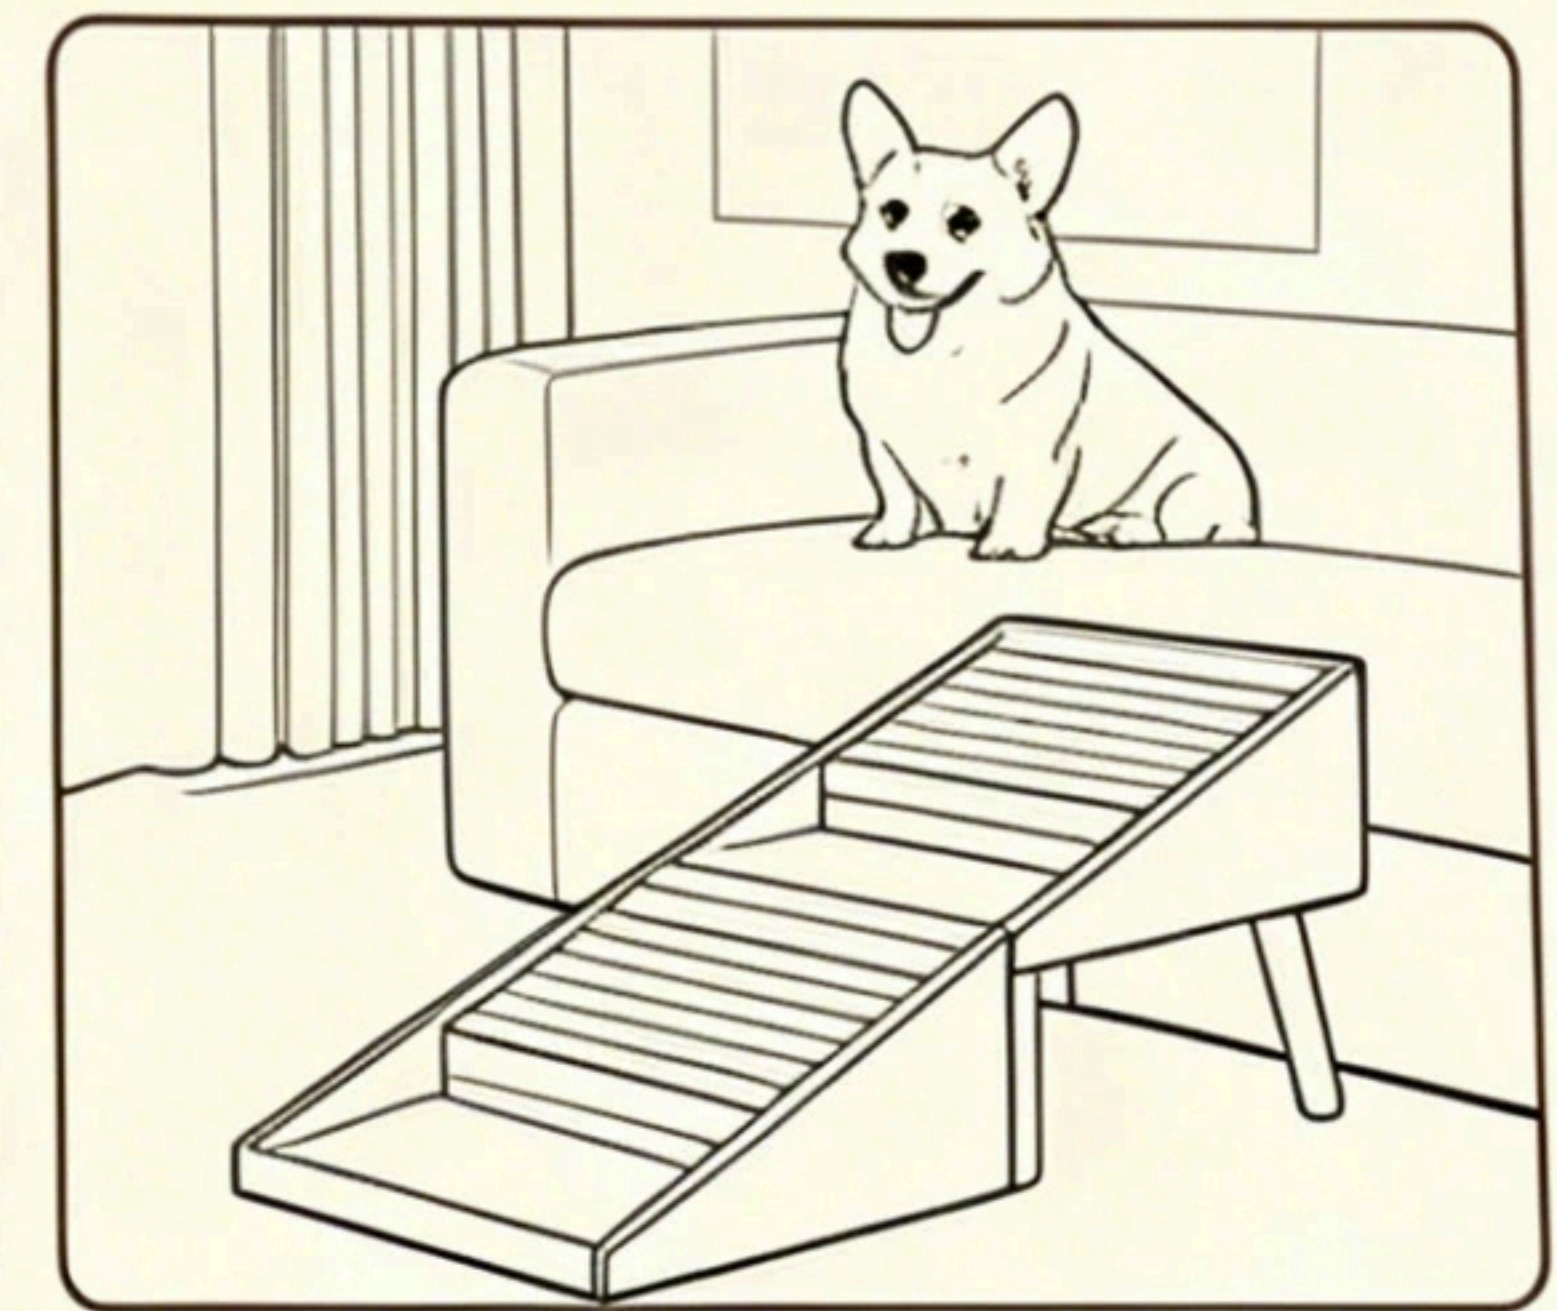

Step 2

Place the snacks at the front end of the ramp, guide it to put one paw on it, and continuously place the snacks up the ramp, guiding it to walk the entire ramp.

Step 3

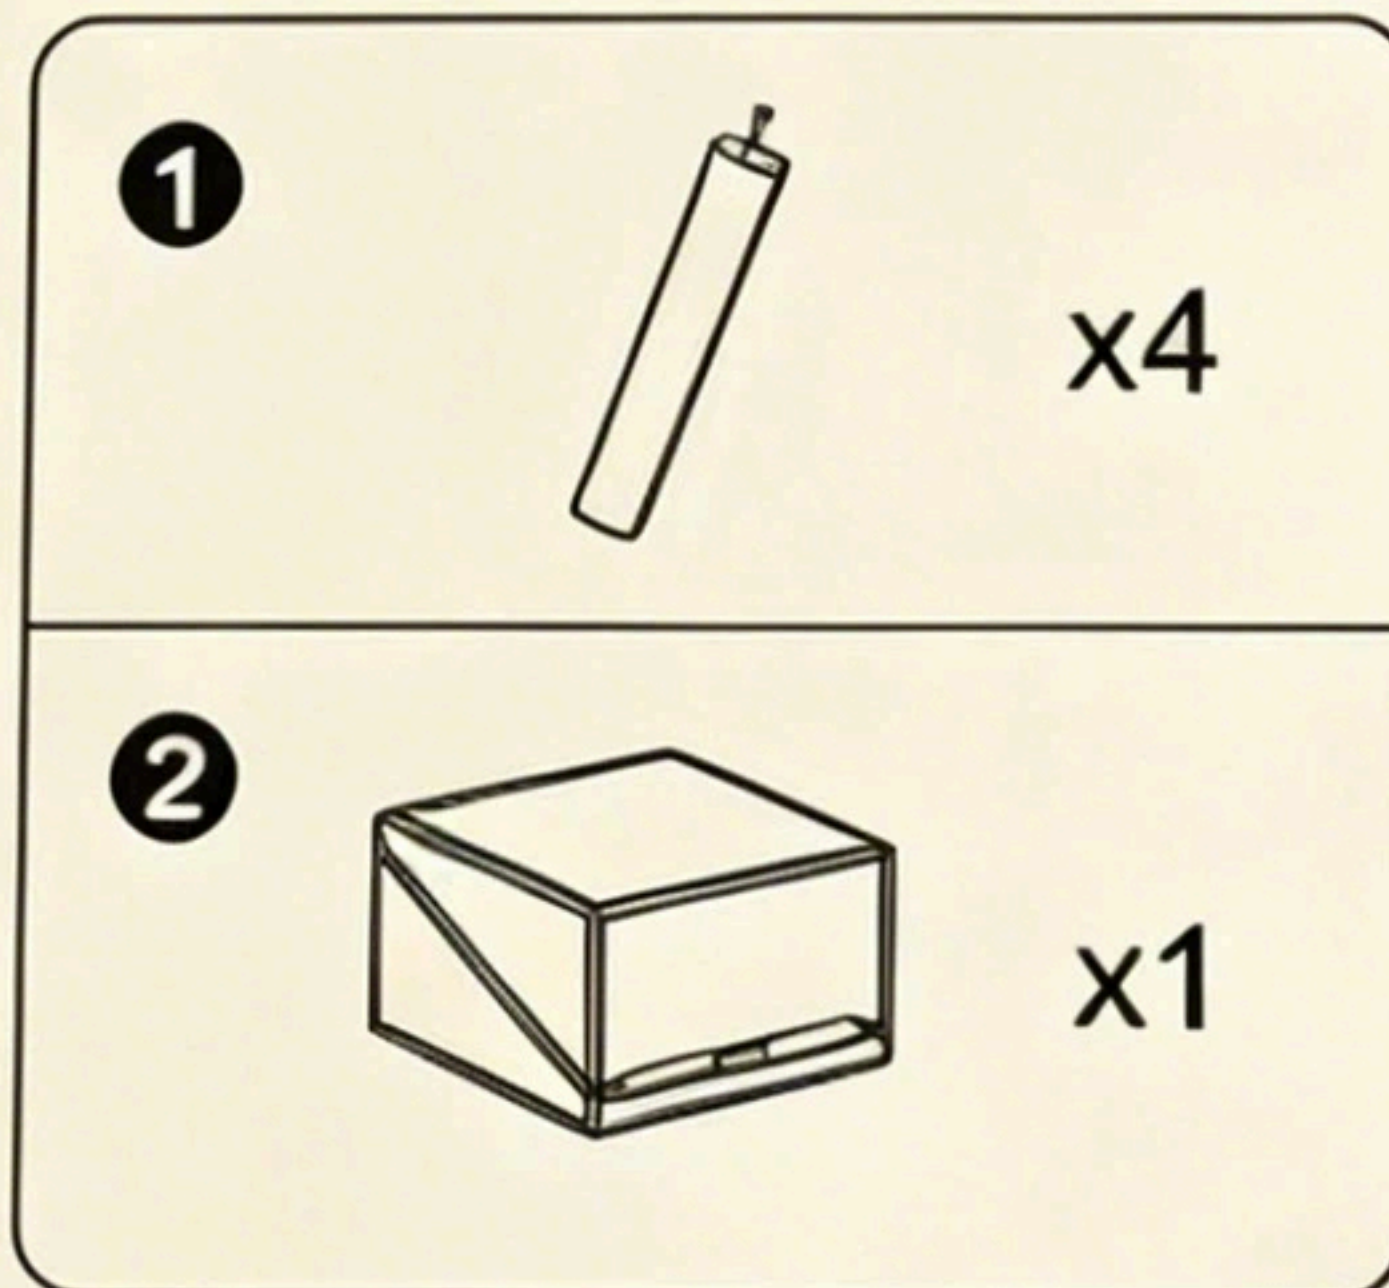

Using the same method, guide your pet down the stairs and practice a few more times until it is no longer afraid.

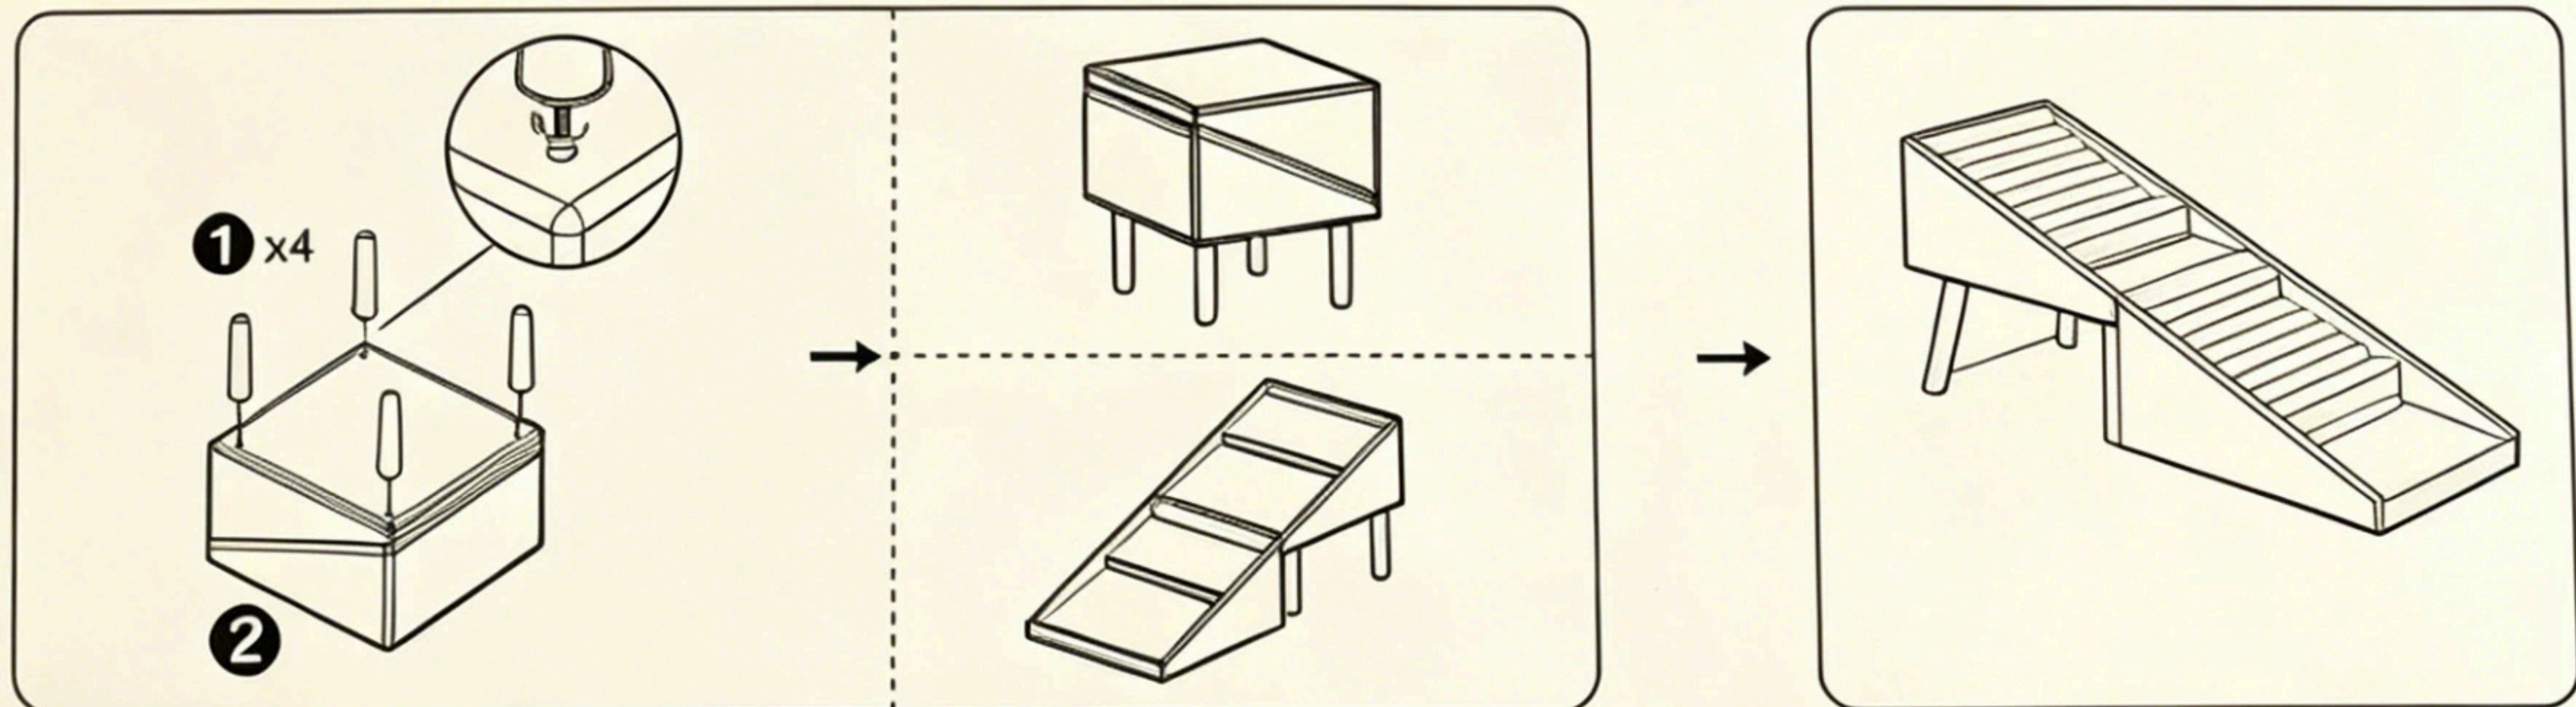

Step 4

5-10 minutes of training each time is enough, let your pet decide the pace by themselves. With patiently guide, your pet will learn to use the ramp.
