

## Ecostar S1

Electric Composter for Kitchen, Smart Compost Bin Outdoor/Indoor, Odorless Single-Button Auto Operation, Turn Food Waste to Fertilizer for Plants, Food Waste Compost Machine (White/Black)

### About this item

- **Auto Electric Composter:** Using methods of high-temperature drying, grinding, and cooling, the electric compost bin can transform kitchen waste into organic powder within 5 hours. You can use this organic powder as fertilizer for plants or disposal of it to reduce the volume and odor of the waste.
- **90% Waste Reduction Volume:** The electric composter can help reduce up to 90% of food waste, thus helping you avoid sending leftovers to the landfill. This minimizes your carbon footprint, saves on disposal costs (you no longer need to pay high food waste processing fees), and revitalizes your garden.
- **Easy To Use and Clean:** With a 2.5-liter capacity and one-button operation, you can compost various types of kitchen waste simultaneously with just the press of a button. The countertop compost bin automatically adjusts the current and processing time based on the type and volume of waste. The bucket is made of cast aluminum, making it easy to clean. After removing the waste, you can add water and start the machine to clean it.
- **Odorless & Quiet Operation:** The kitchen smart composter is equipped with an activated carbon filter that absorbs odors from kitchen waste, preventing unpleasant smells from permeating your home. The noise level of the machine is less than 50 decibels, ensuring it won't disturb your daily life.
- **Super Energy Efficient:** The estimated annual electricity cost for the indoor composting bin is \$15 (Power Usage: 0.8kWh for full,  $0.15 \times 0.8\text{kWh} \times 10 \times 12 = 15$  USD); Estimated energy cost based on a national average electricity cost of \$0.15/KWh and a full 10 cup bin processes 10 times per month. This stat is only for reference.
- **Compact Size & Ideal for Gifting:** Small enough to be stored away, it can quickly tidy up your kitchen countertop and make it look neat and beautiful. The Food Waste Compost Machine is a perfect addition to any kitchen and can also be given as a unique, eco-friendly gift to your mom, dad, family, or friends.

### What can go in?

Almost anything you eat can go in Karfo-breakfast, lunch, dinner, yard waste, yesterday's coffee filter, and even that barely-touched school lunch box. Karfo handles it all.

Fruits & Veggies

Meats & Dairy

Breads & Grains

Yard Waste

### What's in the box?

Kitchen Waste Disposer × 1

Carbon Filter × 1

Metal Barrel × 1

Manual × 1
