2. Retractable tube
3. Long crevice
4. 2-in-1 brush
5. Dust container release button
6. Power switch
7. Power cord
8. Dust release button
9. Accessories hook

Packing list:

Item Name	Quantity	Item Name	Quantity
Main Body (includes dust container with filter pad, motor and handle with power cord)	1	Retracted Tube	1
Cleaner Head	1	Long Crevice	1
2-in-1 Brush	1	Quick Start Guide	1
Accessories Hook	1	User Manual	1

Operating Instruction

Assembling the main body

- Install the dust container by inserting its clip into the handle's slot, then hear a click to secure in place. (Fig.1)

- Push the retractable tube into the suction hole opening. (Fig.2)

Fig.2

• Adjust the length of the retractable tube by pushing the locking button down and pull out the bottom section of the tube to a suitable length. (Fig. 3)

Fig. 3

Use the accessories

Cleaner head

• Insert the upper hose of cleaner head into the tube. (Fig. 4)

Fig. 4

Fig. 5

Switching between the two modes by pressing the button:

Press A

The nozzle brushes are extended

Press B

The brushes are retracted into the nozzle

Brushless mode

For carpet (Large Low-Medium Pile Carpet)

Brushed mode

For Hard floor (Wooden&Marble&Tile)

Note:

Due to powerful suction and high-power of all corded vacuums, the small or thin carpet would be easily sucked tightly by the vacuum cleaner and harder to clean.

Long crevice

Recommend use for narrow space such as a gap, which makes your cleaning work faster and easier.

2-in-1 brush

Recommend use for keyboard, curtain, dining-table etc.

Operating the vacuum

1. Insert the power plug into the electrical outlet.

Tip: please make sure power supply under correct voltage.

2. Turn on the appliance by pressing the power switch.

3. Start vacuuming, please keep the head brush touch the floor.

Tip: for high power devices, the temperature of the motor is higher than that of other parts during use, which is normal. Our product features overheat protection, so no need to worry.

4. Turn off the appliance by pressing the power switch again.

Note: Always remove the power plug from the electrical outlet before assembling or removing accessories.

Maintaining Your Vacuum

Cleaning the dust container

Press the dust container release button and detach the dust container from the handle part. (Fig. 6)

Fig.6

Fig.7

Open the button cover and expel any dust, dirt, and debris by pressing the dust release button on the waste bin. If further cleaning is needed, wash them with water only and let them air-dry completely. (Fig.7)

Cleaning the sponge inlet filter

1. Detach the dust container from the handle part.
2. Twist the lid of the dust container anticlockwise to open. (Fig.8)
3. Remove the sponge inlet filter from the top of the dust container. (Fig.9)

Fig.8

Fig.9

4. Rinse thoroughly under clean fresh water. Do not use soap or other detergents.
 5. Allow filter to dry naturally before placing back into the dust container.
 6. To reinstall the cover, line it up, then rotate down until it clicks into place.
- * **Do not place on radiators or use additional appliances, such as a hair dryer, to dry the filter. Doing so may cause warp or other irreparable damage to the filter.**

Checking for blockages

1. Remove the wand from the handheld vacuum and check all dust cup intake openings.

2. Remove the floor nozzle from the wand and check the wand for blockages.

3. Run scissors along the groove in the floor nozzle to cut or clear away any string, carpet fibers, hair, or other debris.

Troubleshooting Guide

Q: Appliance turns off on its own

A: Equipped with a motor-protective thermostat so it will shut off if it overheats

1. Check for blockages in tube, accessories, and inlet connection.
2. Empty dust cup and clean filters (see Maintenance section).
3. Allow the unit to cool for a minimum of 30 minutes. Plug in vacuum and turn it on.

Q: Doesn't pick up debris or weak suction

A1: The sponge inlet filter is filled with dust

Remove sponge inlet filter, clean or replace it. Follow instructions for rinsing and completely air-drying the filters before reinserting in the vacuum.

A2: Dust cup may be full, loose cover of dust box might cause reduced suction

Empty dust cup, make sure the lid is closed and sealed completely.

A3: Check floor nozzle for blockages

Remove any string, carpet fibers, or hair that may be wrapped around the head brush.

Q: Appliance doesn't work

A: No power in the electrical outlet or supply transformer

Check fuse or breaker.
Replace fuse/reset breaker.

Q: Dust falls out from the inner tube

A1: Dust container is full
Empty dust container.

A2: Check for blockages in tube, accessories, and inlet connection
(see Maintenance section).

Q: Dust comes out of the air outlet

A1: Sponge inlet filter is not installed correctly

Install sponge inlet filter in place by following a corresponding instruction.

A2: Sponge inlet filter is badly punctured or has a big hole
Replace the sponge inlet filter.
