

## Installation Diagram

### Installation and Usage Precautions

Professional electricians are required for installation to avoid the risk of electric shock. Please note the following:

1. Please carefully refer to the manual before installation and use. After use, please keep it properly for future use.
2. Please ensure that the light is securely installed or placed smoothly.
3. Please wear gloves when installing and repairing the light.
4. All electrical connections must comply with your local electrical safety regulations. It must be installed and repaired by professionals.
5. Please do not install the light on lime or damp ceilings.
6. It is strictly prohibited to use the product in damp environments unless otherwise specified.
7. Please replace the light source strictly according to the specifications and types indicated by the label. Otherwise, it may damage the product and cause safety accidents.
8. The electrical connection to the main power supply must have a power switch. Each wiring terminal must be solidly connected. For the lighting fixtures with a grounding terminal, please connect the grounding terminal reliably. Professional personnel should select an appropriate current limiting switch for you based on the nameplate, lamp cap sticker, and this manual.
9. Common replacement: Turn off the switch and cut off the power supply. After the light source cools down, remove the old light source, carefully check the nameplate, lamp holder sticker, and instruction manual, use a new light source of the same type and suitable for power, and install it into the lamp holder.
10. Cleaning: Turn off the switch and cut off the power supply. Please remove the lampshade and wipe&dry it with a soft dry cloth. Please do not install it back onto the lamp body before the lampshade is dry. Please do not use corrosive liquids to clean any part of the lamp. Please do not allow water to splash into the lamp head or inside the lamp body nor immerse the lamp in liquid.
